Loser List: ♠ = 0 : ♥ = 0 : ♦ = 0 : ♣ = 3 :: Total = 3

It can't do any good to ruff your fourth ♣ in dummy because you would have to lose two before that could happen. Of course one of your ♣s can be discarded on dummy's ♠K but what about the other two?

Suppose you win the ♠ and unblock the ♦A. Play ♥K, then to dummy's ♥A. Take one ♣ discard on the ♠K, then play the ♦Q and discard a second ♣.

It won't work. You would establish the ♦ for your last discard but you have no entry to it.

This will work. At trick 2 discard the ♦A on dummy's ♠K. Play the ♦Q and discard a ♣ when West doesn't cover. East will take the ♦K and attack ♣s but you are in control now. You win your ♣A, pull trumps, ending in dummy, and discard the remaining 2 ♣ losers on dummy's ♦J 10.

This is called a Jettison play. You sacrifice your ♦A to unblock the suit for dummy's ♦Q J 10.

If West held the ♦K the play would be slightly different; you would have to ruff when he covered. But the result would be the same.

Did you notice that you started with 3 ♣ losers and no ♦ loser, but you ended up losing 1 ♦ and no ♣s?

There would be nothing wrong with a transfer bid here, but probably no advantage either. What you really want to know is how many Aces partner has. So you ask him with a Gerber 4♣ bid.

Partner says 4♠ (2 Aces),

There would be nothing wrong with a transfer bid here, but probably no advantage either. What you really want to know is how many Aces partner has. So you ask him with a Gerber 4♣ bid.

Partner says 4♠ (2 Aces),

Looking at three possible ♣ losers you bid 6♥.

North plays 6♥. East leads the ♠Q. The first trick is easy; you win with dummy's ♠A.

First decide about what to do at trick #1. If you hold up and South plays another ♦, no harm will be done. But probably no good will be done either because South is likely to have 6 ♦s, leaving North with just a singleton anyway. But what if South pockets the one ♦ trick and switches to ♥s, a suit where you only have one stopper? Since that might turn out badly, you should **NOT** hold up.

As to which hand to win it in, that's easy. You need to preserve any dummy entries that you can so you win the first trick with your ♦K.

Now you establish some ♣ winners. You play the ♣J and both defenders play low.

You have to assume that defenders good enough to hold up their ♣A at the first opportunity will be good enough to do it on the second play also. But you can thwart them by next playing your ♣10 and overtaking with dummy's ♣Q. Even if they do hold up again you can continue with another ♣ from dummy to establish the suit while you still have the ♦A for an entry.

If you fail to overtake the second ♣ North will hold up the ♣A again.

Then you will lose all those ♣ tricks in dummy.

Partner's 2NT is the lebensohl convention. He requests that you bid 3♣ as a relay, which you do. Partner now bids 3NT.

Partner's 2NT is the lebensohl convention. He requests that you bid 3♣ as a relay, which you do. Partner now bids 3NT.

When partner bids 3NT AFTER the lebensohl 2NT, he is suggesting you play there, and he guarantees a stopper in their suit. You are happy to pass.

East plays 3NT. South leads the ♦Q. South attacks in ♦s and you must make an immediate choice. Hold up, win in dummy, or win in your hand.
