When SOUTH gives immediate ♠ support, NORTH's thoughts naturally turn to slam. This is a good hand to use Blackwood on, so NORTH bids 4NT.

SOUTH's 5♦ answer shows one Ace, which NORTH cleverly deduces must be the ♣A.

NORTH bids 6♠ since SOUTH has not bid strongly enough to think about 7.

WEST expects to bid 2NT at his second turn, but EAST gives a positive 2♥ response and his thinking changes! First he supports ♥s, setting the trump suit.

EAST then bids 3♠, showing first round control. WEST tries 4NT (Blackwood) and EAST replies 6♣. This shows a ♣ void and one Ace, obviously the ♠A.

WEST bids 6♥, knowing they must lose the ♦A.

NORTH's jump to 4♣ is a Splinter bid, at least 4-card ♥ support, at least opening hand, and a ♣ Singleton or Void.

SOUTH bids 4NT, Blackwood.

NORTH's 5NT reply shows two Aces and a Void somewhere, obviously ♣s.

SOUTH counts thirteen tricks and bids 7♥.

WEST figures that if EAST holds two Aces he will bid the slam.

EAST only has one Ace, but she has something else just as good - a void in a suit which is higher-ranking than ♥s.

WEST manages to figure out that EAST has a ♠ void and bids the slam anyway.

NORTH may have a good hand but SOUTH merely gave a simple raise. Even if SOUTH has a maximum there won't be a slam.

EAST has a tough decision after the two
Control-showing bids.

If he uses Blackwood and WEST shows two Aces he
will be no better off, because he won't know if one of
the Aces is the useless ♠ A. Based on knowing that
WEST holds the ♦ A, he bids 6♥, hoping that he can
at least make that and that 7 isn't a laydown!
