Winner List: ♠ = 1 : ♥ = 2 : ♦ = 3 : ♣ = 0 :: Total = 6

You need 3 more tricks, and they must come from ♣s. So you must drive out the ♣A. The problem is that when the defenders win the ♣A they may also take 4 ♠ tricks.

While you cannot guarantee the contract you can at least give yourself a better chance by holding up your ♠A on the first trick, and also on East's ♠ continuation. You win the third ♠ with your ♠A. [NEXT]

Now you drive out the ♣A. There are four possibilities: West may win the ♣A and cash two more ♠s, down 1. West may win the ♣A and cash just one ♠s, you make it. East may win the ♣A and have a fourth ♠ to lead, you make it. East may win the ♣A and be out of ♠s, you make it.

Click NEXT to see the full deal. [NEXT]

[RESET]

[show NESW]

[clear-commentary]

If you win the first or second ♠ trick you will fail. When you attack ♣s, East will win the ♣A and play a ♠.

Holding up twice can never hurt, and in this case it is the only way to make the contract.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3NT]

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 3 : ♥ = 0 : ♦ = 1 : ♣ = 1 :: Total = 5 Count losers in the long-trump hand, (dummy this time).

You can make the contract if you just force out their big trumps. But there is another tempting possibility. You could enter dummy with the ♦K and play the ♥4, finessing East for the ♥K. If the finesse is successful you could then discard dummy's ♣ loser on the ♥A.

Should you or shouldn't you? [NEXT]

The reward for this play would be an overtrick. The price of failure would be going down in a cold contract. So obviously, at rubber bridge, you would be foolish to take such a risk. Playing Duplicate though, you **might** consider it. But let's say you decide to play safe. [NEXT]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♥]

West leads ♥5, East plays the ♥Q.

The first thing you need to decide is whether to hold up on the ♥.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 1 : ♦ = 2 : ♣ = 5 :: Total = 8

First decide the holdup question. West led the ♥5 and you can see the ♥4, ♥3 and ♥2. Assuming West led fourth down he must have only a 4-card suit since there are no cards he could have lower than the ♥5. With ♥s splitting 4-4 a holdup would do no good, and isn't necessary anyway.

So take the ♥A. Then what? [NEXT]

You COULD try the ♦ finesse. Even if it loses it would establish several ♦ winners. However, if the defenders win just 1 ♦ trick they will quickly grab their 3 ♥ tricks and their ♠A and put you down 1. [NEXT]

This is why it is important to make a Plan which includes a Winner count. You need just one additional winner and all you have to do to get it is play a ♠ honor.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3NT]

[show NS]

Even if you wanted to show your ♦ suit how would you do it? If you bid 3♦ it would be a transfer and if you bid 4♦ you would have bypassed 3NT, your probable best contract.

But you didn't want to bid them anyway, you just wanted to bid 3NT, right?

South plays 3NT. West leads the ♥J.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 3/4 : ♦ = 2 : ♣ = 2 :: Total = 7/8

West's ♥J lead probably means ♥s won't be 3-3, so you will need to get 2 ♠ tricks.

Suppose you win the first trick and plunk down the ♠Q. If East wins with a doubleton ♠ honor you will only be able to win 1 ♠ since West will sit there with ♠ A 9 or ♠ K 9 behind your ♠ J 10. [NEXT]

Instead, win the first trick in dummy and play a small ♠ toward the ♠ Q J 10. East will play low and West must take his ♠ honor. But you can win his return, enter dummy and play another ♠ toward your hand. If you are lucky, East will be forced to play an honor and you can toss your ♠5.

to see if you were lucky. [NEXT]

[show NESW]

[clear-commentary]

This plan, leading toward your ♠ holding twice, will succeed the majority of the time.

It only fails if West holds 4 or more ♠s headed by A K.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♠]

In response to partner's Stayman bid you show your 4-card ♠ suit. Partner now bids 2NT. What do you say? [BID 3NT]

[show NS]

In response to partners Stayman bid you show your 4-card ♠ suit. Partner now bids 2NT. What do you say?

You may disagree with the Stayman bid on 3-4-3-3 distribution. In any case, 2NT is invitational, so with 17 points you say 3NT.

[clear-commentary]

South plays 5♦. West leads the ♠Q.

You may be wishing partner had said 3NT. But at 3NT West might have led a ♥, then you'd be wishing you were in 5♦.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 0 : ♦ = 1 : ♣ = 0 :: Total = 2

This looks so easy let's check it by trying a winner count as well. Five ♦s (after ♦A is gone), the ♠ A K, the ♥A and the ♣ A K Q. Yes that adds up to 11 winners.

Is there ANY danger here at all? [NEXT]

Whenever a hand looks easy you should ask yourself what could go wrong. And here the only thing that could go wrong is if one of your ♠ winners gets ruffed. So how can you prevent that possibility? [NEXT]

If East has a singleton ♠, and West has the ♦A you might go down if you win the first trick in your hand. West will take his ♦A and play the ♠J. If you go up with dummy's ♠K East will ruff and you will still have a ♠ loser.

The simple solution is to win the first trick with dummy's ♠K. Now when West wins the ♦A and leads another ♠ it's a different situation. East may well ruff, but if he does you will just play a low card - East will have ruffed your ♠ **LOSER**.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3♦]

Partner's 3♣ bid is Stayman; with no 4-card Major you respond 3♦. Partner now bids 4♦. What do you bid? [BID 5♦]

[show NS]

Partner's 3♣ bid is Stayman; with no 4-card Major you respond 3♦. Partner now bids 4♦. What do you bid?

Partner wouldn't bypass 3NT unless he was pretty distributional. His bid is invitational and you have excellent ♦ help so you try 5♦.

This situation comes up a lot. You don't have enough points to advance partner's 1NT opening, but you have a "long suit" that might play better than notrump. If "long suit" is 6 ♥s or 6 ♠s then pretty clearly you should transfer partner to that suit and then pass. But with only 5 of the Major it is tougher to say that 1NT would be an inferior contract. Here's a suggestion - with fewer than 9 points and a 5-card Major, transfer to that suit when you have a singleton or void, otherwise pass 1NT. So here you bid 2♦ and partner says 2♥. What do you bid now? [BID pass]

[show NS]

This situation comes up a lot. You don't have enough points to advance partner's 1NT opening, but you have a "long suit" that might play better than notrump. If "long suit" is 6 ♥s or 6 ♠s then pretty clearly you should transfer partner to that suit and then pass. But with only 5 of the Major it is tougher to say that 1NT would be an inferior contract. Here's a suggestion - with fewer than 9 points and a 5-card Major transfer to that suit when you have a singleton, pass with no singleton. So here you bid 2♦ and partner says 2♥. What do you bid now?

Of course you pass, that was the whole point of the transfer.

[clear-commentary]

Loser List: ♠ = 3 : ♥ = 2/3/? : ♦ = 1 : ♣ = 3 :: Total = lots

In suit contracts it is usual to count losers. Sometimes in low level suit contracts it makes things clearer if you count winners. Here you have 4 high card winners in your hand plus the Ace of trumps in dummy.

Your plan will therefore be to make as many of dummy's small trumps as you can. [NEXT]

[clear-commentary]

South plays 4♠. West leads the ♦Q.

If you had left it in 3NT you'd have 8 top tricks and a ♠ finesse for 9.

But you're in 4♠. Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 0 : ♦ = 1 : ♣ = 2 :: Total = 4

If you can guess the ♠Q your problems are over. But just in case you dislike those 50% guesses, try to find a better Plan. [NEXT]

Another possibility is that a defender holds either a singleton or doubleton ♠Q so you can pick up the suit by leading ♠ A K. This is smaller than a 50% chance. [NEXT]

But there is more to the odds than that. Suppose you try the second possibility and play off both the ♠A and ♠K but the ♠Q does **NOT** drop. You are still not dead! You just leave the ♠Q out there and start on ♥s. As long as the defender who holds the ♠Q has at least 3 ♥s he will be unable to ruff until after you have discarded dummy's ♦ loser.

The extra chance makes this Plan your best hope.

Click NEXT to see which plan works. [NEXT]

[show S]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID double]

Sometimes the opponents make overcalls which disrupt the smooth flow of your side's bidding. You and your partner need to have ways of dealing with these disruptions. One possibility is the **lebensohl** convention which is used a few times in these 100 Deals. There are lots of other methods out there, and you may not care for lebensohl. One of the big reasons we use it is that it includes a penalty double - some other methods use the double for other reasons.

So, in lebensohl an immediate double of their overcall of partner's 1NT opener is for penalties. Just

6NT by South
[clear-commentary]

South plays 6NT. West leads the ♥J.

East plays the ♥A and returns the ♥3.

Make a Plan, then click NEXT. [NEXT]

Winner List: ♠ = 4 : ♥ = 1 : ♦ = 2 : ♣ = 4 :: Total = 11

One trick is already lost and at first glance it looks like your only slim chance will be for the ♦ Q J to fall doubleton.

But a dummy has a very important card, the ♥9. You know from the opening lead that West holds the ♥10, so if he happens to hold the only guard in ♦s you will be able to squeeze him in the red suits. [NEXT]

You don't even have to do anything special. Play your 4 ♣ winners, then 3 ♠ winners. [NEXT]

Now play the ♠J and watch West's discard. If he throws the ♥10 dummy's ♥9 will become a winner. If he doesn't throw the ♥10 then you know dummy's ♥9 is worthless so discard it and hope the ♦s are good.

Click NEXT to see. [NEXT]

4♥ by South			

South plays 4♥. West leads the ♠T.

Whatever you play, East takes the ♠ A K J and then plays a small ♣. West started with just one ♠.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 3 : ♥ = ? : ♦ = 0 : ♣ = 0 :: Total = ?

Don't let that Question Mark by the ♥ losers mislead you - if you are going to make this contract you cannot lose a ♥ trick at all! Is there any hope? [NEXT]

The odds aren't good, but you actually have **TWO** possibilities for success. If West holds the singleton ♥K, you can play a small ♥ to dummy's ♥A, dropping the ♥K, then finesse East out of his ♥J. Or, if East holds the singleton ♥J you can play your ♥Q, finessing West for the ♥K and at the same time smothering East's ♥J.

Which basket will you put your eggs into? [NEXT]

The answer is simple Bridge math! East started with 6 ♠s leaving him 7 cards outside the ♠ suit. West started with just 1 ♠, leaving him with 12 cards outside the ♠ suit. Obviously East is much more likely to have a singleton ♥ than West.

So you win the ♣A in your hand, play the ♥Q and let it ride if West does not cover.

Then you click NEXT to see how things turned out. [NEXT]

[show NESW]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3♥]

[show NS]

When partner opens 1NT, interference can easily gum up your smooth bidding sequences. Playing the lebensohl convention, your 3♥ bid shows a 5-card suit and is forcing to game.

It doesn't always work out so well, but here partner had an easy 4♥ bid.

[clear-commentary]

Winner List: ♠ = 4 : ♥ = 0 : ♦ = 2 : ♣ = 2 :: Total = 8

You need one more winner. Although the ♥ K is a possibility, there is a real danger of losing 4 tricks in the suit if West holds the ♥ A.

A much better idea is to try to establish a ♣ trick, a suit where you hold 8 cards. [NEXT]

You must give up one ♣ trick in order to establish a winner there. It is important that you give up that ♣ trick to West. East is the Danger hand because if he wins a ♣ he might lead through your precarious ♥ K. So win the first trick, enter dummy with a ♠ honor, and play a small ♣, finessing the ♣ 9 when East plays low. [NEXT]

West wins the ♣ J, but you win the game. West cannot profitably play ♥ s, so he will probably continue with another ♦. But since the ♣ Q will now drop under the ♣ A K you have your ninth trick.

for the complete deal. [NEXT]

South plays 3NT. West leads the ♥6.

First big decision. Which ♥ do you play from dummy?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 3 : ♣ = 2 :: Total = 8

The Rule of Eleven tells you there are 5 ♥s in North, East and South which are higher than the ♥6. You and dummy hold 4 of them so you can place East with just 1. The missing high cards are ♥ A J 10 9. Elementary, Watson; East must hold the ♥10 because from ♥ A J 10 6, ♥ A 10 9 6 or ♥ J 10 9 6 West would **NOT** have led the ♥6. So your first smart move is to play dummy's ♥Q, which holds the trick. What next? [NEXT]

You need to find one more winner and your best chance is the ♣ suit. You will need a 3-2 split in the suit, but you must establish the ♣ winner without letting East get the lead. East is the Danger Hand because he can play a ♥ through your ♥ K 7. Therefore it would be unwise to play ♣A, ♣K, then another ♣ because East is very likely to be the one with 3 ♣s. [NEXT]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♣]

With 12 points and a 4-card Major suit you automatically use Stayman; bid 2♣. Partner responds 2♦. What do you bid now? [BID 3NT]

[show NS]

With 12 points and a 4-card Major suit you automatically use Stayman; bid 2♣. Partner responds 2♦. What do you bid now?

You have plenty of points for game; with no 4-4 Major suit fit you bid 3NT.

South plays 3NT. West leads the ♠6; East plays the ♠J.

Your immediate problem is whether or not to hold up. ???

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 3 : ♣ = 1 :: Total = 8

There is some merit in a holdup. East is likely to have just 2 ♠s, so a holdup would exhaust his cards in the suit. If he later got the lead he would have no ♠s. On the other hand, East might well switch to ♣s, and that would certainly be unwelcome. Finally, if you do win the first ♠ you have another stopper if you can prevent East from getting the lead. So win the first trick with the ♠K. Notice that by winning with the ♠K you keep West in the dark as to whether you or East has the ♠Q.

You need just one more trick, and either red suit might split 3-3. So is that your plan? Lead out red winners and hope? [NEXT]

Truthfully, that wouldn't be a terrible plan. The chance of a 3-3 split in a suit is about 36%. But since you need either of two 36% chances that comes to almost 60% (if you aren't Math oriented don't worry about it, you can trust me).

There's a safer approach though; remember you only need 4 ♦ tricks, not 5. [NEXT]

There is a wonderful "safety play" that will practically guarantee your contract. Enter dummy with a ♥, then

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 0 : ♦ = 1 : ♣ = 2 :: Total = 4

There are lots of possibilities for getting rid of one loser. The ♠Q might drop, or she might be in the West hand, finessable. The ♥s might split 3-3, providing for the discard of a ♦ loser. West might hold the ♦Q so that finesse works.

Suppose you win the ♥ in your hand and try the ♠ finesse. If East has the ♠Q you will then have to find the ♥s splitting, which is not likely, or the ♦Q in the West hand. [NEXT]

A better plan would be to shun the trump Queen finesse entirely. Play the ♠K, then ♠A. If the ♠Q falls then pull the last trump and you are home free.

If the ♠Q DOESN'T fall, play your other two ♥ winners. When East discards on the last ♥ you exit with a small trump to a defender's ♠Q. [NEXT]

If West wins the ♠ you will just have to depend on the ♦ finesse. But if East takes the trick he will be endplayed, having to give you a ruff/sluff in ♣s, or lead into dummy's ♦ K J.

South plays 3NT. West leads the ♠T. You cross your fingers and put on dummy's ♠J. No good, East covers with the ♠Q and you are forced to take your ♠K at the first trick.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 1 : ♣ = 1 :: Total = 6

Not only do you need 3 more winners, you need to get them without losing the lead because the instant you lose the lead West will take all his ♠ winners. You can **HOPE** that will only be 3 of them but you can't depend on it.

The ♣ suit is your only hope. If East holds the ♣K you can finesse him out of it. However, if he has ♣K x x and refuses to cover your ♣J, you will have to have a second entry to dummy to cash the good ♣s. [NEXT]

As it happens, you do have two entries, the ♥A and ♥Q! You just have to sacrifice your ♥K to use them both. At trick 2 play your small ♥ to the ♥Q. Play the ♣J, letting it ride when East plays low. Play a small ♣ to your ♣Q. Play the ♣A, dropping East's ♣K. And finally, play your ♥K to dummy's ♥A so you can

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 3NT; West leads the ♥3.

East plays the ♥J and you duck, hoping he will switch to any other suit! But of course he doesn't; he continues with the ♥4.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 4 : ♣ = 0 :: Total = 6

You need three more winners. You can get them in ♣s by just driving out the ♣A. The danger is that EW might win the ♣A and 4 ♥ tricks. Or, you can get them in ♠s if East holds the ♠K, a 50% chance. [NEXT]

You should try to avoid 50% chances when you have something better. Consider the chance that EW will actually be able to win 4 ♥ tricks if you give them the lead with the ♣A. In particular notice that you were dealt the ♥2! If West's ♥3 is a fourth down lead then he cannot have anything smaller and the ♥s are splitting 4-4.

Knowing they can only take 3 ♥ tricks makes it safe for you to drive out the ♣A. [NEXT]

So win the ♥A and drive out the ♣A. They will take their 2 ♥ tricks next. If East then leads a ♠ **DO NOT FINESSE**. Take your nine tricks and run.

[show NS]

The 2♠ bid is used as a transfer to 3♣.

If you don't use this in your system, just consider this hand; you might decide to incorporate it. So you bid 3♣ and everybody passes.

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 3♣. West leads the ♥J.

You play dummy's ♥Q hopefully, but East plays the ♥K.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 1 : ♦ = 2 : ♣ = 1 :: Total = 5

That is one loser too many. The ♣Q MIGHT drop . . . but she won't. There are no finesse positions. So you are going to have to establish a winner somewhere to discard dummy's small ♠. [NEXT]

Do you see it? The ♥8. Take the ♥A. Then play your ♣ A K. As predicted, the ♣Q doesn't fall. Then play a small ♥ to dummy's ♥9. Of course West will take the ♥10, but now your ♥8 is high.

As soon as you get the lead you play the ♥8 and discard dummy's ♠2.

[show NESW] Click NEXT to see the complete deal. [NEXT]

[RESET]

[show NESW]

[clear-commentary]

We know, you didn't really play the ♥Q on the first trick in the hope that West had underled the ♥K (although he certainly might have done so).

The real reason for covering was so you could establish the ♥8 by force.

Suppose you had not played the ♥Q to trick one. East would have withheld the ♥K and you'd have had to take your ♥A. Later East would have taken dummy's ♥Q with his ♥K, then played a small ♥ through your ♥8 to West's ♥10 7.

South plays 6♠. West leads the ♣Q, East follows with the ♣2.

You win the first trick with the ♣A in your hand.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 0 : ♣ = 0 :: Total = 2

There are two obvious possibilities for avoiding the ♥ loser. You could finesse East for the ♥K; this is a 50% chance. The ♦s could split 3-3; this is a 36% chance.

In fact, your chances are better than either of those percentages because you can try the ♦s first, and if they **DON'T** split you can then try the ♥ finesse. [NEXT]

Pull trumps; West shows up with 3 trumps. Play the ♦K, then a small ♦ to dummy's ♦A. On this trick West follows with the ♦10. [NEXT]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♥]

You could either use a transfer or you could jump to 3♠. You decide on the transfer and bid 2♥. Partner jumps to 3♠! What do you say now? [BID 6♠]

[show NS]

You could either use a transfer or you could jump to 3♠. You decide on the transfer and bid 2♥. Partner jumps to 3♠! What do you say now?

The 3♠ bid is a "Super-accept", showing a maximum 1NT opener, 4 ♠s and a doubleton. In other words, partner's hand has revalued to 18 points. So you bid 6♠ (or you could ask for Aces instead).

4♠ by South			

Loser List: ♠ = 1 : ♥ = 0 : ♦ = 1 : ♣ = 1 :: Total = 3

Careful! Although it looks like only 3 losers you are in real danger of a ♣ ruff. It is almost certain that West has led a doubleton ♣ so if East can get the lead with either ♠ A or ♦ A they will get the ruff. [NEXT]

Fortunately your ♦ s are solid and you do not need the ♥ Q as a winner.

So before playing any trumps play ♥ A K, discarding dummy's ♣ K. That's a lot of winners you are wasting but you can afford it. [NEXT]

Only then can you afford to play a ♠. East can win the ♠ A, but if he plays a ♣ dummy will be able to over-ruff West.

After you pull trumps you can drive out the ♦ A and claim the contract.

to see all four hands. [NEXT]

[show NESW]

[clear-commentary]

As you see, trying even one round of trumps would have been fatal.

You had to get rid of dummy's singleton ♥ first - the fact that it was a winner should not affect your making the correct play.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♠]

Partner's 2♥ bid is a transfer so you bid 2♠. Partner now bids 4♠ and you pass. [NEXT]

Many people play Jacoby Transfer convention. Not all of them play that an initial response of 2♠ asks partner to bid 3♣. You use that here and reply 3♣. Everybody passes.

Click NEXT to continue. [NEXT]

[show NS]

[clear-commentary]

What a terrible dummy! This shows why this method is a good addition to Jacoby Transfers.

South plays 3♣. West leads the ♥Q. East takes the ♥A K, then switches to the ♠Q.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 2 : ♦ = 0 : ♣ = ? :: Total = 3 + ?

Instead of trying to estimate how many ♣ losers you may have, just tell yourself that you can only afford to lose one! Then you base your plan on that requirement. [NEXT]

You might as well win the ♠A. You need to play the trumps from dummy and the easiest way to get there is to play ♦A K, then ruff a ♦. Now play a ♣ from dummy and play what from your hand? [NEXT]

You may think it is a guess whether to play the ♣K or ♣J, but there is no guessing involved here. You must play the ♣J because East cannot possibly hold the ♣A. Just go back and look at the bidding again. The East hand failed to open the bidding in first seat. And since then you have seen the ♥A K and the ♠Q come out of the hand. That's 9 points and the ♣A would bring that total to 13. Since he passed it follows that he doesn't have the ♣A. Of course he might or might not have the ♣Q, you just have to hope for that card.

Click NEXT to see the full deal. [NEXT]

South plays 6NT. West leads the ♣9. East plays the ♣J which you take with your ♣K.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 3 : ♦ = 2 : ♣ = 4 :: Total = 11

There are two places you might find your twelfth winner. You can finesse East for the ♠Q; this is a 50% chance. Or, the ♦s might split 3-3; this is about a 40% chance. [NEXT]

If you try the ♠ finesse and it fails you will go down even if the ♦s are splitting 3-3.

If you play ♦A, ♦K then another ♦, a 4-2 ♦ split will defeat you even if the ♠Q was with East. [NEXT]

Two chances are always better than one. The way to take both chances is to duck a ♦ at trick 2. Win whatever the defenders play next and then test the ♦s. If they do split your last ♦ will be trick #12. But if they don't split you can still try the ♠ finesse.

Click NEXT to see. [NEXT]

[show NESW]

[clear-commentary]

Ducking the ♦ was the correct play - not just because it worked, but because it gave you the opportunity to try an alternate method if it didn't work.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 6NT]

[show NS]

Partner's 4NT bid is not Blackwood, it is the Quantitative 4NT. He is unsure whether to bid 6NT or not, so is inviting you to do so.

With 20 points you are supposed to pass. With 21 points you are supposed to bid 6NT. The evaluations probably aren't that accurate, but at least you have an excuse to bid 6NT.

South plays 3NT. As expected, West leads his partner's ♥ suit.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 1/2 : ♦ = 0 : ♣ = 3 :: Total = 5/6

You need at least 4 ♦ winners.

If you play low from dummy on the ♥ lead East can win the ♥K but this will give you an extra ♥ stopper. He could drive out dummy's ♥A at trick 2, but you would then establish ♦s and make an overtrick! [NEXT]

But who said East would play another ♥ after winning the ♥K? What if he wins the ♥K and switches to ♠s? They might then win 3 ♠ tricks to go with their ♥K and ♦A. [NEXT]

Instead you should grab the first trick with dummy's ♥A and start playing ♦s. East will take the ♦A but you still have the ♠A and ♥Q as stoppers.

Click NEXT to see. [NEXT]

[show NESW]

[clear-commentary]

Just look at East's hand. If you duck the ♥A it will be crystal clear to him that he can defeat the contract by winning the ♥K and then switching to the ♠K.

Don't give him the chance.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 1NT]

[show NS]

You should not make a takeout double with three cards in their suit. A 2♦ overcall would be a reasonable choice. But with 15 points, balanced, and a stopper in ♥s a 1NT overcall is probably better.

Partner bids 3NT.

Click NEXT to continue. [NEXT]

dummy and West holds the trick. He continues the suit and East takes the ♠Q and then plays the ♠A.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 2 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 4

You've already lost the 2 ♠s. If West has the ♥K you might avoid a loser there. You don't have a winner on which to discard the ♣ loser. [NEXT]

If East has the ♥K it will have to be a singleton to help you, so it is more logical to play West for the ♥K. But if West does have the ♥K it will do you no good to ruff East's ♠A, West will over-ruff and you would still have that ♣ loser. [NEXT]

So do it this way instead. Discard the ♣ loser on East's ♠A! Another ♠ from East won't hurt you since dummy would be able to over-ruff West. Whatever East plays you can win, then finesse West out of his ♥K.

Click for the full layout. [NEXT]

[show NESW]

[clear-commentary]

It was said earlier that you didn't have a winner on which you could discard the ♣ loser.

That was true, so instead you were able to discard it on a loser!

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 4♥]

[show NS]

You would really like to have a transfer bid in this situation, to make North bid ♥s.

But you don't have one, so you just bid 4♥ yourself.

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 4♥. West leads the ♠T. You play low in dummy and West holds the trick. He continues the suit and East takes the ♠Q and then plays the ♠A.

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 0 : ♦ = 4 : ♣ = 1 :: Total = 6

You need 3 more winners and at least 2 of them must come from ♠s. Furthermore you don't want East to lead ♣s through your King. Your best hope is that East holds the ♠K so you can finesse. [NEXT]

So you win the ♥A and start thinking about dummy entries. Your obvious entries are the ♦K and ♦J. If East holds only two small ♠s with his ♠K, then two entries will be enough. But what if East holds ♠K x x x ? Can you find a third entry to dummy? [NEXT]

If the ♦s split 3-2 the answer is **YES**. Play the ♦A, then lead your ♦8 to dummy's ♦J. Watch carefully to see if both defenders follow to this trick. They do. Play a ♠ to your ♠T, which holds the trick. Play your ♦Q to dummy's ♦K. Finesse the ♠ again. Return to dummy by playing your ♦5 to dummy's ♦6, then finesse the ♠ one last time.

to see all four hands. [NEXT]

[show NESW]

[clear-commentary]

If the ♦s had split 4-1 you would not have been able to enter dummy three times. That would have been very unlucky.

If you played your ♦5 too early you would not have been able to enter dummy three times even when there was a 3-2 split. That would have been very unsmart.

[show S]

You are the Dealer. Decide what you would say, then click on **BID** above. [BID 2NT]

[show NS]

With 20 HCP and balanced distribution you should open 2NT. Do not let the good 4-card ♠ suit sway you to anything else. Partner bids 3NT and everybody passes.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 2 : ♣ = 1 :: Total = 6

You need 3 more tricks, obviously coming from the ♣ suit.

But the burning question right now is what do you do at trick one. Do you win or hold up? [NEXT]

You should assume that West holds the ♠K.

If you take the ♠A right now your ♠J 5 will provide a second stopper if it is West who gets the lead. However, if East gets the lead he will play through your holding and you may lose 4 ♠ tricks.

If you hold up you can expect East to play another ♠ through your ♠A J and West will then establish the suit. However, in doing so he will remove any ♠ held by East.

The answer key lies in the ♣ suit. You will be finessing through West, so East is the only defender who can get the lead in ♣s. Therefore you must hold up on ♠s until the third round.

Winner List: ♠ = 2 : ♥ = 2 : ♦ = 0 : ♣ = 2 :: Total = 6

Even if East holds both black Queens, (not likely), you can only finesse your way to 8 tricks. Since you need 9 tricks you must establish the ♦ suit.

If West holds both the ♦ A and ♦ K then you are going down, because they will win the race to establish ♥s before you can establish ♦s. [NEXT]

But when the ♦ A and ♦ K are in different hands you have a good chance for success; it depends on East having no ♥ at the time he takes his ♦ winner. [NEXT]

So you should hold up on the first ♥ trick and win the second. If West started with 6 ♥s then East will be out. So whether he wins his ♦ trick first or second he still won't be able to continue ♥s.

to see all four hands. [NEXT]

[show NESW]

[clear-commentary]

After your hold up East has no ♥s. If he takes the first ♦ trick he will have to lead another suit. You will still have a ♥ stopper for when West wins **HIS** ♦ trick.

On the other hand, if West takes the first ♦ trick he can certainly drive out your last ♥ stopper. But then, when East takes **HIS** ♦ winner he will have no ♥.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3NT]

[show NS]

Partner's 3♦ bid shows a 5-card suit and is forcing to game. While 5♦ is possibly the best contract your double ♥ stopper should sway you to 3NT instead. This is the old "9 tricks are easier than 11" principle.

Because of his 3-4-3-3 distribution, partner chose not to look for a ♥ fit. If he had opted for Stayman the contract would have turned out the same. The 4NT response is quantitative, inviting you to bid 6NT if you have a maximum.

You do. 6NT.

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 6NT. West leads the ♠K. You will have to make an early decision on whether to hold up or not.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 5 : ♣ = 2 :: Total = 11

Only one more winner is needed. You should play a low ♠ from dummy in the hope that West will lead the suit again, giving you a trick with your ♠J (you know West holds ♠Q). In fact, you should even give him some incentive to play another ♠ by dropping your ♠9, pretending to hold just the ♠J 9. But West noticed his partner's discouraging ♠2 and switched to the ♣8. [NEXT]

You try the ♣J but East plays the ♣Q and you have to win with your ♣K. [NEXT]

Your chances for success are slipping away and you are down to your last hope. Your ♠J is a threat that only West can guard against. If West also is the defender with long ♥s then he would also have to guard dummy's fourth ♥. In that case you could squeeze him. But there is one important play you must make for the squeeze to function. [NEXT]

You must play dummy's ♠A to unblock so your ♠J can be the threat you need. Then play the ♥A, ♣A and 5 ♦ winners. [NEXT]

If West has thrown the ♠Q you win your ♠J and dummy's two high ♥s. But since he probably held onto the ♠Q you just play a ♥ to dummy and hope all three ♥s are winners.

South plays 4♠. West leads the ♥10. East plays the ♥K, then ♥A, then ♥5.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 2 :: Total = 5

You need to eliminate two losers. If West has the ♦K a finesse will save one loser. If ♣s split 3-2 that will eliminate one loser. And of course your ♥J is ready to provide an immediate discard. [NEXT]

So what are you going to discard right now on that ♥J? It looks obvious to discard the ♦Q; then if the ♣s do split 3-2 (68% chance) you will be home free, losing only two ♥s and one ♣. [NEXT]

Throwing the ♦Q is a bad idea. And basically unnecessary. If the ♣s are splitting 3-2 you don't need to keep a fourth ♣ in both hands. So discard a small ♣ from dummy and keep the ♦Q just in case the ♣s turn out 4-1 and you have to fall back on the ♦ finesse.

Click NEXT to see why. [NEXT]

[show NESW]

[clear-commentary]

Looking at all four hands you can see why you needed to keep the ♦Q.

After you pull trumps you play the top two ♣s and discover (too late) that you cannot set up a ♣ winner.

But what if the ♦K was actually with East, and the ♣s were splitting 3-2 all the time?

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3♠]

[show NS]

Partner expects you to bid 2♠.

But your hand has suddenly increased in value - with the known ♠ fit you add another point for your doubleton and you have 18 points. So you jump to 3♠; this is called a Super-Accept. But so what. Partner just bids the game anyway.

You should be sure you and partner are on the same page with this bid. A 2NT overcall over a Weak-2 opener shows the same hand as a 1NT overcall over a 1 of a suit opener. In other words, 15-18 points, and at least 1 (preferably 2), stoppers in their suit.

Partner, who is on the same page, bids 3NT.

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 3NT. West leads the ♥9. As expected, West leads his partner's ♥ suit.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 2 : ♦ = 2 : ♣ = 0 :: Total = 4

You need 5 more winners. This is important to keep in mind.

You can establish at most 1 winner in ♦s, 2 in ♠s, and 3 in ♣s. Since you must work on both ♠s and ♣s, you don't need to try for anything extra in ♦s. [NEXT]

If East has both black Aces you will go down, but you know that he cannot have two outside Aces with a 6-card ♥ suit headed by the Q J and still open with a weak 2-bid. So West must have at least one of the black Aces. [NEXT]

If you could guess which Ace East holds you could work on that suit first. He would win it, then get his ♥s established, but wouldn't be able to get back in to cash them.

But better than guessing, you should just holdup on the first ♥ trick and win the next one. Then it won't matter which Ace you knock out first because West will not have a ♥ to play in either case.

Click NEXT to see. [NEXT]

[show NESW]

[clear-commentary]

If you win the first trick and then play ♠s, you will be lucky. East will have to take his ♠A and then

The contract would be 3NT played by North.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3♣]

[show NS]

After the overcall of your partner's opening 1NT you must make a quick decision with this type of hand: Force to game or settle for partscore. Using lebensohl, a suit bid at the 3-level shows a 5-card or longer suit and is game forcing. You go for it by bidding 3♣ (not Stayman) and partner says 3NT.

South plays 3NT. West leads the ♥Q. You must make an immediate decision whether to hold up or not.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 1 : ♣ = 0 :: Total = 4

Of course the ♣ suit will produce 4 winners so you need just one more in ♠s or ♦s.

First the question of holding up or not. The reason for a hold-up play is to be sure that when East gains the lead he has no ♥s remaining. But in this Deal you can place most of the strength with West so you don't need to hold up. And, in fact, there is a good reason why you shouldn't. [NEXT]

Win the first trick with your ♥K and immediately play a ♣, taken by West's ♣A. He plays the ♥J which you win with your ♥A. East followed suit to the second ♥! [NEXT]

West has 3 ♥ winners in his hand. There is a good chance that he has the ♠K and ♦K as well. So if you play either of those suits, leading toward the Queen, West will jump up with his King and put you down 1. So instead, play a ♣ winner, and when West shows out, play your last ♥! West will smile as he takes his three ♥ winners but then he will frown when he realizes he must lead away from one of his Kings! You, of course, will jump up with dummy's Queen of that suit for your ninth trick.

South plays 4♠. West leads ♥K, East plays ♥J. You have no reason to hold up so you win the ♥A.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = ? : ♥ = 2 : ♦ = 0 : ♣ = 0 :: Total = ?

Things look simple. You can afford one ♠ loser so as long as they split 3-2 you will succeed. So you play ♠A, ♠K; West follows to the first and discards a ♦ on the second. [NEXT]

OK, East has two trump tricks, but don't give up. Maybe, just maybe, there is a way out. Check your winners: You have won 3 tricks - ♥A and ♠A K. You have 4 more top winners - ♦A and ♣A K Q. If you can somehow add 3 more small trumps that will be the 10 you need. [NEXT]

Play dummy's ♦7 to your ♦A, then ruff a ♦. Play a ♣ to your hand and ruff another ♦. Play another ♣ to your hand and ruff your last ♦. While you are ruffing these three ♦s East is helplessly following suit.

Now play to your good ♣ while East again has to follow suit.

You have taken the first 10 tricks. Poor East is going to end up ruffing his partner's ♦ winner with one of his master trumps.

[show NESW] Click NEXT to see all four hands. [NEXT]

South plays 6NT. West leads the ♦ 10. Too bad West didn't lead a ♠. Oh, well.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 4 : ♣ = 4 :: Total = 11

There is no way to get more than 4 winners in each minor suit, so you need to win either the ♠ J or ♥ Q.

Which one should you try? [NEXT]

Why not try both? If you make sure you try them in the right order you can have both chances. [NEXT]

Suppose you lead a small ♠ from dummy and play your ♠ J, and it loses to West's ♠ Q. If you then try leading a small ♥ toward dummy's ♥ Q, obviously the defender with the ♥ K will grab it to set the contract.

Instead, try the effect of leading toward the ♥ Q first. If West has the ♥ K then you will succeed in creating the extra winner you need. But what if you play the ♥ Q and East takes it with his ♥ K? Too bad, but at least you are not dead yet. You still have a chance to finesse East for the ♠ Q.

Click for the full deal. [NEXT]

Loser List: ♠ = 0 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 2

If you can guess the ♥ finesse correctly you will make 7, discarding dummy's ♣ loser on the fourth ♦. But if you guess wrong they will immediately set you with a ♣ trick. [NEXT]

There is a better way - one that combines two chances. Win the ♣A. Then play your ♥A and ♥K. If the ♥Q happens to fall, pull the last trump and run your winners.

If the ♥Q **DOESN'T** fall, (she won't of course), switch to ♦s. On the fourth round of ♦s discard dummy's ♣, whether it is ruffed with the ♥Q or not.

[show NESW] Click NEXT to see the complete deal. [NEXT]

[RESET]

[show NESW]

[clear-commentary]

If you knew to play the East for the ♥Q then you wouldn't need this improved plan.

But playing the deal as described will win whenever the ♥Q is doubleton, **OR** when the player with the protected ♥Q holds at least 3 ♦s.

Pretty good odds, better than the going rate for finesses, which is 50% off.

There was an alternate plan, just as good. After taking the two top trumps, run the ♠s, discarding two ♣s from your hand. As you see, either would have worked.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♥]

3NT by South

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 3NT. West leads the ♦Q. West attacks in ♦s and you must make an immediate choice. Hold up, win in dummy, or win in your hand.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 2 : ♣ = 0 :: Total = 5

First decide about what to do at trick #1. If you hold up and West plays another ♦, no harm will be done. But probably no good will be done either because West is likely to have 6 ♦s, leaving East with just a singleton anyway. But what if West pockets the one ♦ trick and switches to ♥s, a suit where you only have one stopper? Since that might turn out badly, you should **NOT** hold up.

As to which hand to win it in, that's easy. You need to preserve any dummy entries that you can so you win the first trick with your ♦K. [NEXT]

Now you establish some ♣ winners. You play the ♣J and both defenders play low. [NEXT]

You have to assume that defenders good enough to hold up their ♣A at the first opportunity will be good enough to do it on the second play also. But you can thwart them by next playing your ♣T and overtaking with dummy's ♣Q. Even if they do hold up again you can continue with another ♣ from dummy to establish the suit while you still have the ♦A for an entry.

Click for the complete Deal. [NEXT]

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 3♣]

Partner's 2NT is the lebensohl convention. He requests that you bid 3♣ as a relay, which you do. Partner now bids 3NT. What do you say? [BID pass]

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 2 :: Total = 5

It's not as bad as that Winner List looks; you can establish 4 ♠ winners very easily.

In fact, it looks so good you might wonder what could possibly go wrong. Here's something that can go wrong. The defenders take the **SECOND** ♠ trick with their ♠A. Can you get back to dummy for those other three winners? [NEXT]

Maybe you can and maybe you can't. It depends on what you played from your hand at the first trick. If you won that trick in your hand with the ♥A, then YES, you can get to dummy by leading twice toward the ♥QJ.

But if you won the first trick more cheaply with your ♥10, (or perhaps dummy's ♥J), and you still have that

Loser List: ♠ = 0 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 2

A very simple Plan would be for you to pull trumps and then guess who holds the ♣Q. Simple, but putting your slam on a 50% chance isn't very satisfying. [NEXT]

How about an elimination play instead? Win the ♥A. Then play to dummy's ♠K. West shows out and you must temporarily stop drawing trumps. [NEXT]

For the elimination play to work you must strip ♦s from both hands. So play both the ♦A K, then ruff a ♦ with the ♠Q. Pull trumps with your ♠A J, then ruff the last ♦ in dummy.

The work is done. Just play a ♥. Whichever defender wins must either play a ♣ into your split tenaces, or play a red card and give you a ruff/sluff.

South plays 3NT. West leads the ♣2 and East plays the ♣J.

Question 1: Do you hold up?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 3 : ♥ = 1 : ♦ = 1 : ♣ = 2 :: Total = 7

The lead of the ♣2 tells you that West has only a 4-card suit, so there is no need to hold up. In fact if you did hold up East might play an unwelcome ♥ back.

Your best bet is going to be the ♦ suit, but dummy isn't exactly loaded with entries. How will you manage it? [NEXT]

When entries are really scarce the best approach is ducking. Win the ♣K and play a low ♦ from both hands. A defender will win this and probably continue with a ♣. [NEXT]

Stick to the plan. Win the ♣A and again play small ♦s from both hands, relaxing when both defenders follow suit to the second ♦.

They can now cash their 2 ♣s, and you had to give them 2 ♦s. But that's the only tricks they will get. Dummy's 3 ♦s are good and you still have a ♦ in your hand to get there.

South plays 3NT. West leads the ♦ K. What will you play from dummy? (East follows with the ♦ 2.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 3 : ♦ = 1 : ♣ = 0 :: Total = 4

Since West has apparently led from ♦ K Q it seems you will get a second ♦ winner when they pursue the suit. You can also establish 3 more winners in ♣s. You can also establish 3 more winners in ♠s.

But as you can figure, you are going to have to establish **BOTH** black suits to get enough winners, and therein lies the problem. If West has a 5-card ♦ suit they will be able to establish 3 ♦ winners by the time you have knocked out both black Aces. In that case you cannot make the contract. Of course, if the ♦s are split 4-4 you will only lose 2 ♦s and the two black Aces. However West would probably not have overcalled a 4-card suit. [NEXT]

But West might have a 6-card ♦ suit, leaving East with just 2. Assume the two black Aces are split, one with West and one with East. If you win the first trick with dummy's ♦ A you will be OK if you first play the black suit where West holds the Ace. He will take it and then establish his ♦s. No problem, because when you knock out East's black Ace he won't have a ♦ left. BUT, if you guess the wrong black suit first you will

[clear-commentary]

Winner List: ♠ = 0 : ♥ = 3 : ♦ = 1 : ♣ = 1 :: Total = 5

You are pretty sure West has the ♣A so dummy's ♣K can become a winner. If so, you only need 3 more winners.

All 3 can come from the ♦ suit if the finesse works, only 2 if it fails. Assume the worst, so that means you will also need a ♠ winner. [NEXT]

When you give up the lead the opponents are going to continue ♣s if they can. If West has a 5-card ♣ suit you could lose 3 ♣s, the ♠A and the ♦K. Either defender might win the ♠A, but only East can win with the ♦K. [NEXT]

Since West, the Danger hand, can only get in with the ♠A you should establish a ♠ winner first, even though the ♦s are better. Whoever wins the ♠A will probably knock out dummy's ♣K. Hopefully this will not cause you a problem because when your finesse for the ♦K loses to East he won't have another ♣. At least that's the Plan!

Click NEXT to see if the Plan was a good one. [NEXT]

[show NESW]

[clear-commentary]

If you finesse in ♦s first, East will return his last ♣ and the suit will get established while West still has an entry in the ♠A.

Play ♠s first and even though West can win and establish ♣s East will not have a ♣ to return when he wins

South plays 7NT. West leads the ♥10 and East follows with the ♥2.

DO NOT HOLD UP.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 3 : ♥ = 3 : ♦ = 3 : ♣ = 3 :: Total = 12

There are two chances for your thirteenth winner, your fourth ♣ or dummy's fourth ♦.

Some players will assume that means one of those two suits will have to split 3-3, so they will immediately test one, then the other. [NEXT]

In fact there is another possibility for success - even if neither suit is 3-3 it may be that the same defender holds 4 cards in both suits. In this case that defender can be squeezed. BUT, you don't play the ♣s and ♦s first, you play the other two suits.

Win the first ♥, then play two more ♥s and all three ♠ winners. That will be 6 tricks played, and each defender will be down to 7 cards left in their hand. If one of them happened to start with 4 ♣s and 4 ♦s he will have to discard from one of the holdings and you will be able to win your fourth card in that suit.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 2 : ♥ = 2 : ♦ = 3 : ♣ = 0 :: Total = 7

Suppose you win the ♥A, play over to the ♣Q, then try to get back to your hand with a trump to discard 2 losers on ♣ A K. If it worked that way it would be fine, but it is very likely that a defender would win their trump Ace, then take their 2 ♥s and 3 ♦s. You could be down one before you even got started.

A better approach is to trade one of your ♣ winners for a quick discard. Take the ♥A, then play ♣ A K, discarding a ♥ from dummy. That will eliminate one ♥ loser. [NEXT]

You probably cannot avoid your 3 ♦ losers, but you may be able to get out with losing a single trump. **IF** ♠s split 3-2, and **IF** you can win tricks with both the ♠K and ♠Q then you will make it. The only way it can happen is if East holds a doubleton ♠ A x. You must play the first ♠ from dummy, so ruff a ♣ to get there, then lead a small ♠, putting on your ♠Q when East follows low. This wins the trick, (hip-hip), so you now play your ♠3, ducking in dummy. When East has to take his ♠A, (hooray), you are home-free.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 2? : ♥ = 0 : ♦ = 0 : ♣ = 0 :: Total = 2

At first thought it seems the ♠ lead has saved you a guess in the suit. By playing low in dummy you will force East to put on the King, (if he has it), winning the trick but leaving you with a pretty good position in ♠s. [NEXT]

That's why it's good to have second thoughts at the Bridge table. Think about the meaning of the ♠8 lead. If it is fourth down, then the Rule of 11 tells you that there will be 3 cards higher than the 8 spread among North, East, and South. **BUT YOU CAN SEE 4 HIGHER CARDS.** So your conclusion is that West has **NOT** made a fourth-down lead, but rather has led top-of-nothing, top-of-a-doubleton, or perhaps a singleton.

You don't know which of the above, but you do know that East holds both the ♠ K J. The danger is if the ♠8 is a singleton and you play low from dummy they could get a ♠ trick and a ♠ ruff. So don't play low from

All Pass			

6♥ by South probably has at least two Aces for his strong bidding. The other choice is a Blackwood 4NT, and this is certainly not the type of hand where asking for Aces is always helpful - what if partner shows two Aces, aren't you going to bid the slam anyway? The advantage to Blackwood here is that there is just a slim possibility that partner has only one Ace!

South plays 1NT. West leads the ♥J and East plays the ♥8. Do you hold up? If so, how many times?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 1 : ♣ = 0 :: Total = 4

It probably makes no difference whether you hold up or not since East surely has most of the high cards. However, holding up once is a good idea because West may have a singleton ♥ and have to switch to something which helps you. West holds the first trick and plays another ♥, which you win. [NEXT]

You must find 4 winners. The bad news is that you must finesse both the ♦K and the ♠Q. The good news is that with East opening the bidding there is a good chance he has both of them. So, how will you manage those two finesses? [NEXT]

There is only one way to do it. Enter dummy with the only entry, the ♠K. Take the ♦ finesse first - play the ♦Q and unblock your ♦J when East plays low. (you could play the ♦10/♦7 combination first). [NEXT]

Finesse the ♦ again. If East ducks a second time you must now take the ♠ finesse while you are still in dummy. If East covers the second ♦ you win with your ♦A, return to dummy with the ♦9, and then finesse the ♠.

[clear-commentary]

South plays 3NT. West leads the ♥Q.

West's ♥Q lead presents you with an immediate decision (or two) to make.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 2 : ♦ = 0 : ♣ = 1 :: Total = 5

You need 4 additional winners and can only establish 3 of them in ♦s. So you will have to manufacture another one from the ♣ suit as well. If you assume the ♣ finesse will fail, (and you have probably noticed that most finesses **DO** fail on these pages), that means you will lose the lead twice.

So what do you do about that ♥Q? Do you win or hold up? [NEXT]

You hold up, of course, to cut defensive communications when West has 5 ♥s and East has 3. West will probably play another ♥ to dummy's ♥K. [NEXT]

If both the ♦A and ♣K are in West's hand then you won't make this contract. He will easily establish his ♥s and have an entry to get in and cash them. If the ♦A is with West and the ♣K is with East then it doesn't matter in which order you play the suits since you will not lose the lead in ♣s. But if the ♣K is with West and the ♦A is with East then it is vital that you play ♣s first.

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♦]

Partner bids Stayman; with no 4-card Major you respond 2♦. Partner now bids 3♠. What do you bid? [BID 3NT]

[show NS]

Partner bids Stayman; with no 4-card Major you respond 2♦. Partner now bids 3♠. What do you bid?

Partner's bidding is crystal clear. He has described a hand with at least 11 points, which has 4♥s and 5♠s.

Click NEXT to continue. [NEXT]

[clear-commentary]

South plays 3NT. On West's ♥J opening lead East plays the ♥Q.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

On West's ♥J opening lead East plays the ♥Q.

Winner List: ♠ = 0 : ♥ = 2 : ♦ = 3 : ♣ = 2 :: Total = 7

You must establish some ♠ tricks which means you will be finessing through West. Since West can get the lead at most once in ♠s you should not hold up in ♥s. The problem with a hold up is that East may pocket one ♥ trick and then switch to ♣s, a suit in which you are no better off. [NEXT]

Win the ♥K and play your ♠9, letting it ride. Suppose it holds the trick. Continue with another ♠, taken by East's ♠Q. [NEXT]

East cannot hurt you. If he has a ♥ to play, then ♥s will have broken no worse than 4-2 and you will lose two ♥s and two ♠s.

If East plays any other suit you have a double stopper and can establish ♠ tricks before they can set up a winner of their own.

Click NEXT to see what might have happened if you held up. [NEXT]

South plays 3NT.

West naturally attacks in his suit, leading the ♥Q.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 2 : ♣ = 2 :: Total = 7

There are several possibilities for extra winners. The ♦Q might drop - or the finesse might work, providing one winner. The ♣s might split 3-2, giving you one extra winner. The ♠ honors might be split (or West might hold both) so the double finesse would give you two winners. Since your minor suit hopes require that BOTH of them work, your best bet is the double ♠ finesse. [NEXT]

You do not need to hold up on the ♥ because you will be finessing twice into East, and he cannot possibly have more than two ♥s, probably only one. Come to your hand with a ♣, play the ♠J and let it ride. East wins the ♠Q and plays another ♣. Win this one and finesse the ♠ again. When this finesse works you can return to your hand with a ♦ and repeat the finesse.

South plays 3NT. West leads the ♠K. Do you hold up or not?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 2 : ♣ = 2 :: Total = 8

You need just one more winner. It could come from a finesse of the ♣J. It could come from a 3-3 ♥ split. It could come by establishing a fourth card in ♦s.

Most important for now is the ♠ lead? Do you hold up? [NEXT]

Yes you should hold up. In fact you might as well hold up twice since you aren't contemplating a throw-in of West. Holding up twice will protect you in the unlikely event that West made his 2 ♠ bid with a 5-card suit. [NEXT]

Both the ♥ possibility and the ♣ possibility will either work or not, so you can save them for later. Your highest percentage chance is the fourth ♦, but here you must be careful. You must try to establish the ♦s without allowing West to get the lead. It is actually pretty easy. Just play a small ♦ from your hand and when West plays low insert the ♦10. East wins the ♦J but cannot harm you with his return.

When the remaining ♦s fall you have established your ninth trick.

South plays 3NT. West leads the ♦ Q. Do you win the first trick or holdup?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 3 : ♥ = 0 : ♦ = 2 : ♣ = 3 :: Total = 8

A holdup wouldn't hurt you since West would retain the lead. But it probably wouldn't help you much either since you do have 2 stoppers in the suit. You obviously need to establish at least one more winner in ♠s so you won't have to depend on the ♥ A being with East. Need it be said that ♥s is the suit you are worried about and East is the Danger hand? Let's say you win the first trick with dummy's ♦ K. [NEXT]

Suppose you play ♠ A, then ♠ K Q. If they split 3-3 you will be soooo happy because you will make at least 10 tricks. But if East shows out on the third ♠ you will be pretty happy because you can give up a ♠ to West and still make at least 9 tricks. But if West shows out on the third ♠ you could be in deep trouble. You would have to give East the lead to establish an extra ♠ winner, and he might very well lead through your ♥ K. [NEXT]

Winner List: ♠ = 0 : ♥ = 1 : ♦ = 3 : ♣ = 1 :: Total = 5

It is pretty clear that the 4 additional winners you need will be ♠s. The danger is that when you force out the ♠A the defenders might be able to cash 4 ♥s right away. So the immediate decision is whether you take the ♥A on the first trick or wait until the second. [NEXT]

If West has only 4 ♥s it will make no difference what you do because they will only win 3 ♥ tricks and you will make your contract. So assume that West has a 5-card suit, which means that East has 2 ♥s. West's suit is definitely **NOT** ♥ K Q J 5 2; he would have started with the ♥K, not the ♥5. So you can be sure that East holds either ♥ K x, ♥ Q x or ♥ J x. So what? [NEXT]

So you should play the ♥A immediately. If East puts on his small ♥ then his lone honor will block the suit the next time it is played. But if he unblocks the honor under dummy's ♥A then your ♥ 10 9 7 will be promoted into a second stopper.

Partner's 2♥ is a transfer, so you bid 2♠. Partner now bids 2NT. What do you say? [BID 3NT]

[show NS]

Partner's 2♥ is a transfer, so you bid 2♠. Partner now bids 2NT. What do you say?

Partner is only inviting, so he must have either 9 or 10 points. And since he chose 2NT as the invitation he must have only 5 ♠s. You will accept the invitation since you have a maximum 1NT opener, and you choose 3NT since you know there is no 8-card ♠ fit.

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 2 : ♣ = 3 :: Total = 8

You need only one more winner; the best chance will be a 3-2 split in ♣s. But if that doesn't happen you might have to try the finesse in either ♠s or ♦s. The problem is that both finesses go into the East hand. Because of that fact there is no reason to hold up on the first trick so you win the ♥A. Then you play the ♣A . . . and East discards a ♦! [NEXT]

Don't be sad that the ♣s didn't split, your contract is now guaranteed! Well, guaranteed as long as East has only a 6-card ♥ suit.

Play your ♥K, and when West follows suit play your ♥7. East wins this trick and he can also win 3 more ♥ tricks. But when he runs out of ♥s he will be forced to play a ♠ or a ♦ because he doesn't have any ♣s. Either one will give you your ninth trick.

Click NEXT to see the full Deal. [NEXT]

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 4 : ♦ = 1 : ♣ = 1 :: Total = 8

Your ninth trick will be either the ♠J or the ♦Q. In both cases the finesse would be into the West hand so the question of disrupting opponent's communications doesn't arise - East is not going to get the lead.

Nonetheless it is a good idea to hold up - **but only once**. [NEXT]

West then plays the ♣Q which you win as East follows. Next you run four ♥ tricks, ending in dummy. You play dummy's ♠K, your sixth trick so far. It is crunch time. Do you now finesse for the ♦K or the ♠Q? [NEXT]

The answer is NO, you do not take either finesse. Instead you play a ♣, hoping West must take the trick. And he does. West then cashes two more ♣ tricks but then he is out of ♣s. Since he is also out of ♥s he is going to have to play either a ♠ or a ♦, either one of which will make you very happy!

4♠ by South
 [clear-commentary]

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 1 :: Total = 4

You should certainly hold up. East is the Danger hand here because if East ever gets the lead he can play a ♥ through your unprotected ♥K, possibly giving you two ♥ losers. If you take the first trick with the ♣A you open the door for East to gain entry with the ♣K which you know he has. [NEXT]

Next pull three rounds of trumps. Fortune smiles and they split 3-2.

Now it's time to play on ♦s. Do you finesse for the ♦Q? and if so, which way do you finesse? [NEXT]

Missing 6 ♦s to the Queen of course you should finesse. And you will finesse through East, of course, because he is the Danger Hand. So play dummy's ♦K, then play the ♦10 and let it ride.

Click NEXT to see how your Plan turned out. [NEXT]

[show NESW]

[clear-commentary]

This time East holds the ♦Q and you make an overtrick, winning 4 ♦ tricks and discarding a ♥ loser from dummy.

Another time West will hold the ♦Q and you will make the contract, but no overtrick.

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 3 : ♣ = 1 :: Total = 6

You count 3 ♦ tricks but will need to be careful to get all 3. And obviously your three extra winners will have to be from the ♣ suit.

Most important for now, how do you read the ♥ suit? Do you hold up? [NEXT]

West has 4 ♥s because he led the ♥3 and you can see the ♥2. Therefore you should NOT hold up because they can only win 3 ♥s and the ♣K right now. But if you hold up, East might pocket his ♥ trick and switch to ♠s, where you are just as bad off. [NEXT]

So win the ♥A and unblock the ♦ A Q. then play ♣J, expecting to lose the trick. In fact, West takes his ♣K.

West cashes his 3 ♥ tricks, then plays a ♠. Pounce with dummy's ♠A, cash the ♦K, then take your 4 ♣ tricks and the game.

Click for the full deal. [NEXT]

South plays 3NT. West leads the ♠8. Of course West leads his partner's suit.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 0 : ♣ = 2 :: Total = 5

When the going gets tough, the tough better figure out a good plan! Although you MIGHT manage to get an extra trick in ♥s or ♣s, you can see that your only real chance is to find a distribution that will give you 4 ♦ tricks. With that in mind, where do you win the first trick? [NEXT]

Without thinking it through you might decide to save that entry to dummy and win the first trick in your hand. But to get the 4 ♦ tricks you need you are going to have to make them play their ♦A WITHOUT using one of your two honors. That means the ♦A must be doubleton, AND you must lead through it. And EAST is the one most likely to hold ♦A x. [NEXT]

You win dummy's ♠K and play a low ♦. When East follows with the ♦3 you play your ♦Q which wins.

Then play a low ♦ from your hand, and **DUCK IN DUMMY**. East plays the ♦A on this trick and you are now home-free!

Loser List: ♠ = 2? : ♥ = 1 : ♦ = 1 : ♣ = 0 :: Total = 4?

You are surely going to lose the two red Aces, so you must keep the ♠ losers to 1. A possible Plan is to pull the last trump and trust the ♠s to split 3-3. Good Plan? [NEXT]

Stinking Plan. The chance of a 3-3 ♠ split is 36%, just a little over 1 in 3. A much better idea is to leave that trump out for a while longer, take your ♠ A K, and ruff one ♠ with dummy's last ♥. Then what? [NEXT]

Be careful, you are still in danger. You need to pull that last trump but playing ♣A and a ruff at this point could result in you losing trump control. First you need to establish a ♦ trick, so play the ♦K. [NEXT]

East wins the ♦A but he can't hurt you. Suppose he plays another ♦. You win in dummy, ruff a ♦ back to your hand, and pull West's last trump. Then play a ♠ to East's ♠Q. Your fifth ♠ is now established and you still have a trump to get to your hand with.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 1 : ♣ = 5 :: Total = 8

You need to find one winner and it seems that it must come from one of dummy's red Queens. You are certain that West has both red Kings for his opening bid, (you and dummy have 26 HCP between you so that only leaves 14). But you also know that West has at least 5 ♠s, so if you lead toward a red Queen West will grab his red King plus 4 ♠ tricks.

Does that resolve the holdup question for you? [NEXT]

Yes. You hold up **ONCE**, and take the ♠A at trick 2. Next you play ♣ K Q J to strip West of that suit. Then play the ♠T to throw West into the lead.

[clear-commentary]

Loser List: ♠ = 1 : ♥ = 1 : ♦ = 1 : ♣ = 1 :: Total = 4

The ♠, ♥ and ♣ losers are inevitable so you'd better not lose a ♦. Even though East has returned a ♦ it is still possible that he holds the ♦K so the finesse has a chance of working. Let's say a 50% chance. Do you take it? [NEXT]

No, of course not. Not when you have a play that offers almost a 100% chance. Win the ♦A, play ♠K, ♠A, then ♥K Q, discarding dummy's 2 ♦ losers. [NEXT]

With one master trump still out you start on the ♣s, playing first the ♣K, then overtake the ♣J with dummy's ♣Q. The defense is welcome to take their ♣A whenever they want, and they are also welcome to their trump trick. You are so gracious because you have your ten tricks!

South plays 3NT. West leads the ♠Q, East following with the ♠2. Do you hold up or not?

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 1 : ♣ = 1 :: Total = 5

No, don't hold up. At least you have ♠s stopped twice, your other suits are stopped only once.

Realizing that your only hope is for a bunch of ♣ tricks you win the ♠K and play the ♣Q. West covers with the ♣K. What do you do? [NEXT]

If you win with dummy's ♣A, and if the ♣s split 2-2, you can win 7 ♣ tricks and 4 other high cards. Wow!

But if it turns out that the ♣K was singleton you will win just TWO ♣ tricks because dummy has no other entries. [NEXT]

So if you feel like gambling, go up with the ♣A. But if you like the idea of a guaranteed contract let West hold the ♣K, and you make sure of the six other ♣s.

Click for the full deal. [NEXT]

South plays 4♠. West leads the ♣K. Seeing 10 top tricks sort of makes you wish you had just bid 3NT.

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Loser List: ♠ = 2/3/4 : ♥ = 0 : ♦ = 0 : ♣ = 0 :: Total = 2/3/4

Missing 5 ♠s, the most likely split is 3-2, (68% of the time). You win the ♣A and play a small ♠ toward dummy. West puts on the ♠Q which you take with dummy's ♠A, East following with the ♠6.

Do you play ♠s again? or not? [NEXT]

Not. With both defenders following suit, the possibility of 4 ♠ losers is gone so you can lose at most 3. But that ♠Q from West is ominous. If you play another ♠ and they do split 3-2 you will make 11 tricks, losing only 2 trumps. But if East has 3 ♠s left he will win the trick, pull all the rest of the trumps, and lead a ♣ to West.

The guaranteed way to make the contract is to play no more ♠s, but to start playing ♦ winners. The defenders can make their 3 trump tricks but you maintain control of the hand.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♣]

It is tempting to just bid 3NT and hope the ♦s come in. But not when you have a 4-card Major suit. Instead you bid a Stayman 2♣. Partner says 2♠; what do you bid next? [BID 4♠]

[show NS]

It is tempting to just bid 3NT and hope the ♦s come in. But not when you have a 4-card Major suit. Instead you bid a Stayman 2♣. Partner says 2♠; what do you bid next?

Well, he has 4 ♠s. That's why you used Stayman so you bid 4♠.

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 3 : ♦ = 0 : ♣ = 4 :: Total = 8

You need just one more winner. It cannot come from either ♣s or ♠s. Unless a defender foolishly discards a ♥ it can't come from that suit. Which means you have to win a ♦ trick.

So after winning the ♠A, you play a ♣ to dummy's ♣K, then lead a small ♦ toward your hand and play . . . what? [NEXT]

At first this looks like the classic King / Jack guess situation where you try to figure out if West is more likely to have the Ace or the Queen.

But it isn't like that at all. If West has the ♦A then he will take it no matter which ♦ you play, and will defeat you with 1 ♦ and 5 ♠ tricks. Your **ONLY** chance to make this contract is for East to hold the ♦A. So you play the ♦K, then you . . .

. . . click NEXT to see if you make the contract or not. [NEXT]

Loser List: ♠ = 1/2/3 : ♥ = 0 : ♦ = 3 : ♣ = 0 :: Total = 4/5/6

Missing 5 ♠s, the most likely split is 3-2, (68% of the time). You win the ♥A then play ♠K and ♠A, both defenders following to both leads but the ♠Q is still out there.

Do you play ♠s again or not? [NEXT]

Usually it is a good idea to leave a master trump un-pulled and go about your business winning tricks in other suits. The idea is to force them to ruff without using any more of your trumps. But that is only "usually". Here your big source of winners is going to be the ♣ suit - and there are zero outside entries to it. Suppose you do not force out the ♠Q, but start playing ♣ winners. A defender might ruff the third ♣ and you would be doomed.

So play one more ♠ and they are doomed.

[show S]

The bidding has gone as shown. Decide what you would say, then click on **BID** above. [BID 2♥]

Make a Plan, then click NEXT. [NEXT]

[clear-commentary]

Winner List: ♠ = 1 : ♥ = 4 : ♦ = 3 : ♣ = 4 :: Total = 12

If West has led from ♠K 10 9 x, then all you have to do to make this contract is play a low card from dummy. But a decent defender would not make such a risky lead against a 7NT contract, so it is probable that East has the ♠K. You rise with the ♠A.

You hope the ♦s will split 3-3, but if they don't you still have the possibility of squeezing East if he holds 4 ♦s along with the ♠K you have assigned to him. [NEXT]

If it comes to a squeeze it is important to take your tricks in the correct order. First take 4 ♣ tricks, discarding the ♠J from your hand. You note that East discards a small ♠ on the fourth ♣.

[clear-commentary]

Loser List: ♠ = 0 : ♥ = 2* : ♦ = 1 : ♣ = 0 :: Total = 3*

*Don't get overconfident with this loser list. It assumes that trumps break 3-2, (if they don't you cannot make it), and also assumes you will be able to cross-ruff 4 small black cards.

Cross-ruffing those 4 losers could be a problem. You can't afford to get over-ruffed so it would be nice if you could pull some trumps before you start the cross-ruff. But you must make sure that only two rounds of trumps get pulled, otherwise you won't have the trumps for the cross-ruff. [NEXT]

It is actually simple to make sure exactly two rounds of trumps are drawn. At trick 2 just duck a ♥ in each hand. An opponent will win this, but you can take the next trick, (probably a ♦), and then pull a second round of trumps with your ♥A. Then leave the trumps alone and play your two black A K's, then start cross-ruffing with your 4 tiny trumps. The defender with the master trump can over-ruff when he can, and can even cash a ♦. But that's all he can do so you will make your game.
