This time NORTH has a minimum 1NT opener; a balanced hand with 15 points.

SOUTH has 9 points; he knows that the partnership is somewhere between 24 (9 + 15) and 26 (9 + 17). So he invites with a 2NT bid.

NORTH, with a minimum, declines the invitation by passing.

EAST has a strong hand, 20 points and balanced distribution. It is just right to open 2NT (20-21 points).

WEST adds her 2 points to EAST's promised number of 20 or 21. Since she doesn't reach the magic game number of 26 points she just passes.

SOUTH has an mid-range 1NT opener; a balanced hand with 16 points.

NORTH has 9 points. He bids 2NT, asking SOUTH to pass if she has 15 or bid 3NT if she has 17.

But SOUTH has 16 points, which leaves her with no clear choice. In this case she must decide whether her hand is a "good" 16 points or a "poor" 16 points. Since her supporting cards are mostly 10's, 9's and 8's she figures it as "good" and bids 3NT.

WEST has 20 points and 4-4-3-2 distribution, so he opens 2NT.

EAST has 8 points. She adds WEST's 20 or 21 for a total of 28 or 29, enough for game but nowhere close to the slam requirement. So she bids 3NT and WEST passes.

NORTH has a low-range 1NT opener; a balanced hand with 15 points.

SOUTH has 16 points; he figures the partnership holds either 31, 32 or 33. Obviously he wants to at least reach game, but if NORTH holds 17 points he wants to reach slam.

SOUTH bids 4NT. Since this is more than game it should be clear to NORTH that he is asking her to bid 6NT if she is at the top of her range. It is clear to NORTH, but with just 15 points she passes.

EAST has a minimum 1NT opening hand - balanced distribution with 15 points.

WEST has 9 points, which is not enough to bid game, but is worth making an invitational bid. So she says 2NT.

Since EAST is minimum he declines the invitation by passing.
