East holds only two small ♠s with his ♠K, then two entries will be enough. But what if East holds

♠ K x x x ? Can you find a third entry to dummy?

If the ♦s split 3-2 the answer is **YES**. Play the ♦A, then lead your ♦8 to dummy's ♦J. Watch carefully to see if both defenders follow to this trick. They do. Play a ♠ to your ♠10, which holds the trick. Play your ♦Q to dummy's ♦K. Finesse the ♠ again. Return to dummy by playing your ♦5 to dummy's ♦6, then finesse the ♠ one last time.

If the ♦s had split 4-1 you would not have been able to enter dummy three times. That would have been very unlucky.

If you played your ♦5 too early you would not have been able to enter dummy three times even when there was a 3-2 split. That would have been very unsmart.

With 20 HCP and balanced distribution you should open 2NT. Do not let the good 4-card ♠ suit sway you to anything else. Partner bids 3NT and everybody passes.

South plays 3NT. West leads the ♥J. You try the ♥Q, but East plays the ♥K.

Winner List: ♠ = 1 : ♥ = 0 : ♦ = 4 : ♣ = 1 :: Total = 6

You need 3 more winners and at least 2 of them must come from ♠s. Furthermore you don't want East to lead ♣s through your King. Your best hope is that East holds the ♠K so you can finesse.

So you win the ♥A and start thinking about dummy entries. Your obvious entries are the ♦K and ♦J. If

Those two entries can only be the ♠K and ♠J. So you absolutely **MUST** win the first trick in your hand with the ♠A. Then play the ♣ A K. Over to dummy by playing ♠9 to ♠J. Lead the ♣J to drive out the ♣Q. Win whatever they return and play ♠Q to ♠K to reach your two good ♣s.

When you need dummy entries you may need to win a trick in your hand with an unnecessarily high card - like in this case.

You can only win 3 ♠ tricks however you play it, so you play to suit your entry needs.

You have 6 HCP and a 5-card suit. Although you can't be sure, there is a good chance your hand will be useful to partner.

So you bid 3NT.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♠4. You play dummy's ♠3 and East contributes the ♠6.

You can get them in ♣s, but only if you are careful.

After you unblock the ♣ A K you will go to dummy and play the ♣J. Then, after the ♣Q is driven out you will return to dummy for the two ♣ winners. That means you need **TWO** dummy entries.
