EAST has an ideal 1NT opening - 15 points and balanced distribution.

With 12 points, WEST knows the partnership total is between 27 and 29, enough for game but not enough to think about slam. Since WEST has no 4-card Major suit she bids 3NT.

With 6 points, SOUTH must respond to NORTH's 1♣ opening bid. While it is often correct to respond by bidding suits "up-the-line", SOUTH should skip over the weak ♦ suit in favor of showing the 4-card Major ♠ suit.

NORTH knows that SOUTH may only have four ♠s, but with four of her own she can support the suit. Since she has a minimum opening bid she merely raises to 2♠. With his minimum response hand SOUTH passes.

WEST has good 4-card support and 7 points, so she raises to 2♠, passed by EAST.

With balanced distribution and 16 points SOUTH should open 1NT rather than 1♦.

NORTH's response is based on simple math. He adds his 18 points to the 15 minimum that SOUTH has announced and comes up with 33 points combined. This is enough for a small slam, and since he has balanced distribution he bids 6NT.

NORTH has a minimum 1♠ opening bid - 13 points and five trumps. She doesn't even suspect what's about to befall!

SOUTH hears the 1♠ bid and all he wants to know is whether NORTH has one, two or three Aces. So he uses the Blackwood convention, 4NT.

NORTH has two Aces so she bids 5♥ (5♣ would show zero Aces, 5♦ would show one Ace, etc).

SOUTH has heard enough and bids 6♠.

WEST has a maximum 17 point 1NT bid.

EAST, with 16 points, can't tell if there are enough points for slam. If WEST has 17 points then a slam should be makeable, but if WEST has only 15 points then he should settle for game.

The 4NT raise solves the problem. It tells WEST to bid 6NT with 17 points, pass with 15 points, and use best judgment with 16. Here WEST bids the slam.
