Then start running the ♦ suit.

This is the situation after you have unblocked dummy's ♣A and then played 5 ♦ winners.

So far neither defender is hurting, but that is about to change.

You play your ♦3 and discard dummy's ♣10.

West is squeezed. He can't throw his ♣K without letting your ♣Q become a winner. But if he discards a ♠ dummy's ♠5 will win the last trick. This is soooo much fun.

North is to play 6NT. East leads the ♥J. West wins the ♥A and returns the ♥2.

With only 11 winners you need to find one more and your prospects are quite slim.

No matter how the ♠s split only one defender will hold the Guard because only one defender can have as many as 4. IF (it's a big IF) that same defender holds the ♣K then you can squeeze him.

Can you see how the squeeze is going to work?

If you try to run your ♦s right away you will have a problem with your ♣Q later on. It will be no good as a Threat card because you will have no entry back to your hand.

The solution is the Vienna Coup. Play a ♣ to the ♣A at trick 3.

squeeze him.

Play 5♥ winners and the ♠K.

Drum roll please.

Play your ♥2 and dump dummy's ♦6.

East has no answer.

South is to play 6♥. West leads the ♠Q. East wins the ♠A and plays the ♦K.

Of course you have noticed that in most of these hands you are exactly one trick short. No coincidence - it's when you are one trick short and can't find another likely plan that you start to look for a squeeze.

In this hand dummy's fourth ♣ is an obvious Threat, so you should ask yourself if you can find another Threat for when ♣s don't split 3-3. Another thing you have probably noticed is that although 3-3 splits happen about 40% of the time in real life, they **NEVER** happen in these pages!

East's ♦K play helps you find the other Threat. It appears that he must hold the ♦Q also, so your ♦J is now a Threat against East. If he holds 4 ♣s you can

become the odds-on favorite to hold the ♠ Guard. His ♠ discard makes it very likely that he started with 5 ♠s.

North is to play 7NT. East leads the ♥K.

With 12 obvious tricks your first thought should be that perhaps the ♠s will split 3-3.

Then, your second thought should be that dummy's ♥J is a Threat against East's ♥Q, so if it is East who holds 4 ♠s you will be able to squeeze him.

Since the contract is 7NT you take the first trick with the ♥A.

With one trick in the bag you should test ♦s next. When you play the ♦A West discards a ♠.

You continue with the ♦Q and ♦K, West discarding a ♥ and a ♣.

Since West has shown up with a ♦ void he has become the odds-on favorite to hold the ♠ Guard. His ♠ discard makes it very likely that he started with 5 ♠s.

To find out for sure you play ♠A, then ♠Q. Sure enough East discards a ♥ on the second round.

You can't squeeze East in ♥s and ♠s because he doesn't hold the ♠ Guard, West does.

But now a completely new possibility shows up. Say to yourself, over and over, "East must guard ♥s, and West must guard ♠s. Nobody can guard ♣s."

You start playing dummy's ♦ winners.

With one more ♦ in dummy, things look like this.

When you play the ♦5 West must keep both ♠s to guard against your ♠7. So he discards the ♣6, hoping partner can stop that suit.

Your ♠7 is now worthless so you throw it.

East has no problem, (yet), he discards the ♥10.

[showcards N:S5,HJ,CK,C7 E:SJ,ST,CQ,CT S:SK,CA,C8,C4 W:HQ,CJ,C9,C5]

It is now time to pressure East.

Play dummy's ♠5 to your ♠K.

East MUST keep his ♥Q so he releases his ♣5.

And you win the last three tricks with ♣K, ♣A, ♣8.

This is called a Double Squeeze.

Play 4 rounds of ♦ s.

[showcards N:S9,H6,D4,C8 E:HQ,H9,H8,CJ S:S7,HA,HK,H5 W:SJ,HJ,HT,H7]

On the fourth ♦ East had to discard a ♥. You discarded a small ♠. West discarded a ♠ on the third ♦ and a ♥ on the fourth.

Play dummy's ♦ 4. East cannot throw the ♣ J or he will set up dummy's ♣ 8, so he discards a ♥.

You discard the ♠ 7.

Now West is squeezed. He cannot discard the ♠ J or he will set up dummy's ♠ 9, so he discards a ♥.

You win the last three ♥ tricks with another Double Squeeze.

South is to play 7NT. West leads the ♠ Q.

One more winner is needed. Dummy's fourth ♣ is a possibility.

So take the ♠ K and play ♣ A K Q.

West discards a ♠ on the third ♣.

Now you know East guards the ♣ s.

Before tackling ♦ s, see what you can discover about ♠ s.

Play the ♠ A. East discards a ♥.

East guards the ♣ s. West guards the ♠ s. Nobody can guard the ♥ s.

Now play the ♦ A, ♦ K, and ♦ Q, discarding the ♣ 3 from your hand.

Then lead dummy's ♣ 7 to your ♣ K.

[showcards N:ST,CA,C9 E:DJ,D9,CJ S:HA,C8,C6 W:SJ,CQ,CT]

Here you are in your hand.

Only East can guard dummy's ♠ 10, and only East can guard dummy's ♣ 9.

So you play your ♥ A and East must give up one of his guards. If he holds on to the ♠ J then you toss dummy's useless ♠ 10. If he throws the ♠ J then you toss dummy's ♣ 9.

North is to play 6♥. East leads the ♠ A, then ♠ K.

When you looked at just your and dummy's cards on the previous page it may have looked impossible to find a twelfth winner.

Even looking at all four hands here it is still very difficult to come up with a plan.

Here's a hint: If East holds 3 ♣s, (and you see that he does), can you squeeze him in ♣s and ♠s?

Of course you ruffed the ♠ K.

The big problem with trying to squeeze East in the black suits right now is that West actually holds a ♠ guard. But you can fix that.

Play dummy's ♥ Q and ♥ 10, then ruff a ♠, then pull the last trump.
