3♠ by South and another ♠ you could go down. Remember that you only counted one ♥ loser - that means you MUST ruff a ♥ in your hand.

Win the ♦ lead and play ♥ A and another ♥ before you touch trumps.

After this there is nothing the defense can do to stop you ruffing one ♥ in your hand.

Just suppose for an instant that you had played ♠ A and another.

West would have taken the second ♠, then pulled your last ♠. When the ♣ finesse failed you would make only 8 tricks.

Partner's 2♥ bid is a transfer; you respond 2♠.

Partner now bids 3♠.

Partner's 2♥ bid is a transfer; you respond 2♠.

Partner now bids 3♠.

Partner tells you that he has only invitational strength, but has at least 6 ♠s. The ♠s are fine by you, but with only 15 HCP you decide to pass.

South plays 3♠. West leads the ♦ J. UhOh. Maybe you should have bid game.

Loser List: ♠ = ? : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = ?

If the ♠s are 2-2 there will be only one loser in that suit. And maybe the ♣ finesse will work.

Don't get too optimistic too early. If you play ♠ A

3NT by South

Winner List: ♠ = 3 : ♥ = 0 : ♦ = 2 : ♣ = 3 :: Total = 8

With 12 points and a 5-card Major you transfer partner to that Major. You bid 2♥. Partner bids 2♠. Now what do say next?

With 12 points and a 5-card Major you transfer partner to that Major. You bid 2♥. Partner bids 2♠. Now what do say next?

You must insist on game, but since partner could have a doubleton ♠ you do so by bidding 3NT to give him the choice.

He chooses 3NT by passing.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♦ Q. Do you win the first trick or holdup?

A holdup wouldn't hurt you since West would retain the lead. But it probably wouldn't help you much either since you do have 2 stoppers in the suit. You obviously need to establish at least one more winner in ♠s so you won't have to depend on the ♥ A being with East. Need it be said that ♥s is the suit you are worried about and East is the Danger hand? Let's say you win the first trick with dummy's ♦ K.

Suppose you play ♠ A, then ♠ K Q. If they split 3-3 you will be soooo happy because you will make at least 10 tricks. But if East shows out on the third ♠ you will be pretty happy because you can give up a ♠ to West and still make at least 9 tricks. But if West shows out on the third ♠ you could be in deep trouble. You would have to give East the lead to establish an extra ♠ winner, and he might very well lead through your ♥ K.

There is a great safety play to protect against a 4-2 ♠ split. Play a low ♠ from dummy and finesse the ♠ 10. West may win with a doubleton ♠ J but you will still make the contract.

With this layout the safety play finesse actually works and you make an overtrick.

But visualize the ♠ J and ♠ 7 transposed. If you don't make the safety play it is true that the ♠ J will fall. BUT, East will still take the fourth ♠ and when he gets in he will return the ♥ Q.
