2NT shows a balanced hand with 8+ points, and when NORTH then supports ♠s SOUTH makes a slam try.

SOUTH bids RKC Blackwood 4NT. NORTH shows two Keycards (two Aces) and SOUTH bids 6♠.

NORTH has a decent Limit Raise, and SOUTH tries RKC Blackwood.

NORTH replies to the 4NT bid with 5♦, zero or three Keycards. So which is it, zero or three?

Pretty simple - since SOUTH holds three Keycards himself NORTH can hardly have three also since there are only five total. She must have zero and SOUTH signs off at 5♥.

NORTH jumps to 4♠, confident that SOUTH could make 10 tricks even if he just has 6 points.

SOUTH knows he can make more and bids RKCB 4NT.

NORTH's 5♦ response shows zero or three Keycards. So which is it? Zero or three?

NORTH bid much too strongly to have no Aces. SOUTH bids a confident 6♠, knowing NORTH has either three Aces or two Aces plus the ♠K.

With eleven cards in the "round" suits SOUTH has a lot of playing strength. So when NORTH bids a Limit Raise in ♥s SOUTH wants to know about Aces.

RKCBlackwood tells him that NORTH has two Aces plus the trump Queen, so SOUTH can see that 6♥ is practically a certainty.

SOUTH has interest in slam after she hears NORTH's Limit Raise. BUT, she should not use Blackwood holding two quick losers in the ♦ suit.

Instead she makes a Control showing bid of 4♣.
(Not Gerber since it didn't follow a NT bid.)

NORTH cooperates by making a Control bid of 4♥.

SOUTH stops at 4♠ because neither partner controls ♦s.

NORTH decides it is unlikely that SOUTH is Aceless, so all he wants to know is the number of Aces SOUTH does have. He invokes RKC Blackwood.

Since no trump suit has been agreed, SOUTH bids as if ♦s, the last-bid suit prior to 4NT is agreed. SOUTH has two Key-cards plus the trump Queen, so she bids 5♠.

NORTH bids 6♦. If SOUTH had just one Key-card, NORTH would bid 5♦ over the 5♣ reply.
