This is another example of "She who knows, goes."

SOUTH has a solid 18 points, (1 extra for the fifth Club), so when NORTH opens 1NT she KNOWS that together they must hold at least 33 points. They may even have 35 points.

In any case they should be in slam, so SOUTH GOES to 6NT.

EAST has 20 points, counting one extra for the fifth Diamond. Just right to open 2NT.

WEST has 6 points, just enough to bid 3NT. (20 + 6 = 26) (21 + 6 = 27)

3NT by South

After NORTH passes initially, SOUTH opens 1NT.

With 9 points, NORTH has invitational strength, so he says 2NT.

SOUTH has a small problem - NORTH's bid tells her to bid 3NT with 17 points, but to pass with 15 points. Her problem is that she has 16! Since it looks to her like a "good" 16 points she bids 3NT. If those 10's and 9's had been 4's and 3's she would have passed.
