Partner's 2♦ bid is a transfer; you respond 2♥.

Partner now bids 3NT.

Partner's 2♦ bid is a transfer; you respond 2♥.

Partner now bids 3NT.

Partner tells you that he has enough points to be in game, and that he holds exactly 5 ♥s. With your 3 ♥s you know of an 8-card Major fit so you correct the contract to 4♥.

North plays 4♥. East leads the ♣J. You win the opening lead with your ♣Q.

Loser List: ♠ = 0 : ♥ = ? : ♦ = 2 : ♣ = 0 :: Total = ?

The 2 ♦ losers are unavoidable, and even you will have to give up a trick to the Ace of trumps. So you have to make sure not to lose a second ♥.

Win the ♣Q and play a small ♥ to dummy's ♥J, which holds the trick.

I hope you didn't continue drawing trumps by playing the ♥K. If you did then you are going down in an ice-cold contract.

The way to lose only one ♥ trick is to keep leading toward dummy's honors. So come to your hand with a black card and play another ♥ in that direction, leading through East's ♥A. When you win that trick repeat the maneuver.

It is really against the odds for East to hold ♥ A 10 9 x. In fact it would only occur perhaps one time in seven.

But there is no reason to go down once every seven times when you don't need to.

your winners.			

The 2♣ bid was Stayman, so you bid your ♥s.

Partner takes the direct approach and puts you in slam.

East plays 6♥. South leads the ♣Q. South finds their best lead, exposing your ♣ loser right off the bat.

Loser List: ♠ = 0 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 2

If you can guess the ♥ finesse correctly you will make 7, discarding dummy's ♣ loser on the fourth ♦. But if you guess wrong they will immediately set you with a ♣ trick.

There is a better way - one that combines two chances. Win the ♣A. Then play your ♥A and ♥K. If the ♥Q happens to fall, pull the last trump and run

If the ♥Q **DOESN'T** fall, (she won't of course), switch to ♦s. On the fourth round of ♦s discard dummy's ♣, whether it is ruffed with the ♥Q or not.

If you knew to play the North for the ♥Q then you wouldn't need this improved plan.

But playing the deal as described will win whenever the ♥Q is doubleton, **OR** when the player with the protected ♥Q holds at least 3 ♦s.

Pretty good odds, better than the going rate for finesses, which is 50% off.

There was an alternate plan, just as good. After taking the two top trumps, run the ♠s, discarding two ♣s from your hand. As you see, either would have worked.

have seen the ♠4 and ♠2 so it is clear that West started with a 5-card suit. That means East still has a ♠.

The instant you play a ♦ one of the defenders will grab the ♦A and West will take his three more ♠ tricks.

As much as you hate to put your contract in the hands of a 50% finesse chance, that is what you must do.

Forget the ♦ suit and finesse West for the ♥K, trying for two extra tricks in ♥s.

West played very well to duck the second ♠, leaving his partner with a ♠ in case he could get the lead.

So you have to play well and stay away from ♦s.

Partner's 2NT bid invites you to bid game if you have a maximum hand. You aren't thrilled by all the Quacks in your hand but with 17 points you bid 3NT.

South plays 3NT. West leads the ♠5. East wins the first trick with the ♠K and returns the ♠9. West plays the ♠3 under your ♠J.

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 0 : ♣ = 5 :: Total = 7

You need 2 more tricks, and the ♦ suit will provide them after you drive out the ♦A.

Is that what you should do?

That is definitely **NOT** what you should do. West led the ♠5, then played the ♠3 to the second trick. You

Loser List: ♠ = 0 : ♥ = 0 : ♦ = 0 : ♣ = 3 :: Total = 3

It can't do any good to ruff your fourth ♣ in dummy because you would have to lose two before that could happen. Of course one of your ♣s can be discarded on dummy's ♠K but what about the other two?

Suppose you win the ♠ and unblock the ♦A. Play ♥K, then to dummy's ♥A. Take one ♣ discard on the ♠K, then play the ♦Q and discard a second ♣.

It won't work. You would establish the ♦ for your last discard but you have no entry to it.

This will work. At trick 2 discard the ♦A on dummy's ♠K. Play the ♦Q and discard a ♣ when South doesn't cover. North will take the ♦K and attack ♣s but you are in control now. You win your ♣A, pull trumps, ending in dummy, and discard the remaining 2 ♣ losers on dummy's ♦J 10.

This is called a Jettison play. You sacrifice your ♦A to unblock the suit for dummy's ♦Q J 10.

If South held the ♦K the play would be slightly different; you would have to ruff when he covered. But the result would be the same.

Did you notice that you started with 3 ♣ losers and no ♦ loser, but you ended up losing 1 ♦ and no ♣s?

There would be nothing wrong with a transfer bid here, but probably no advantage either. What you really want to know is how many Aces partner has. So you ask him with a Gerber 4♣ bid.

Partner says 4♠ (2 Aces),

There would be nothing wrong with a transfer bid here, but probably no advantage either. What you really want to know is how many Aces partner has. So you ask him with a Gerber 4♣ bid.

Partner says 4♠ (2 Aces),

Looking at three possible ♣ losers you bid 6♥.

West plays 6♥. North leads the ♠Q. The first trick is easy; you win with dummy's ♠A.

Partner's 2NT is the lebensohl convention. He requests that you bid 3♣ as a relay, which you do. Partner now bids 3NT.

Partner's 2NT is the lebensohl convention. He requests that you bid 3♣ as a relay, which you do. Partner now bids 3NT.

When partner bids 3NT AFTER the lebensohl 2NT, he is suggesting you play there, and he guarantees a stopper in their suit. You are happy to pass.

North plays 3NT. East leads the ♦Q. East attacks in ♦s and you must make an immediate choice. Hold up, win in dummy, or win in your hand.

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 2 : ♣ = 0 :: Total = 5

First decide about what to do at trick #1. If you hold up and East plays another ♦, no harm will be done. But probably no good will be done either because East is likely to have 6 ♦s, leaving West with just a singleton anyway. But what if East pockets the one ♦ trick and switches to ♥s, a suit where you only have one stopper? Since that might turn out badly, you should **NOT** hold up.

As to which hand to win it in, that's easy. You need to preserve any dummy entries that you can so you win the first trick with your ♦K.

Now you establish some ♣ winners. You play the ♣J and both defenders play low.

You have to assume that defenders good enough to hold up their ♣A at the first opportunity will be good enough to do it on the second play also. But you can thwart them by next playing your ♣10 and overtaking with dummy's ♣Q. Even if they do hold up again you can continue with another ♣ from dummy to establish the suit while you still have the ♦A for an entry.

If you fail to overtake the second ♣ West will hold up the ♣A again.

Then you will lose all those ♣ tricks in dummy.
