3NT by South

Lead: ♥Q

South is to play 3NT. West leads the ♥Q, dummy plays the ♥4 and East the ♥2.

Winners: ♠=0 ♥=2 ♦=4 ♣=1 Total = 7

Needing two more winners you will have to make both the ♠K and ♠Q. This will only be possible if West holds the ♠A. Win the first trick (if you don't West might switch to ♣s).

West plays low.

A small ♠ toward dummy's honours, and it holds the trick.

You should take your four ♦ winners now, being sure to end up in your hand.

West plays low again.

Another small ♠ toward dummy's remaining honour. This also wins.

You have now won 7 tricks so don't mess around now. Take your two Aces and let them have the last four tricks.

If East held the ♠A you would not have made the contract.

A Simple Finesse has only a 50% success rate. That's why we only take finesses as a last resort.

Lead: ♦ 3			

South is to play 3NT. West leads the ♦ 3.

East plays the ♦ 10 and you the ♦ 2.

Winners: ♠=1 ♥=5 ♦=1 ♣=1 Total = 8

You need just one more winner. Since West probably has 4 ♦s you will not be able to establish a trick in that suit, so your only hope is the ♠Q. You win the first ♦ so they don't get a chance to switch to ♣s, a suit you are worse off in. Then take your 5 ♥ tricks, ending in dummy.

You can't put it off any longer.

East plays low.

A small ♠ from dummy, putting the ♠Q on. If it wins you will make your contract, if it loses you won't.

East held the ♠K so you were lucky this time.

But remember, finesses only work half the time. The other half they lose.

Lead: ♥Q			

South is to play 3NT. West leads the ♥Q, dummy plays the ♥2 and East the ♥3.

Winners: ♠=0 ♥=2 ♦=2 ♣=4 Total = 8

Needing one more winner you should see right away that it cannot come from ♥s, ♦s, or ♣s. That means you must hope that East has the ♠A. Win the first ♥, then play your 4 ♣ winners ending in dummy.

The moment of truth.

East plays low.

A small ♠ from dummy, and the ♠K when East plays low.

Unfortunately West takes your ♠K with the ♠A. He then plays another ♥ and you at least make 8 tricks but have no hope for a ninth one so you go down 1.

You probably thought since these Deals were all about finesses that they would work all of the time.

Welcome to the real world.

4 ♥ by South			
Lead: ♠ K			

South is to play 4♥. West leads the ♠K, dummy plays the ♠2 and East the ♠5.

Losers: ♠=2 ♥=1 ♦=0 ♣=1 Total = 4

West found the best opening lead for his side, exposing your ♠ losers before you could establish the ♣ suit for a discard. If you start to pull trumps right away the defense will grab the ♥A, then take their two ♠ tricks and you will still have the ♣A that you cannot avoid.

Other than the ♦A the only useful card in dummy is the ♦Q so you must try to make a winner out of that for a discard.

You won the ♠A.

West plays low.

Win the ♠A, lead your singleton ♦ and finesse the ♦Q. Your luck has returned, the ♦Q wins.

Dummy leads the ♦A and East follows.

You discard one of your ♠ losers on the ♦A.

At this point you have not lost any tricks, and you can see that you have only 3 losers remaining in your hand. So you start pulling trumps and establishing the ♣s.

If the ♦ finesse had lost you would have gone down 2 instead of just one.

The risk was worthwhile though since it gave you your only chance of making the contract.

Lead: ♠ 3

South is to play 6NT. West leads the ♠ 3.

Winners: ♠=4 ♥=1 ♦=5 ♣=1 Total = 11

You need one more winner from the ♥ or ♣ suit.

The straight finesse of the ♥K offers a 50% chance of success. The double finesse of the ♣ K Q offers a 75% chance of success. It's a no-brainer. Run 4 ♠s and 5 ♦s ending in your hand. Be very careful not to discard a ♣ from your hand.

You have run the ♠s and ♦s and are in your hand.

West plays low.

A small ♣, playing the ♣10 (or ♣J) when West plays low: the first of your two ♣ finesses. Let's say East wins the ♣K and returns a ♥.

East returns the ♥J.

DO NOT FINESSE THE ♥. Stick with your original 75% plan. Take the ♥A and play your small ♣, finessing the ♣J. This is why you couldn't discard a ♣ earlier.

The single ♥ finesse is an inferior play because its success depends on East holding a specific card, the ♥K.

The double ♣ finesse is much better because its success depends on West holding either of two cards, the ♣Q **OR** the ♣K.

4♠ by South

Lead: ♦K

East plays low.

At first you might think it makes no difference but, in fact, there is only one reasonable choice. If you finesse the ♠K successfully you may still have a ♠ loser. If you finesse the ♥K successfully you will surely still have a ♥ loser. But if you finesse the ♣K successfully you will eliminate your ♣ loser.

What a great layout! Three possible finesses and every one of them would work.

But as you can see, only the ♣ finesse will actually save you a trick.

South is to play 4♠. West leads the ♦K.

East plays the ♦2 and you the ♦4.

Losers: ♠=1 ♥=1 ♦=1 ♣=1 Total = 4

West has made another great lead. Any other suit would have given you a free finesse. You should duck the first ♦. It is very possible that West has led from ♦K Q 10 and will be afraid to continue for fear you have the ♦J in your hand. You'd be very happy to see him switch to any other suit. But he doesn't.

West continues with the ♦Q.

You take it with dummy's ♦A.

You are in dummy for the first, last, and only time. You need to try a finesse right now, but which one?
