ELIMINATION PLAYS

ABOUT THE DEALS

Feel free to disagree with the bidding; remember that it is only there so as to get to a contract appropriate for some particular elimination play. In fact, the bidding is irrelevant except in Deals where the opponent's bids may influence your actions.

With both hands visible and the opening lead noted you are asked to make a Plan for each Deal. This is to get you started thinking about how you would play the hand.

There are four or five stages shown for each Deal.

You are always going to be the Declarer, playing in the South position.

ELIMINATION PLAYS SUMMARY

There are a lot of card combinations in Bridge in which you will be better off if the opponents make the first play in a suit than you would be if you must play it first. Here are three examples.

♦ K 10 3	♦ J 7 3	♦ K 10 3
♦ A J 7	♦ Q 5 2	♦ A 9 7

The first is the frequently occurring two-way finesse. If you play this yourself you have to guess which defender holds the Queen. If the defenders start the suit you automatically win all three tricks.

In the second example you'd like to win one trick, and it will be hard to do if you must start the suit. Perhaps one defender holds both the high honors and you can guess which one and lead through him. Or perhaps someone has a doubleton honor that you can deduce. But if the defenders break the suit you just play second-hand-low and can't miss winning one trick.

With the third example you have almost no chance of three tricks if you start. If they start the suit you play second-hand-low and the next defender must play an honor. You win and then finesse the other defender for the other honor, winning all three tricks when their two honors are divided.

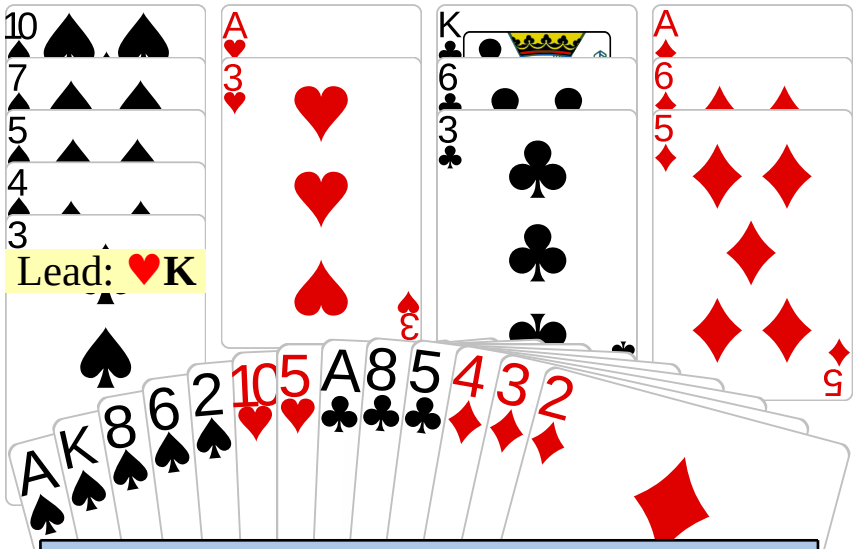

These are only three of many combinations that will benefit you if you can force the defenders to start the suit.
And that is what Elimination plays do; force the defenders to play a particular suit for you.

It works like this. You **strip** the defenders of all their "safe" exit suits, then you **throw-in** one of the defenders. If he has no safe exit, he will have to play a suit that will benefit you, perhaps one of the combinations above.

You will find that most elimination plays occur in suit contracts. This is because you can often pull all the defender's trumps while retaining at least one in both your hand and dummy. Then when the throw-in occurs the defense cannot play a suit of which you and dummy are both void because of the threat of a ruff and sluff.

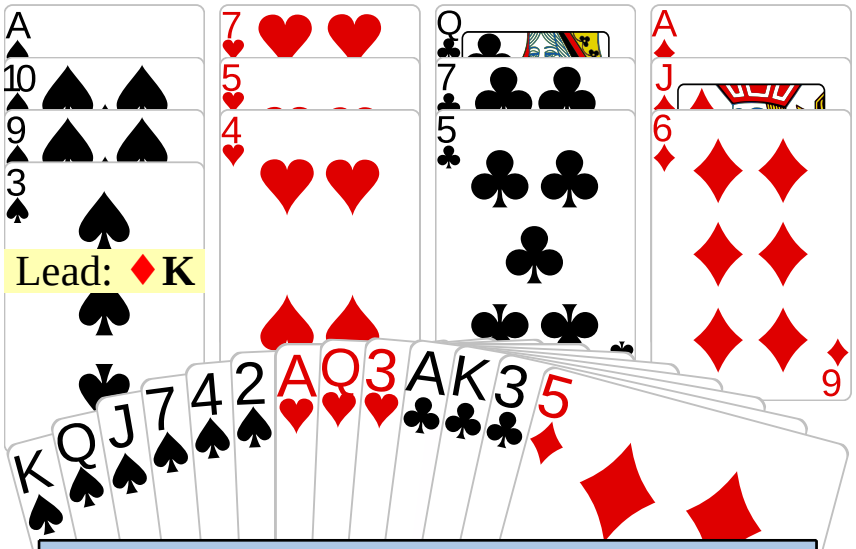

25 examples are probably worth more than 1000 words.

4♠ by North
Lead: ♥K

When the bidding gets high in a hurry you sometimes have to guess what you can make. North plays 4♠. East leads the ♥K.

And it looks like you are too high. Assuming the trumps split 2-1, you still have one ♥ loser, two ♦ losers and one ♣ loser.

You win the ♥A and play a ♠ to your ♠K. West discards a ♦!

From bad to worse. Now you must add a ♠ loser to the four you already had. Are you finished?

No, never give up. East has a bunch of ♥s and 3 ♠s, so he cannot have many ♦s and ♣s. If you can eliminate those and then throw him in it should work to your advantage.

Play your ♠A, the ♦A and the ♣ A K. East follows to everything.

You've done all you can do. Now play the ♥10 to East's high ♥.

East has just won his side's first trick with the ♥J. He now plays the ♠Q, winning his side's second trick.

Now, East is still on lead, and he has nothing in his hand but good ♥s.

So he leads the ♥Q.

You **DO NOT RUFF**. Instead you discard a ♣ from dummy and a ♦ from your hand. East has now taken his side's third trick. He plays another good ♥, and you ruff in dummy and discard the last ♦ loser from your hand. You can now cross-ruff for the rest of the tricks.

Incredible isn't it.

You just wonder how many bridge players would have just conceded down 2 on this hand.

Not you or me, of course.

1. Blackwood
2. 2 aces

6♠ by East
Lead: ♦K

West's 3♠ is a limit raise, 11-12 points in support of ♠s. When you discover that the raise includes two Aces you bid the slam. East plays 6♠. South leads the ♦K, won by you with dummy's ♦A.

Is this a really easy elimination play showing up this late in the group? Or are you just getting better at seeing them? In any case, you should see that a successful ♥ finesse will land your contract, but you should also remember that there aren't many finesses working on these 25 deals.

So rather than finesse, eliminate! Pull trumps in two rounds, ending in dummy.

Ruff the ♦6, then play ♣A, ♣K, ♣Q.

So here you are in dummy. Do you finesse the ♥ now?

North plays low.

Of course not. You play the ♦J and discard a small ♥ from your hand. South wins his ♦Q (which his opening lead told you he held) and is end-played. He must lead a ♥ to your tenace or give you a ruff-sluff.

The answer to the question posed above is:

It is a pretty simple problem, but you are no doubt getting a lot better.

4♥ by South
Lead: ♣K

North realizes that to make a takeout double, then jump in your own suit you must have a very good hand. So he bids the game. South plays 4♥. West leads the ♣K, which you take with the ♣A.

You have four losers. If you are thinking about leading toward your ♦K you are delusionary. West has the ♦A and you know it. Your best hope is to end-play West with the ♣10 and force him to break the ♦s.

Play one round of trumps with the ♥A. You can't play any more because you will need an entry to dummy for the elimination.

Next play ♠K, ♠A and ruff a ♠ high.

Lead a ♥ to dummy's ♥Q. West shows out. Play dummy's last ♠. East is now void, so if he ruffs you over-ruff. Otherwise you ruff with a small trump.

You are back in your hand.

Now throw West in (you hope!) with the ♣10.

Fortunately West has to take the ♣10. Since he has nothing left but ♣s and ♦s he must lead one or the other. A ♦ lead will give you a trick with your ♦K and a ♣ lead will allow you to ruff in dummy (East still has a ♣) and discard a ♦ from your hand.

Some problems are tougher than others, this being a tough one.

It was not a complete elimination since East still had a trump when you threw West in. However, it worked because West was out of both ♠s and ♥s.

West	*North*	*East*	*South*
1♠	Pass	4♠	
All Pass			

4♠ by West
Lead: ♦Q

West is to play 4♠. North leads the ♦Q.

South plays the ♦2 and you the ♦7.

North continues with the ♦J.

South plays low and you ruff with the ♠Q.

Unless North is real beginner South will hold the ♦A so you should not try the ♦K on this trick. And when North continues with the ♦J you should again duck in dummy, ruffing with an honor in your hand.

The contract is in danger if South holds the ♣A because you would have three ♣ losers to go with the ♦ already lost. One really good possibility is that South now has the lone ♦A and you can set up dummy's ♦K with a ruff.

So play a small ♠ to dummy's ♠9, (pulling the two outstanding trumps), and ruff another ♦ with an honor, hoping the ♦A drops.

Too bad, the ♦A did not fall so dummy's ♦K is not a winner. But it will still prove to be useful.

Play the ♥A, then ruff a ♥ in dummy. Play a trump to your ♠A and ruff your last ♥.

You are in dummy, just where you want to be.

South plays the ♦A.

Play the ♦K, and when South plays the ♦A don't ruff but instead discard a ♣ from your hand. You knew all along that he held the ♦A.

South is end-played, forced to either break the ♣s and give you a ♣ trick, or give you a ruff-sluff.

This was the toughest hand so far and the end-play depended upon your correct reading that South must hold the ♦A.

It also depended upon the defenders not switching to ♣s at the second trick. If North had decided to switch to the ♣Q you would have had no chance at all.
