3NT by North

You were lucky the ♥A was with West.

North is to play 3NT. East leads the ♦K.

Winners: ♠=4 ♥=0 ♦=1 ♣=1 Total = 6

You need 3 more winners, and they must come from the ♥ suit. The danger is that when you knock out the ♥A, East may take too many ♦s. To exhaust West of ♦s you hold-up your ♦A until the third round.

Next you start on ♥s by playing ♥K, then overtaking the ♥10. Assume that West wins the second ♥.

You were fortunate it was West who took the ♥A, and that he has no ♦ to return. If he plays a ♥ or a ♠ you will win in dummy. If he plays a ♣ you will jump up with the ♣A and take your winners, 9 in all.

But if you had not held-up your ♦A even good luck wouldn't have helped you.

3NT by East bank; ♠A, ♦K, ♦Q. You take your ♥K, cash the two good ♦s, then lead to dummy for the ♣AK and ♥A. Voila!

You were lucky that North had the ♦A since he only had 3 ♠s.

But what if North actually held 4 ♠s? No problem, in that case the ♠s would have split 4-4 so the defenders could only win 3 ♠ tricks and the ♦A.

The hold-up lets you make the contract whenever North holds the ♦A. And if South happened to hold the ♦A??? You go down.

East is to play 3NT. South leads the ♠K.

Winners: ♠=1 ♥=2 ♦=0 ♣=2 Total = 5

Even if ♥s split 3-3 you could only get 2 extra winners there, so it should be clear that you must establish the ♦s. You will have to drive out the ♦A and hope they don't win too many ♠s at that time. You can help your chances by a hold-up of the ♠A until the third round.

Having just taken the third ♠ trick you now work on ♦s by first playing the ♦K, then continuing the suit. North wins the third one with his ♦A. And now the good news - he has no ♠ left to reach his partner's good tricks. So North plays the ♥Q.

At this point in the play you have three tricks in the

the other suits. You don't care which he leads because you can now win 8 more tricks and make your contract.

South is to play 3NT. West leads the ♠3. East wins the first trick with the ♠A and returns the ♠8.

Winners: ♠=1 ♥=2 ♦=1 ♣=3 Total = 7

You can win 3 more ♦ tricks if the finesse works, but even if it doesn't work you can still get the 2 that you need. Of course if East does win the ♦K it would sure be great if he had no ♠ to lead. So you duck the second ♠ and take your ♠K when they play a third round.

After winning the ♠K you are conveniently in your hand, so you play the ♦Q and let it ride when West plays a low card. Alas, East takes the trick with his ♦K.

It's too bad the finesse didn't work, but it's not too too bad! Because East is out of ♠s and must lead one of

As long as you were going to finesse into East you could establish the ♦s without allowing West to gain the lead.

And as long as you had held up on the ♠K until the third round you could ensure that East was out of ♠s if he had started with only 3.

South

West is to play 3NT. North leads the ♦ K.

Winners: ♠=3 ♥=2 ♦=1 ♣=0 Total = 6

You will need some ♣ tricks to make the contract. If North has 5 ♦s and also the ♣A then you will go down. It doesn't matter if he has the ♣Q because you can finesse him out of that.

But in the case where South has both the ♣ A Q you need to make sure he has no ♦ when he takes his first trick. So hold up the ♦ A until the third round, everybody following.

Now start on the ♣s. Play your ♣9 and let it ride. South wins the ♣Q and returns a ♠. Good, he didn't have the fourth ♦.

Win with dummy's ♠Q and force out the ♣A.

The rest of the tricks are yours, nine in all.

If South had only held 2 ♦s it would have been OK to hold up your ♦ A just once.

But with this layout you needed to hold up twice.

3NT by North

With his 4-3-3-3 distribution South chooses not to bother with Stayman. North is to play 3NT. East leads the ♥6. West plays the ♥J.

Winners: ♠=1 ♥=1 ♦=3 ♣=2 Total = 7

You need to get two more winners. The ♥ suit might provide one of them, but you will still have to establish ♠s. The burning question is whether to win the first ♥ or to hold up. If you take this trick you will have a second stopper if East takes the lead, but you will be in extreme danger if West takes the lead. Since the ♠ finesse has to go into West you should hold up.

West returns the ♥9, East takes the ♥A and clears the suit.

You have lost two tricks so far. Lead the ♠J and let it ride. West wins their third trick with the ♠K but has no ♥ to return so he plays a ♦ which you win with your ♦A.

Play off your 7 winners and give up a ♣ at the end.

The K Q x holding is similar to the A J x holding. It might be two stoppers, or might just be one, depending on which defender next leads the suit.

So you decide whether to hold up or not based on how you expect to play the hand.

With his 4-3-3-3 distribution West chooses not to bother with Stayman. East is to play 3NT. South leads the ♥6. North plays the ♥J.

Winners: ♠=1 ♥=1 ♦=3 ♣=2 Total = 7

You need to get two more winners. The ♥ suit might provide one of them, but you will still have to establish ♠s. The burning question is whether to win the first ♥ or to hold up. If you take this trick you will have a second stopper if South takes the lead, but you will be in extreme danger if North takes the lead. Since the ♠ finesse has to go into South you should not hold up.

You win with your ♥K, (keeping South in the dark about who holds the ♥Q), enter dummy with the ♦A and play the ♠J, letting it ride to South's ♠K.

South cannot play ♥s without setting up your ♥Q so he will probably exit with a ♣ which you take with the ♣K.

Play off your 6 winners and concede the last three tricks.

This was almost the same as Deal 5, the difference being in which direction the ♠ finesse had to be taken.

But it sure makes a big difference in how you play the hand.

This might have turned out even better. If South had decided to play his partner for the ♥Q, (who would have played ♥J from a holding of ♥ Q J x), you would have made an overtrick!
