[showcards W:DJ]

You are West. The bidding has been as shown, (wild).

Partner led the ♦J; ♦Q from dummy, ♦K from you and ruffed by North.

North then pulls two rounds of trumps, (East discards on the second one), followed by his ♠Q, dummy's ♠A K and dummy's ♦A. North discards ♣s on the last two cards.

6♥ by North

with 2 ♠s, 7 ♥s, and no ♦s. His other 4 cards must have been ♣s, and he has discarded 2 of them.

The ♣6 is then played from dummy and you must make a decision - ♣A or ♣2?

Play the ♣2.

You have a full count on North's hand. He started

So he has 2 ♣s left in his hand. If one of them is the ♣K and you play your ♣A then you have handed him the contract.

By playing low you give him a guess to make. If he plays the ♣K he will make the contract, but if he plays the ♣J he will go down. He will probably play the ♣J, figuring you wouldn't have the nerve to duck with the ♣A. He'll know better next time he plays against you.

3NT by East

DOES have this card; otherwise East has his 9 tricks.

[showcards S:C9]

You are South. The bidding has been as shown.

You lead the ♦ 5; ♦ 3, ♦ 10 and won by East with ♦ K. East now leads the ♣ 9 from his hand

Play the ♣ A.

First ask yourself "Where are the ♦ A and ♦ Q?" North doesn't have either one or he would have played it at the first trick. So East has both of them. So with those 3 tricks and the 5 ♥ s in dummy East only needs to find one more winner. Assuming he has the ♣ K, (or why play the suit), if you play low he will find that one more winner whichever high ♣ he plays.

Next ask yourself "Where is the ♠ A?" Clearly North

So the way to beat the contract is to go up with your ♣ A, then play ♠ K, ♠ Q and a third ♠, hoping North holds ♠ A x x x.

3NT by South

[showcards N:DT]

You are East. The bidding has been as shown.

Partner led the ♥4, won by South's ♥8.

South enters dummy with the ♠K and leads the ♦10. What do you play?

Play the ♦A.

You don't have much in your hand, but you do have the ♦A, and you also have the responsibility to help West set up his suit.

So even though you don't know for sure how good that suit is, your plan of action should be to take the ♦A and return a ♥.

As you see, this will defeat the contract. Had you played a low ♦ South would have pocketed that trick and added 4 ♣s and 3 ♠s to go with the ♥ he had already won.
