a chance of working. Let's say a 50% chance. Do you take it?

No, of course not. Not when you have a play that offers almost a 100% chance. Win the ♦A, play ♠K, ♠A, then ♥K Q, discarding dummy's 2 ♦ losers.

With one master trump still out you start on the ♣s, playing first the ♣K, then overtake the ♣J with dummy's ♣Q. The defense is welcome to take their ♣A whenever they want, and they are also welcome to their trump trick. You are so gracious because you have your ten tricks!

Half the time the ♦K will be with East, and the inferior plan of taking the finesse will work. On those Deals your superior plan shows no payoff.

But the other 50% of the time West will have the ♦K. On those Deals you get your just reward.

When you have 4 cards in both Majors you respond 2♥ to a Stayman request. Partner now bids 3NT.

When you have 4 cards in both Majors you respond 2♥ to a Stayman request. Partner now bids 3NT.

Partner denies having 4♥s so he must have 4♠s (or he would not have used Stayman). You correct the contract to 4♠.

South plays 4♠. West leads the ♥2. East grabs the opening lead with the ♥A and plays the ♦10.

Loser List: ♠ = 1 : ♥ = 1 : ♦ = 1 : ♣ = 1 :: Total = 4

The ♠, ♥ and ♣ losers are inevitable so you'd better not lose a ♦. Even though East has returned a ♦ it is still possible that he holds the ♦K so the finesse has

3NT by South			

You do have 9 points, of a sort anyway. Hoping your ♣ suit will be of use, you invite with 2NT. Partner says 3NT.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♠Q, East following with the ♠2. Do you hold up or not?

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 1 : ♣ = 1 :: Total = 5

No, don't hold up. At least you have ♠s stopped twice, your other suits are stopped only once.

Realizing that your only hope is for a bunch of ♣ tricks you win the ♠K and play the ♣Q. West covers with the ♣K. What do you do?

If you win with dummy's ♣A, and if the ♣s split 2-2, you can win 7 ♣ tricks and 4 other high cards. Wow!

But if it turns out that the ♣K was singleton you will win just TWO ♣ tricks because dummy has no other entries.

So if you feel like gambling, go up with the ♣A. But if you like the idea of a guaranteed contract let West hold the ♣K, and you make sure of the six other ♣s.

This Deal is not a "made up" one, it was actually played at our Monday Duplicate game in May 2012.

The play went exactly as shown above. When her LHO played the ♣K our declarer ducked in dummy and made the contract.
