4♠ by North			

Partner expects you to bid 2♠.

But your hand has suddenly increased in value - with the known ♠ fit you add another point for your doubleton and you have 18 points. So you jump to 3♠; this is called a Super-Accept. But so what. Partner just bids the game anyway.

North plays 4♠. East leads the ♥10. West plays the ♥K, then ♥A, then ♥5.

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 2 :: Total = 5

You need to eliminate two losers. If East has the ♦K a finesse will save one loser. If ♣s split 3-2 that will eliminate one loser. And of course your ♥J is ready to provide an immediate discard.

So what are you going to discard right now on that ♥J? It looks obvious to discard the ♦Q; then if the ♣s do split 3-2 (68% chance) you will be home free, losing only two ♥s and one ♣.

Throwing the ♦Q is a bad idea. And basically unnecessary. If the ♣s are splitting 3-2 you don't need to keep a fourth ♣ in both hands. So discard a small ♣ from dummy and keep the ♦Q just in case the ♣s turn out 4-1 and you have to fall back on the ♦ finesse.

Looking at all four hands you can see why you needed to keep the ♦Q.

After you pull trumps you play the top two ♣s and discover (too late) that you cannot set up a ♣ winner.

But what if the ♦K was actually with West, and the ♣s were splitting 3-2 all the time?

In this scenario it is still ok to discard a small ♣ from dummy.

You pull trumps first, then play two top ♣s. When both defenders follow you give up a ♣. East wins and plays a ♦, but you go up with dummy's ♦A, enter your hand with a trump and **NOW** discard that ♦Q on your good ♣.

and 3 in ♣s. Since you must work on both ♠s and ♣s, you don't need to try for anything extra in ♦s.

If East has both black Aces you will go down, but you know that he cannot have two outside Aces with a 6-card ♥ suit headed by the Q J and still open with a weak 2-bid. So West must have at least one of the black Aces.

If you could guess which Ace East holds you could work on that suit first. He would win it, then get his ♥s established, but wouldn't be able to get back in to cash them.

But better than guessing, you should just holdup on the first ♥ trick and win the next one. Then it won't matter which Ace you knock out first because West will not have a ♥ to play in either case.

If you win the first trick and then play ♠s, you will be lucky. East will have to take his ♠A and then establish his ♥s. And when West takes the ♣A he won't have a ♥ to play.

If you win the first trick and then play ♣s, you will be unlucky. West will take his ♣A and play his last ♥. Then when East takes the ♠A he will set you with ♥ tricks.

If you hold up on first trick luck won't come into it. It will no longer matter which black suit you establish first.

You should be sure you and partner are on the same page with this bid. A 2NT overcall over a Weak-2 opener shows the same hand as a 1NT overcall over a 1 of a suit opener. In other words, 15-18 points, and at least 1 (preferably 2), stoppers in their suit.

Partner, who is on the same page, bids 3NT.

South plays 3NT. West leads the ♥9. As expected, West leads his partner's ♥ suit.

Winner List: ♠ = 0 : ♥ = 2 : ♦ = 2 : ♣ = 0 :: Total = 4

You need 5 more winners. This is important to keep in mind.

You can establish at most 1 winner in ♦s, 2 in ♠s,

First the question of holding up or not. The reason for a hold-up play is to be sure that when West gains the lead he has no ♥s remaining. But in this Deal you can place most of the strength with East so you don't need to hold up. And, in fact, there is a good reason why you shouldn't.

Win the first trick with your ♥K and immediately play a ♣, taken by East's ♣A. He plays the ♥J which you win with your ♥A. West followed suit to the second ♥!

East has 3 ♥ winners in his hand. There is a good chance that he has the ♠K and ♦K as well. So if you play either of those suits, leading toward the Queen, East will jump up with his King and put you down 1. So instead, play a ♣ winner, and when East shows out, play your last ♥! East will smile as he takes his three ♥ winners but then he will frown when he realizes he must lead away from one of his Kings! You, of course, will jump up with dummy's Queen of that suit for your ninth trick.

We learn at bridge that you should lead toward high cards to try to establish them. For example, in this Deal leading toward the ♠Q would establish a winner as long as East held the ♠K. Unfortunately you would be giving up the setting trick as you established the winner.

Always keep in the back of your mind the possibility of an elimination play. In this Deal that meant you needed to refuse the hold-up because you would need the third ♥ to throw East in with.

After the overcall of your partner's opening 1NT you must make a quick decision with this type of hand: Force to game or settle for partscore. Using lebensohl, a suit bid at the 3-level shows a 5-card or longer suit and is game forcing. You go for it by bidding 3♣ (not Stayman) and partner says 3NT.

The contract would be 3NT played by South.

North plays 3NT. East leads the ♥Q. You must make an immediate decision whether to hold up or not.

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 1 : ♣ = 0 :: Total = 4

Of course the ♣ suit will produce 4 winners so you need just one more in ♠s or ♦s.
