The bidding has been as shown. Partner led the ♥Q, dummy played the ♥4

Play the ♥K.

Admittedly you have a terrible hand. But that's no reason to be careless. **YOU** can beat this contract, but you have to do it right now by unblocking the ♥K. If declarer holds up you will continue with your ♥7 and partner will establish his suit while he still has the ♣A for an entry. If declarer doesn't hold up it will be just as bad for him.

But suppose you say "Well, partner's ♥Q is just as good as my ♥K so I'll just save the King for later" as you play low. Declarer will love you. He will hold up on the ♥Q, then again on trick two when you play the ♥K. AND HE WILL STILL HAVE HIS ♥A when you switch to another suit. He will have time to drive out the ♣A while he still has ♥s stopped.

It was a good thing you held the ♥K rather than declarer, but it is a nuisance that you must get out of the way on the very first trick.

The bidding has been as shown. Partner led the ♥ 2, dummy played the ♥ A

Play the ♥ Q (or ♥ K).

You know partner has a 4-card ♥ suit, (he led the deuce), and you know it is headed by an honor. You hope the honor is the ♥ J, but in any case you must get your high ♥ s out of the way.

Declarer will probably come to his hand and then take a ♠ finesse. You win the ♠ K, take your other high ♥ , then lead your ♥ 3 toward your partner.

As you see, partner did hold the ♥ J 9, so your side wins 3 ♥ tricks.

If declarer played low on the first trick you would win the ♥ Q, then play the ♥ K to dummy's ♥ A.

Lead: ♠ 5

able to cash his last ♠.

The bidding has been as shown. Partner led the ♠ 5, dummy played the ♠ 2

Play the ♠ 7.

Partner's low ♠ lead tells you he has an honor in the suit, so it must be either the ♠ Q or the ♠ 10. South's jump to 2NT makes it almost certain that he holds the ♠ Q, so you can figure partner probably led from ♠ 10 x x 5.

Apply the Rule of 11. 11 minus 5 = 6 cards higher than the ♠ 5 held by dummy, you, and declarer. Since you can see 5 of the 6 you conclude that that declarer will have to play his ♠ Q to beat your ♠ 7.

South will take the ♠ Q at trick 1, but when West wins a high ♥ he will play another ♠ through dummy's ♠ K 9 to your ♠ A J. Once you clear dummy's ♠ away partner will win another ♥ and be

Note that if dummy's ♠ 9 was played you would cover with your ♠ J, leading to the same situation.

Lead: ♥5

The bidding has been as shown. Partner led the ♥5, dummy played the ♥8

Play the ♥Q.

The Rule of Eleven tells you there are 6 cards in North, East and South that are higher than the ♥5. You can see 5 of them, so that leaves just one of them for South.

West cannot have all three of the outstanding honors, because from ♥K J 10 x x his correct lead would be the Jack. So you can deduce that South must hold exactly one of ♥K, ♥J, or ♥10.

If his honor is not the ♥K then it won't matter whether you play ♥A or ♥Q to the first trick; you will win your two top cards and then play your small one back to West.

So assume South actually holds the ♥K x x. If you play the ♥A to trick one, then lead ♥Q, South will hold up on the second trick, and win the third ♥. Then, when you win your ♣K you will not have a ♥ to return to partner and declarer will make the contract.

So what happens if you play the ♥Q at trick one? South could still make the contract by holding up, **but he will be afraid to do so**. After all, from his perspective it looks like West probably holds the ♥A and he will be afraid of losing the first 5 ♥ tricks, perhaps even when the ♣K finessing is working!

Overtake with the ♥K.

Your side needs to take 5 tricks to defeat this contract. Two of them will be ♥s, but it doesn't look like you can win any ♣s or ♠s.

That means you need to win 3 ♦ tricks and the only way that can happen is if you play ♦s from your side.

So win the first ♥K (so partner will know you also have the ♥A), and play the ♦10. Presumably South will play an honor, but West will take the trick and put you back on lead with your ♥A. You play the ♦9 and your side will collect 3 ♦ tricks to go with your 2♥s.

Lead: ♠ A

through South's ♣ K at trick 3.

The bidding has been as shown. Partner led the ♠ A, then the ♠ K. Dummy follows suit and it is your play to the second trick.

Ruff partner's ♠ K.

It is obvious that your side can only get 2 ♠ tricks. And assuming that South has the Ace of trumps you will not make a single trick in the red suits. So you need to make 2 ♣ tricks.

If partner has the ♣ A K then he will take them, but if he has the ♣ A J he cannot win 2 ♣ tricks from his side.

To allow for this situation it will be better to play ♣s from your side of the table, and the way to make that happen is for you to ruff partner's ♠ K with an otherwise useless trump. You still get your two ♠ winners (sort of) but now you get to play a ♣
