Lead: ♠ A			

You are East. The bidding has been as shown. You led the ♠ A, West plays the ♠ 9, North the ♠ 5. You assume West has signaled you to continue ♠s, so you play the ♠ Q. On this trick West plays the ♠ 3 and North the ♠ 8. How will you continue?

You know that both West and North are now void of ♠s. You might just switch suits, but you have a better choice.

If you play your ♠ Q, West won't bother ruffing, North **WILL** ruff and dummy's ♠ J will be established as a winner.

The best procedure is to lead a low ♠. West will ruff and North will over-ruff but by playing this way you stop the establishment of South's ♠ J. As you can see, North would have been able to discard a loser on that ♠ J if you hadn't played this way.

know he started with three. A little bit of counting tells you that East started with the doubleton Jack, so you want to win the second ♦ trick.

This defense holds East to one ♦ tricks, if you had let him win the second one he would have had 9 tricks.

You are North. The bidding has been as shown.

Partner led the ♥Q, you played low and East won the ♥A.

East now plays the ♦J on which South plays the ♦2. What do you play now, and what is your plan.

Play the ♦3 and when East plays another ♦ win with your ♦A.

West hoped his ♦ suit would provide enough tricks to make the game. You can see that there is no entry to the West hand EXCEPT in ♦s, so you want to win your ♦A on the trick that East plays his last ♦. How can you tell which trick that is?

Only by watching what South plays. On the ♦J South played the ♦2, a low card signaling that he held an ODD number of ♦s. ODD must be either one or three so when he followed to the next ♦ you know that East started with the doubleton Jack, so you

Lead: ♥ 4			

You are West. The bidding has been as shown. You led the ♥ 4, East plays the ♥ J, won by South with ♥ A.

South plays the ♠ J, you follow with ♠ 5, dummy ♠ 3 and East plays the ♠ 2. South continues with the ♠ 10

Play the ♠ 6.

East's ♠ 2 tells you he had an ODD number of ♠ s, obviously 3. Since South also must have 3, you must take your ♠ A on the third round, depriving dummy of the extra ♠ trick.

South may now turn to the ♦ suit, but your side can win the first ♦ and drive out South's ♥ K. You will win 2 ♥ s, 2 ♦ s and the ♠ A, down 1

plays his ♣2 and you win 4 tricks.

You are South. The bidding has been as shown.

Partner led the ♥5, dummy played the ♥10

Play the ♦3 (or the ♠2).

You really want North to lead a ♣ if he gets into the lead. If you discard the ♣9 North will surely get the message and will lead a ♣. BUT - you will only win 3 ♣ tricks. The ♣9 would have been the fourth winner.

So instead, play a low card in one of the other suits, say the ♦3.

West is one trick short and he sees he can easily get that trick in ♥s. So he plays a second ♥ from dummy and you now discard the ♠2. North takes the ♥A and he can see that you don't want him to lead a ♠ or a ♦. He deduces that you might like a ♣ so he

Lead: ♥4			

You are East. The bidding has been as shown. You led the ♥4, West takes the ♥A and returns the ♥3. You ruff and then play what???

Play a low ♣.

Partner played the ♥3, a low card, for you to ruff. That means his re-entry, if he has one, is in the lower-ranking suit.

Partner takes the ♣A and gives you a second ♥ ruff.
