When you are dealt 13 points and only one biddable suit things are simple. After you open 1 ♣ partner responds 1 ♦. What now?

You can't support responder's suit with only 3 cards so you show your minimum by bidding 1NT. Partner bids 3NT and you naturally pass.

North plays 3NT. East leads ♠6. West plays ♠K.

North plays 3NT. East leads ♠6. West plays ♠K.

Winners: ♠ 1 : ♥ 2 : ♦ 1 : ♣ 2 : Total = 6

You need 3 more winners and clearly they must come from the ♦ suit. If East happens to hold the ♦K all will be well, but what about the times when West holds it?

The immediate, burning question is whether to win the first trick or not. By winning you will create a second ♠ stopper - as long as West never gets into the lead. But the problem is that your main finesse is going into West. So you hold up on the first trick, sacrificing the chance of a second stopper. When West returns a ♠ you hold up again, playing the ♠J which East wins with the ♠Q. Your ♠A is finally driven out on the third trick.

Now you take the ♦ finesse, losing to West's ♦K (as expected). But it doesn't matter because West has no more ♠s. Whatever he plays you win and take all your winners, which happen to add up to 9.

This is one of those hands where your thinking would be clearer if you had less strength.

If you did not have the ♠J you would never consider doing anything except hold up. But with it you start wondering if you can get a trick with it. Of course, as you see, the hold-up would be correct with ♠ A 3 2, and it is also correct with ♠ A J 2.

With 20 points and 5-3-3-2 distribution you could correctly open 2NT.

However, many think it more important to bid a 5-card Major. In this case you decide to open 1♥. Partner responds 2♥.

Partner promised 6-10 points. With your 19 you decide to bid game.

East plays 4♥. South leads the ♦Q.

East plays 4♥. South leads the ♦Q.

Losers: ♠ 2 : ♥ 1 : ♦ 1 : ♣ 1 : Total = 5

One of the ♠ losers will be ruffed in dummy so you really just have to eliminate one loser.

It is very tempting to win the first trick in dummy and immediately finesse North for the ♥K. If the finesse works then all will be well, but if it fails another ♦ will knock out your ♦A. Then, when the defense gets into the lead with a ♠ or ♣ they will cash their ♦ winner.

Here is a better idea. Win the first trick in your hand with the ♦A, and immediately lead a low ♠ toward the ♠Q. If South holds the ♠K he is caught in the middle. If he ducks you play the ♠Q and don't lose any ♠s. If he goes up you can win a later trick with the ♠Q and dump dummy's ♦ loser on your ♠A.

Declarers in suit contracts tend to focus on trumps, they want to pull them right away. And for good reason, that is usually the best Plan.

But there are many situations when that is **NOT** the best plan. Perhaps because you need to ruff something in dummy, or perhaps (like this hand) because playing trumps would give the timing to the defense.

In this deal pulling trumps is secondary to finding a place for that slow ♦ loser.
