Lead: ♣ A

You are East. The bidding has been as shown.

Partner led the ♣ A, dummy played the ♣ 2

Play the ♣ 3.

If you signal with the ♣ 9 West will continue with the ♣ K and another which you will have to ruff. You will give up your NATURAL trump trick by doing so. Worse, you will allow North's ♣ J to be established as a winner that South can later discard a ♦ on.

Much better to play low. Partner will surely switch to a ♦, and South will probably finesse, though it doesn't matter whether he does or not. You will win the ♦ K, return the ♣ 9 back to West's ♣ K, and still have your trump trick for later.

Lead: ♠ A

You are West. The bidding has been as shown. You led the ♠ A, East plays the ♠ 9, South the ♠ 5. You assume East has signaled you to continue ♠ s, so you play the ♠ Q. On this trick East plays the ♠ 3 and South the ♠ 8. How will you continue?

You know that both East and South are now void of ♠ s. You might just switch suits, but you have a better choice.

If you play your ♠ Q, East won't bother ruffing, South **WILL** ruff and dummy's ♠ J will be established as a winner.

The best procedure is to lead a low ♠ . East will ruff and South will over-ruff but by playing this way you stop the establishment of North's ♠ J. As you can see, South would have been able to discard a loser on that ♠ J if you hadn't played this way.

he started with three. A little bit of counting tells you that South started with the doubleton Jack, so you want to win the second ♦ trick.

This defense holds South to one ♦ tricks, if you had let him win the second one he would have had 9 tricks.

You are East. The bidding has been as shown.

Partner led the ♥Q, you played low and South won the ♥A.

South now plays the ♦J on which West plays the ♦2. What do you play now, and what is your plan.

Play the ♦3 and when South plays another ♦ win with your ♦A.

North hoped his ♦ suit would provide enough tricks to make the game. You can see that there is no entry to the North hand EXCEPT in ♦s, so you want to win your ♦A on the trick that South plays his last ♦. How can you tell which trick that is?

Only by watching what West plays. On the ♦J West played the ♦2, a low card signaling that he held an ODD number of ♦s. ODD must be either one or three so when he followed to the next ♦ you know

Lead: ♥ 4			

You are West. The bidding has been as shown. You led the ♥ 4, East plays the ♥ J, won by South with ♥ A.

South plays the ♠ J, you follow with ♠ 5, dummy ♠ 3 and East plays the ♠ 2. South continues with the ♠ 10

Play the ♠ 6.

East's ♠ 2 tells you he had an ODD number of ♠ s, obviously 3. Since South also must have 3, you must take your ♠ A on the third round, depriving dummy of the extra ♠ trick.

South may now turn to the ♦ suit, but your side can win the first ♦ and drive out South's ♥ K. You will win 2 ♥ s, 2 ♦ s and the ♠ A, down 1
