3NT by South

Lead: ♥3

the ♠K.

East returns a ♥.

West follows and dummy plays the ♥6.

West plays the ♠J.

The ♠Q wins the trick. If the ♠Q wins, take your 9 tricks and run.

Although this doesn't look like a normal A Q finesse it really is about the same.

Whenever the ♠A and ♠K are in different hands, the only thing that matters is the location of the ♠J.

So it is basically a 50% chance.

South is to play 3NT. West leads the ♥3, dummy plays the ♥4 and East the ♥J.

Winners: ♠=0 ♥=2 ♦=2 ♣=4 Total = 8

First things first. Win the first ♥, do not hold up. West's ♥3 indicates he has led a 4-card suit so a hold-up wouldn't help you. And if you did hold up they might pocket their ♥ trick and switch to ♦s, a suit you are no better off in.

You need to get one more winner and it will have to be a ♠ winner.

West plays low.

You could lead toward the ♠Q, winning a trick if West holds BOTH the ♠A and ♠K. Or you could finesse the ♠10, gaining a trick if West holds the ♠J. The second is more likely. Suppose East wins

4♠ by South			
Lead: ♦ 2			

South is to play 4♠. West leads the ♦ 2. The defenders win 3 ♦ tricks, then play a ♣.

Losers: ♠ = 0 or 1 ♥ = 0 ♦ = 3 ♣ = 0 Total = 3 or 4

Since you have already lost 3 ♦ tricks you cannot also lose a ♠ trick. That means East will have to have the ♠K and it also means that you will have to be careful with your finessing.

You are in your hand, having won the ♣ switch.

West plays low.

Over to dummy's ♥ A.

You lead the ♠Q from dummy and East plays low.

The ♠Q from dummy, and the ♠J (or 10) from your hand when East plays low.

The ♠Q held the trick so you are still in dummy.

East doesn't cover.

The ♠9, playing your ♠8 under it. West shows out on this trick and you are glad you played so carefully. Play one more ♠, finessing East's ♠K again, then play your ♠A and the rest of your winners.

If you had played the ♠Q and carelessly followed with the ♠8 on your first finesse you would have gone down. You would have had to win the second finesse in your hand and would have no dummy entry to let you take the third finesse.

True, the chances of East holding 4 ♠s to the King are pretty small, but it costs you nothing to protect yourself against that holding.

And the rewards are great.

Lead: ♥ 7			

South is to play 3NT. West leads the ♥ 7. East takes the ♥ A and returns the ♥ 2.

Winners: ♠=3 ♥=1 ♦=3 ♣=1 Total = 8

You need one more winner and ♣s is your best suit. If the ♣K is in West's hand you can finesse it for 12 tricks. But if the ♣K is in East's hand you will lose that trick and at least 4 ♥s.

Before you put all your eggs in the ♣ finesse basket there is one thing you should do first.

West plays low.

You test the ♦ suit: a small one to dummy's ♦ Q, then the ♦ K and ♦ A.

Both defenders followed three times, so your last ♦ is a winner.

You cash it.

Now you have a problem. You have won 5 tricks so far and you have 4 more winners ready to take. So you can take your 9 tricks and run, or you can finesse the ♣ trying for 3 overtricks.

It's your decision, but

At Rubber Bridge or Team play it would probably be foolish to risk your contract for the sake of three overtricks.

But at Match Point Pairs the reward would be much greater, a probable very high board. Of course with this layout it might have gotten you a bottom board.

Lead: ♥ Q			

South is to play 3NT. West leads the ♥ Q, dummy plays the ♥ 2 and East the ♥ 6.

Winners: ♠=1 ♥=2 ♦=1 ♣=3 Total = 7

You need two more winners and ♦ s is your longest combined suit. But you can only establish one extra winner in ♦ s, and before you could even do that the defenders would have taken a bunch of ♥ tricks.

So you must turn to the ♠ s for the extra two winners.

You won the first ♥ .

West plays low.

Which ♠ was right? If you play the ♠ Q you will go down, even if West has the ♠ K. He would cover and you would be held to just 2 ♠ tricks.

The only way to get 3 tricks from this holding is to play East for the ♠ K. So play a ♠ to dummy's ♠ A and then a small ♠ back toward your ♠ Q J.

East puts on the ♠ K.

You are home-free.

You were a little lucky that East's ♠ K fell on the second round.

If it had not dropped you would just have played a third round of ♠ s, hoping for a 3-3 split in the suit.

You could also have gotten 3 ♠ winners with this distribution.
