Yes, you have a 6-card ♥ suit. But you also have 4 ♠s, so you start with a Stayman 2♣.

Partner says 2♦;

Yes, you have a 6-card ♥ suit. But you also have 4 ♠s, so you start with a Stayman 2♣.

Partner says 2♦;

OK, no 4-4 ♠ fit. But partner has at least 2♥ so you know you have an 8-card (or better) fit there. With 10 points you have to decide whether to invite or insist, and you like the looks of this hand so you bid 4♥.

North plays 4♥. East leads the ♣J. You play low from dummy and East continues with ♣10, then ♣9 which you ruff.

Loser List: ♠ = 1 : ♥ = ? : ♦ = 0 : ♣ = 2 :: Total = 3 + ?

You don't expect a trump loser, and obviously you cannot afford to have one.

So after ruffing the third ♣ you play ♥A, then ♥Q. Aargh! East discards a ♦ on the second trump.

West has left the ♥ J 9 while you have the ♥ Q 10 8. If only dummy had another ♥ you could finesse West's ♥J, but, alas, dummy has none. Can you see another way to accomplish the finesse?

If you could manage to be in dummy after trick 11, and have nothing in your hand but the ♥ Q 10, while West had nothing in his hand but the ♥ J 9 you would have him. But to accomplish this you must use up your ♥8 beforehand.

You enter dummy with a ♦, then play a small ♦ and ruff with your ♥8. Then play your ♠K. East wins this and assume he plays another ♠.

Win the ♠ in dummy, then play ♦K, and the other ♠ winner. If West has to follow to all these then you will have accomplished your objective; West will be down to ♥ J 9 and will have to ruff trick 12 with one of them - which you will over-ruff.

One possibility was not mentioned earlier.

When you played a third ♦ to ruff with your ♥8, West **COULD** have ruffed this. If he had, it would have handed you your contract since you could over-ruff and take care of your trump problem immediately.

By the way, ruffing a card to purposely shorten your trump holding is called a Trump Coup.

either ♣s or ♠s. Unless a defender foolishly discards a ♥ it can't come from that suit. Which means you have to win a ♦ trick.

So after winning the ♠ A, you play a ♣ to dummy's ♣ K, then lead a small ♦ toward your hand and play . . . what?

At first this looks like the classic King / Jack guess situation where you try to figure out if South is more likely to have the Ace or the Queen.

But it isn't like that at all. If South has the ♦ A then he will take it no matter which ♦ you play, and will defeat you with 1 ♦ and 5 ♠ tricks. Your **ONLY** chance to make this contract is for North to hold the ♦ A. So you play the ♦ K, then you . . .

. . .

Lucky you, North did have the ♦ A.

Smart you, if you had played the ♦ J you'd be down 2.

Partner's cue-bid is the lebensohl version of Stayman, in this case promising 4 ♥s. Since it is an immediate cue-bid it denies a ♠ stopper.

You are forced to bid and you don't have 4 ♥s.

But you **DO** have a ♠ stopper so you decide bid 3NT.

East plays 3NT. South leads the ♠ K.

You hold up your ♠ A until the third round; South started with 6 ♠s.

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 0 : ♣ = 4 :: Total = 8

You need just one more winner. It cannot come from ♥ it can't come from that suit. Which means you

You have an invitational strength hand with a 6-card Major suit. It's a no-brainer; you transfer with a 2♥ bid. Partner says 2♠;

You have an invitational strength hand with a 6-card Major suit. It's a no-brainer; you transfer with a 2♥ bid. Partner says 2♠;

Repeat: You have an **invitational** strength hand with a **6-card** Major suit. So you invite with 3♠s. Partner accepts with 4♠.

The contract would be 4♠ played by North.

South plays 4♠. West leads the ♥Q. Of course you take the ♥A.

Loser List: ♠ = 1/2/3 : ♥ = 0 : ♦ = 3 : ♣ = 0 ::
Total = 4/5/6

Missing 5 ♠s, the most likely split is 3-2, (68% of the time). You win the ♥A then play ♠K and ♠A, both defenders following to both leads but the ♠Q is still out there.

Do you play ♠s again or not?

Usually it is a good idea to leave a master trump un-pulled and go about your business winning tricks in other suits. The idea is to force them to ruff without using any more of your trumps. But that is only "usually". Here your big source of winners is going to be the ♣ suit - and there are zero outside entries to it. Suppose you do not force out the ♠Q, but start playing ♣ winners. A defender might ruff the third ♣ and you would be doomed.

So play one more ♠ and they are doomed.

Master trump outstanding: To pull or not to pull, that is the question.

Almost always the answer is "not to pull".

The big exception is when you have a running suit in one hand but with no outside entries to it. A hand exactly like this one.
