3NT by South

[showcards N:D5]

You are East. The bidding has been as shown.

Partner led the ♠J, won by dummy's ♠Q. The ♦5 is now played from dummy. What do you play?

Play the ♦2. Considering that South opened 1NT, he must have the ♦Q for this play to make sense.

So if you put on your ♦A, South will have TWO ♦ winners established. If instead you play low, then South cannot get a second ♦ trick and will have to look elsewhere for his ninth trick. As you can see, he is not going to be able to find it.

[showcards S:H2]

You are West. The bidding has been as shown.

Your lead of the ♣J was won by South with the ♣A. South then played the ♥2 and you must decide whether to split your honors.

Play the ♥4, do not split your Honors.

South's bidding showed at least 5 ♥s, so assuming he holds both the ♥A Q, it would be silly for him to finesse the ♥9 on the first trump play.

As it turns out, when you play low South calls for dummy's ♥K, East's ♥Q falls and you now have 2 trump tricks. If you had played the ♥10 you would have tossed away the setting trick.

there is no hope of establishment.

1♥

[showcards N:HJ]

You are East. The bidding has been as shown.

Partner led the ♣K, and you played the ♣9 to encourage him. He continued with the ♣Q, then a small card to your ♣A. You then exit with the ♦10, taken by dummy's ♦K.

Declarer then calls for the ♥J. Do you cover with your ♥Q or not?

Play the ♥4.

North has 5 ♥s and South must have at least 5. The reason you cover an Honor is that you hope to establish a lower card in either your hand or partner's hand. But your partner has one ♥ at the most so

Now that you have looked at the hands aren't you glad you didn't cover?

back toward his ♠Q, playing East for the ♠K. If he plays this way you will get two tricks and defeat the contract.

[showcards S:S4]

You are West. The bidding has been as shown.

You lead the ♥J, covered by dummy's ♥Q and won by East's ♥K. East wins the ♥A at the second trick and continues with a small ♥ ruffed by South.

South then plays the ♠4 from his hand. Do you play low? or play the ♠J to force dummy's ♠A?

Play the ♠3.

If South decides to finesse the ♠10 then you will still win the one ♠ trick which you are entitled to win.

However, with South holding the ♠Q it would be very logical for him to go up with the ♠A then lead

West	North	East	South
Pass	6NT		2NT
All Pass			
6NT by South			

[showcards N:S4]

You are East. The bidding has been as shown.

Partner led the ♥9, taken by dummy's ♥10. The ♠4 is then played from dummy. Do you play low? or split your honors?

Play the ♠J (or ♠Q).

You should always make a point count check as soon as you see dummy. South's 2NT promises 20 or 21 points, North has 14 and you have 3; total = 37 or 38. Therefore West must have either 2 or 3 points. He cannot have two Jacks because you can see all four of them. Likewise he cannot have a Queen because you can see three of them and his ♥ lead (top of nothing) denied that Queen.

It follows that West **MUST** have a King, and it must be ♣s or ♦s since he has denied any ♥ Honor.

Since West will definitely win his King, you need to take one trick yourself, and the best way to do that is to split your Honors to establish one ♠ winner.

South has no defense to this, but if you had played low he would have played the ♠10 and made the slam.
