All Pass			

3NT by North
Lead: ♠6

South's 3♦ bid was a transfer to ♥s, and his 2NT bid showed exactly 5 ♥s with an invitational strength hand. North is to play 3NT. East leads the ♠6, you play dummy's ♠9 and West contributes the ♠2.

Winners: ♠=2 ♥=0 ♦=1 ♣=2 Total = 5

The math is easy - you need 4 ♥ tricks. And you should be able to manage that by driving out the ♥A. But the defenders will probably hold up one or two rounds when you play on ♥s, so you must have an outside entry to dummy.

The ♠ Q J will provide that entry **IF** you make sure to win the first trick with your ♠A as an unblocking move. If you don't do so then East will be able to keep you out of the dummy and away from those good ♥s.

Suppose you allow dummy's ♠9 to hold the first trick, then start on ♥s. West will hold up the ♥A for 1 or 2 rounds. When he does win it he will return a ♠ and whether you play the ♠A or a low ♠ East will be able to prevent you from reaching dummy.

But if you win the first trick with the ♠A, then dummy's ♠ Q J will provide a guaranteed entry to the good ♥s.

3NT by East
Lead: ♠2

East is to play 3NT. South leads the ♠2, you play dummy's ♠4 and North plays the ♠8.

Winners: ♠=3 ♥=0 ♦=2 ♣=2 Total = 7

Needing just two more winners it looks straightforward to establish dummy's ♥ suit. Suppose you win the ♠10 and play the ♥9. If the defenders win this trick you are home free. You win their ♠ return with your ♠A, then continue ♥s to drive out their last stopper while you still have the ♠K as a dummy entry.

This won't work against good defenders, who will hold up on the first ♥ trick and win the second. Then when they continue ♠s you won't have another ♥ to return to dummy, so while you can use the ♠K as an entry to establish the ♥s you will never get back to use the good ones.

Instead you should win the first trick with your ♠A. Now when you attack ♥s a defensive holdup won't hurt you because you have **TWO** ♠ entries, the ♠J by a finesse and the ♠K.

South is almost certain to hold the ♠Q because his ♠2 opening lead promises an honor and the ♠Q is the only one you don't have.

So the ♠ finesse is an odds-on play to get a second dummy entry.

5♦ by South
Lead: ♠10

3NT would have been a lot easier, but you didn't get there. South is to play 5♦. West leads the ♠10.

East plays the ♠K and you ruff with the ♦2.

West plays low.

East shows out.

East covers with the ♠A.

Losers: ♠=0 ♥=1 ♦=0 ♣=2 Total = 3

The good news is that you only have one loser to get rid of. The bad news is that there doesn't seem to be a good place to put it.

Unlikely as it seems, your best candidate for establishment is dummy's ♠8. West is marked with 3 ♠s, and having led the ♠10 there is a good chance that he also has the ♠9. If so you can ruff it out.

Cover the ♠10 with dummy's ♠J, and when East plays one of his honors ruff in your hand. Play a trump to the ♦10, East showing out. Lead the ♠Q. East will be forced to play his other high honor, (if he doesn't you would discard a loser), and you ruff again.

Back to dummy with the ♦Q and ruff the ♠2 with a high trump just to be safe. West drops the ♠9 on this trick.

Pull West's last trump and enter dummy with the ♥A and **FINALLY** discard a loser on the now established ♠8.

When your only hope of making a contract is for the defender's cards to be a certain way, just assume that they lie perfectly for you and barge ahead.

Here you needed ♠ 10 9 x to be with West if you were to make the contract so you played for just that holding.

6♠ by West
Lead: ♠5

West is to play 6♠. North leads the ♠5.

Losers: ♠=0 ♥=1 ♦=1 ♣=0 Total = 2

First pull trumps with the ♠A and ♠Q, both defenders following. Next you must establish dummy's ♣ suit to get rid of one of your losers. If the suit splits 3-3 that will be easy since you have two dummy entries, one to get there to ruff the third ♣ and the other to get there to enjoy playing the winners. But ♣s will probably split 4-2 so the two entries won't be enough. Here's how to make the defenders help you establish the suit.

After pulling trumps, play the ♣ A K, then ♦A.

You exit with a small ♦ and South wins.

The defender who won the ♦ trick has a problem. If he plays another ♦ you will get a ruff-sluff, and if he plays a ♥ you will play for the ♥Q and ♥J to be in different hands. So he will probably play a ♣.

You ruff in your hand, play a trump to dummy's ♠K and ruff the ♣8, establishing the ♣9 while you still have the ♥ entry.

Notice that this Plan would also succeed if the ♣s had split 3-3.

This was a combination of Suit Establishment and End-play. The lesson on Eliminations contains a lot more of this type of hand.
