6♥ by South
Lead: ♠Q

North's 6♥ response to Blackwood showed one Ace and a ♠ void. South is to play 6♥. West leads the ♠Q.

East plays the ♠8 and you the ♠2.

Losers: ♠ = ?? ♥ = 1 ♦ = 0 ♣ = 0 Total = 1 ??

Of course you ruff the ♠ in dummy. West wouldn't underlead an Ace at a slam contract, and since you have a certain trump loser you cannot afford to lose a trick to East's ♠A.

Dummy has some great ♦s, but you can't expect to run them unless you have pulled all the trumps. But if you play ♥ A K 4 the defenders will take their trump trick and immediately set the contract with the ♠A. There **IS** a way around the problem.

East plays low.

West wins with the ♥J.

First off, you must get a 3-2 split in trumps because if they don't split 3-2 you will have two trump losers. So you assume that they are split just like you need them to be.

At trick two you duck a trump. That's right, you lose a trump trick early. Since you have to lose a trump sometime, you do it at a time when the defenders can't hurt you. So a defender wins the trump trick, but now a ♠ play won't hurt because dummy still has a trump to ruff with! In fact, whatever they play next you will win, pull the outstanding trumps, then run dummy's ♦ suit.

This is a very rare play, but a good one to remember.

When you have a trump loser but still need to pull their trumps, it may be better for you to lose an early trump trick rather than a later one.

6♥ by South
Lead: ♠J

Agreed that the bidding wasn't much. The final contract is still a good one. South is to play 6♥. West leads the ♠J.

Losers: ♠=0 ♥=0 ♦=0 ♣=4 Total = 4

There really aren't 4 ♣ losers since they can be ruffed in dummy. In fact you should see that this is an ideal cross-ruff hand, ruffing ♣s in dummy and ♦s in your hand. Since neither hand can be over-ruffed you expect to make all 8 trumps.

Remember, when playing a cross ruff, you need to take any side suit winners first, otherwise a defender may be able to discard that suit while you are ruffing. So you win the ♠A, then take the ♠K, then . . . what?

Losers: ♠=0 ♥=0 ♦=0 ♣=4 Total = 4

There really aren't 4 ♣ losers since they can be ruffed in dummy. In fact you should see that this is an ideal cross-ruff hand, ruffing ♣s in dummy and ♦s in your hand. Since neither hand can be
over-ruffed you expect to make all 8 trumps.

Remember, when playing a cross ruff, you need to take any side suit winners first, otherwise a defender may be able to discard that suit while you are ruffing. So you win the ♠A, then take the ♠K, then . . . what?

Well, if you win the ♠Q, then the two Minor suit Aces, you'd be set up to cross-ruff the hand out for all 13 tricks. But here's what might happen if you try.

East might ruff the ♠Q. OK, no disaster yet. But he might then play a trump. Your slam is now kaput. You can no longer make 8 trump tricks and will end up down 1.

The answer is to not be greedy for that overtrick. With West's opening ♠ lead there is an indication of possible length there. So, realizing that East could be short in the suit, take just the 2 ♠ tricks that you need for the slam, then play your Minor Aces and start the cross-ruff.

When playing a cross-ruff you must take all the side-suit winners you need early so they won't get ruffed later.

Don't jeopardize your contract trying to take too many.
