3NT by North

fact that most of your strength is in the black suits should help you decide on 3NT.

You have 19 points, too much for 1NT. With two 4-card minors you should open 1♦, regardless of strength. Partner responds 1♥.

Partner's ♥ bid makes you very happy. It also makes your rebid a snap. With 19 points and a balanced hand you jump to 2NT.

Partner now surprises you a little by saying 3♦.

What is your next bid?

For partner to take you out of Notrump he must have a distributional hand, probably with a singleton or void in one of the black suits. You have to make the choice between passing, bidding 4♦ or 5♦, or bidding 3NT.

While any of those choices might turn out best, the

North plays 3NT. East leads the ♠5. West plays the ♠9.

North plays 3NT. East leads the ♠5. West plays the ♠9.

Winner count: ♠ 2 : ♥ 0 : ♦ 2 : ♣ 4? : Total = 8?

Those 4 ♣ winners assume a 3-2 split. Since that is going to be the first suit you play you will find out soon enough.

You win the ♠Q. Play the ♣K, then the ♣10 (trying to tempt a cover). Go up with the ♣Q and West follows with the ♣J so you do have 4 ♣ tricks. Take your other two ♣s right now.

You are now at the crossroads. For your ninth trick should you try the ♦ finesse or should you establish a ♥. It's a no-brainer. If you finesse a ♦ and it loses to West's ♦Q a ♠ will come back, knocking out your last stopper. Then, if the ♦s fail to split 3-2 you will be short one winner and it will be too late to set up the ♥. So ignore the finesse and set up a ♥ for your guaranteed nine tricks.

As you can see, with this layout a ♦ finesse would be fatal.

West would win and play a ♠, and whether you ducked this one or not your last stopper would soon be removed. When ♦s failed to split 3-2 you would have been forced to try a ♥. East would win his ♥A and set you with ♠s.

Correctly played you would lead a ♥ honor to establish one trick in the suit and easily make the game with 2 ♠s, 1 ♥, 2 ♦s and 4 ♣s.

be the ♥ which you can ruff in dummy. However, East's ♥9 looks a little ominous, particularly since West apparently has some length in the suit. Presumably you played the ♥A on the first trick. Next lead the ♥6 from dummy, hoping East can't (or doesn't) ruff. He plays the ♥2. Win the ♥K and play your ♥4, ruffing with dummy's ♠Q. East is out of ♥s, but can't over-ruff. Now pull trumps and set up one ♣ trick. You lose 2 ♣s and a ♦, just as expected.

Ruffing with the ♠Q might cost a trick if the ♠s split 4-1 and East did not have a doubleton ♥. But you need to stay flexible and make your decisions based on what you see happening at the table. In this deal, after East signalled high-low in ♥s it was logical to play him for a doubleton.

An easy one. You bid 1 ♠. Partner responds 1NT.

What is your next bid?

You're going to rebid your 6-card ♠ suit, but how high? The usual guideline is to bid 2 ♠ with 13-15 points, but jump to 3 ♠ with 16-18 points. You come in just over the line so you bid 3 ♠. Partner puts it in game.

South plays 4 ♠. West leads the ♥Q, East playing ♥9.

South plays 4 ♠. West leads the ♥Q, East playing ♥9.
