4♠ by South

as long as they split 3-2 you will succeed. So you play ♠A, ♠K; West follows to the first and discards a ♦ on the second.

OK, East has two trump tricks, but don't give up. Maybe, just maybe, there is a way out. Check your winners: You have won 3 tricks - ♥A and ♠A K. You have 4 more top winners - ♦A and ♣A K Q. If you can somehow add 3 more small trumps that will be the 10 you need.

Play dummy's ♦7 to your ♦A, then ruff a ♦. Play a ♣ to your hand and ruff another ♦. Play another ♣ to your hand and ruff your last ♦. While you are ruffing these three ♦s East is helplessly following suit.

Now play to your good ♣ while East again has to follow suit.

You have taken the first 10 tricks. Poor East is going to end up ruffing his partner's ♦ winner with one of his master trumps.

Trumps don't always split as evenly as you would like them to.

When they split badly, sometimes you can recover by ruffing with small trumps while the trump-heavy defender has to follow suit.

This is called "trump elopement".

Partner's 2♥ bid is a transfer; you respond 2♠.

Partner now bids 3♠.

Partner's 2♥ bid is a transfer; you respond 2♠.

Partner now bids 3♠.

You wouldn't have chosen ♠s for a trump suit.

But you aren't doing the choosing, partner is. He has set the trump suit as ♠s and asks that you bid game if you have a maximum 1NT opening. So you bid 4♠, as instructed.

South plays 4♠. West leads ♥K, East plays ♥J. You have no reason to hold up so you win the ♥A.

Loser List: ♠ = ? : ♥ = 2 : ♦ = 0 : ♣ = 0 :: Total = ?

Things look simple. You can afford one ♠ loser so as long as they split 3-2 you will succeed. So you play ♠A, ♠K; West follows to the first and discards a ♦ on the second.

Sometimes bidding is easy. Partner has 20 or 21 points, balanced. You have 13 points, balanced. Total = 33 or 34 points, balanced. So you close your eyes and bid 6NT.

The contract would be 6NT played by North.

South plays 6NT. West leads the ♦ 10. Too bad West didn't lead a ♠. Oh, well.

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 4 : ♣ = 4 :: Total = 11

6NT by South

Why not try both? If you make sure you try them in the right order you can have both chances.

Suppose you lead a small ♠ from dummy and play your ♠J, and it loses to West's ♠Q. If you then try leading a small ♥ toward dummy's ♥Q, obviously the defender with the ♥K will grab it to set the contract.

Instead, try the effect of leading toward the ♥Q first. If West has the ♥K then you will succeed in creating the extra winner you need. But what if you play the ♥Q and East takes it with his ♥K? Too bad, but at least you are not dead yet. You still have a chance to finesse East for the ♠Q.

Here is an important principle. There are two critical cards, the ♠Q and the ♥K. However they are not the same degree of criticality.

If the ♠Q is in a favorable position, (with East), you are always going to make your contract no matter which you try first.

But if only the ♥K is in a favorable position, (with West), you can make the contract only if you try ♥s first.
