defenders will win, (you don't care which), and will be end-played.

The defender who won the last trick cannot lead a trump because he has none. If he leads a ♥ or a ♣ you will get a ruff-sluff, ruffing in one hand while discarding a ♦ loser from the other. If he leads a ♦ you will get the free finesse you were hoping for all along.

If you finesse East for the ♦ Q you make the contract, but if you finesse West for that card you go down.

With an elimination play you make it no matter who holds the Queen.

North's 3 ♠ bid is a limit raise showing 10-12 points and good trump support. South is to play 6 ♠. West leads the ♥ Q.

This ♦ holding is the first example shown in the introduction.

With one certain ♥ loser you cannot afford to lose a ♦ also. You could guess which way to finesse and be correct half of the time. But an elimination play will work ALL of the time.

Win the first trick and play ♠ A, ♠ K. Trumps split 2-1.

Next play three rounds of ♣s to eliminate that suit from both your and dummy's hand.

With all the eliminations completed you are ready for the throw-in. Lead a ♥ from either hand. One of the

4 ♠ by South

Lead: ♥ Q

South is to play 4 ♠. West leads the ♥ Q.

This ♦ holding is the second example shown in the introduction.

This should remind you a lot of Deal 1. This time you have 1 ♥ loser and 3 ♦ losers. If you can force the opponents to lead ♦s you can make a trick with the ♦ Q or ♦ J, avoiding one of those losers.

Win the first trick and play ♠ A, ♠ K. Trumps split 2-1.

Next play three rounds of ♣s to eliminate that suit from you and dummy.

The eliminations are complete and it is time for the throw-in. Play the small ♥ from whichever hand you are in. This will be taken by one of the defenders.

No matter which defender wins the ♥ he is end-played. A ♥ or a ♣ will give you a ruff-sluff, but if he leads a ♦ you cannot be prevented from establishing either your ♦ Q or ♦ J as a winner.

If you try to make a ♦ trick on your own you will fail. The first defender will play "second-hand-low" and the other defender will take your ♦ Q (or ♦ J).

Only by forcing them to start the ♦s can you take a trick in the suit.

a ♣ without handing you the contract by way of a ruff-and-sluff. So he must lead a ♦. Suppose it is West who leads the ♦. You play low in dummy and East must play either the ♦Q or ♦J to keep you from getting a cheap trick with your ♦9. So you take East's honor with your ♦A and then finesse West for the other honor. As long as the ♦Q and ♦J are in different hands the elimination play will succeed.

Against good defenders there is no way you can make all three ♦ tricks if you make the first play in the suit. This assumes that if one defender held both the ♦Q and ♦J he would "split" the honors if you tried to lead through them.

By forcing them to start the ♦s you make three tricks when the two outstanding honors are divided.

South is to play 6 ♠. West leads the ♥Q.

This ♦ holding is the third example shown in the introduction.

This is another follow-up to Deal 1. But this time you are missing both the ♦Q and ♦J. In this case an Elimination play doesn't give you a guarantee, it just improves your odds.

Win the first trick and play ♠A, ♠K. Trumps split 2-1.

Play three rounds of ♣s to eliminate the suit from you and dummy.

Now execute the throw-in by leading a ♥ from either hand.

The defender who gets thrown in cannot play a ♥ or

4 ♥ by South

Lead: ♦ J

will always be a luck factor.

South is to play 4 ♥. West leads the ♦ J.

With three unavoidable ♠ losers you cannot afford to lose a ♣. So you either have to guess the location of the ♣Q or (DRUMROLL) pull off an elimination play! Win the ♦ K, then pull trumps, it takes two rounds.

Next you eliminate the ♦ s by playing ♦ A then ruffing the ♦ 8.

Execute the throw-in by leading a ♠.

The defense is in with a ♠ and they are welcome to take two more ♠ s. But then they will have to play a ♠ or a ♦, giving you a ruff-sluff, or else lead a ♣ which finds the ♣Q for you.

Using elimination plays makes you a better player. But in Bridge, no matter how skillful you are, there

Here you were lucky the defense didn't start by taking their three ♠ s. If they had, you would not have been able to pull off the throw-in, and would have had to try your luck with guessing who had the ♣Q.

South is to play 4 ♠. West leads the ♦ J, covered by the ♦ Q and ♦ A. East returns a ♦ to the ♦ K.

You still have two losers in the ♥ suit, so the question is which way you plan to finesse the ♣s. And of course the answer is that you don't plan to finesse them at all!

Pull trumps with the ♠ A, then ♠ K. Next ruff dummy's last ♦.

Now exit with a ♥. The defenders win this and take another ♥ trick, leaving this position.

They must now break the ♣ suit for you or give you a ruff-sluff. Of course you would ruff in dummy and discard a ♣ from the 3-card holding in your hand.

If East is the one who has to play a ♣ you just let it ride around to dummy's ♣ K J 10 3.

If West is the one who has to play a ♣ you need to insert the ♣ 10 or ♣ J from dummy.

In either case you will no longer have a ♣ loser.

| Lead: ♦ Q    |       |      |       |

Now eliminate ♥s by playing ♥A, ♥K, and ruffing a ♥.

You are ready for the throw-in. Play a ♠ to East's ♠Q.

East has just taken the defender's first trick. First and only. Because if he now plays a red card you will ruff in one hand and discard a losing ♣ from the other. And if he plays a ♣ you will no longer have a ♣ loser.

Most elimination plays work on the same principle. The biggest difference is usually the technique you have to use to complete the eliminations.

Here it took two ruffs, one in each hand.

North decides a limit raise is better than just jumping to game. South has heard enough and bids the slam.

South is to play 6 ♠. West leads the ♦Q.

Your first thought is probably that if you can guess the ♣Q you will make all thirteen tricks.

So you win the ♦K and play a ♠ to your ♠K. When West discards a ♦ your second thought is probably that you **MUST** guess the ♣Q just to make twelve tricks.

Hopefully your third thought is that if you use an elimination play you won't have to guess.

Play your ♠A, leaving East with the master ♠Q. Then eliminate ♦s by playing ♦A and ruffing a ♦ in dummy.
