SECOND HAND PLAY

ABOUT THE DEALS

South will always be declarer and you may be either East or West.

Feel free to disagree with the bidding which is more or less Standard American, not 2-Over-1.

You are asked to study the information available and decide what you would play.

SECOND HAND LESSON

You should recall that the primary guideline from the Third Hand lesson was that

> Third hand should usually play a high card.

It won't surprise you that when you are Second Hand, playing immediately after Declarer or dummy has led a card to a trick, the guideline is just the opposite.

> When Declarer or dummy leads a low card the next player should usually play low.

It's called Second-hand-low and Bridge teachers have been saying it for ages.
Of course it isn't ALWAYS the best play, but many times it is.
Here are some examples to illustrate why Second-hand-low is usually correct.

	♠ Q 5 3	
♠ K 9 7 2		♠ A 10 6
	♠ J 8 4	

You are West, defending against 3NT, and at some point South leads the ♠4.
If you play your ♠K South will play a low ♠ from dummy, and later will be able to use the ♠Q and ♠J to create a ♠ winner.
If you play a low ♠ instead, East can beat dummy's ♠Q and South can never make a ♠ winner at all.

	♥ Q 5 3	
♥ J 9 7 4		♥ A 10 2
	♥ K 8 6	

This time you are East, and the ♥3 is led from dummy.
If you play your ♥A South will then have two winners, the ♥K and the ♥Q.
If you play low to this trick and save your ♥A to capture dummy's ♥Q you will hold Declarer to one trick in the suit.

Of course Bridge isn't so cut and dried that a little rule like Second-hand-low will always be the right

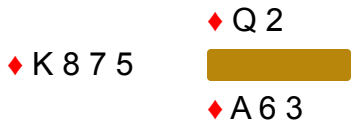

course of action.
The next two examples show a problem you will face frequently.

You are West, defending agains a ♠ contract. At some point South plays the ♦3.
If you go up with the ♦K South will be able to establish a ♦ winner with the ♦ Queen/Jack combination.

So here you should play low and South cannot win a single ♦ trick.

Compare this with the last example.

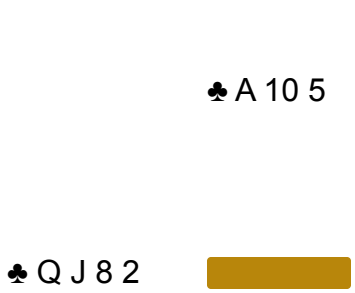

Again, South plays the ♦3 from his hand.
This time you had better go up or South will win with dummy's ♦Q and will not have a ♦ loser at all!

The problem is that from West's point of view the two deals appear identical (cover the East and South hands).
Perhaps West can get an idea which way to play based on the bidding, or perhaps South's play up to this point. If not he just has to guess whether to play high or low.

Splitting Honors

When you hold touching honors and you are playing before a higher honor in dummy you will have to decide whether or not to split your honors.

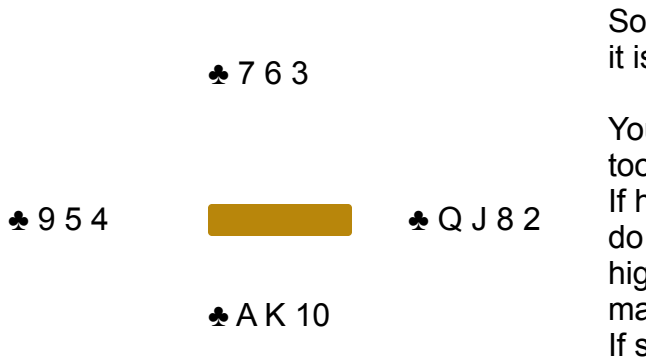

South leads the ♣4 toward dummy and it is your play.

If your partner has the ♣K then it doesn't matter what card you play.
South will only get one trick in this suit no matter what.

But if South has the ♣K he may decide to finesse dummy's ♣10 if you play a low card, and he could win a third trick in the suit.

To make sure that doesn't happen you play your ♣J (or ♣Q), splitting your honors and forcing dummy's ♣A. After this your other ♣ honor will be behind South's ♣K and will be good for one trick.

Now switch yourself to East and see how it looks.

South leads dummy's ♣3 toward toward his hand and it is your play.

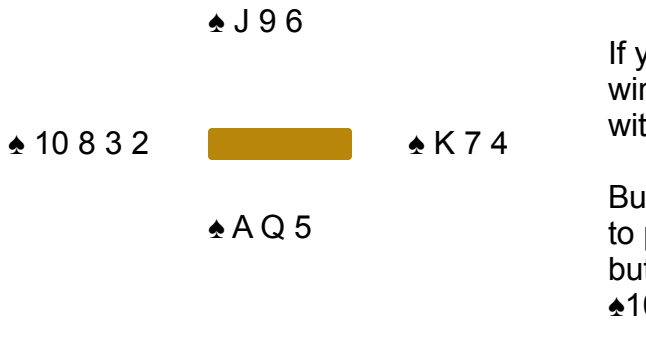

You may think you should split your honors this time too, but that will only help South.
If he wants to finesse his ♣10 there is nothing you can do about it. But for all you know he may plan to play a high honor, and if you put on one of your honors he may well figure out that you have both the ♣Q and ♣J. If so, he will later finesse your other honor.

So here you should play a low card.

> Do not split your honors unless you can tell from the cards you can see that it will ensure you win a trick.

Covering Honors

Another type of decision faces the defender in Second Hand when Declarer or dummy leads an Honor card.
The old guideline "Cover an Honor with an Honor" is usually correct.

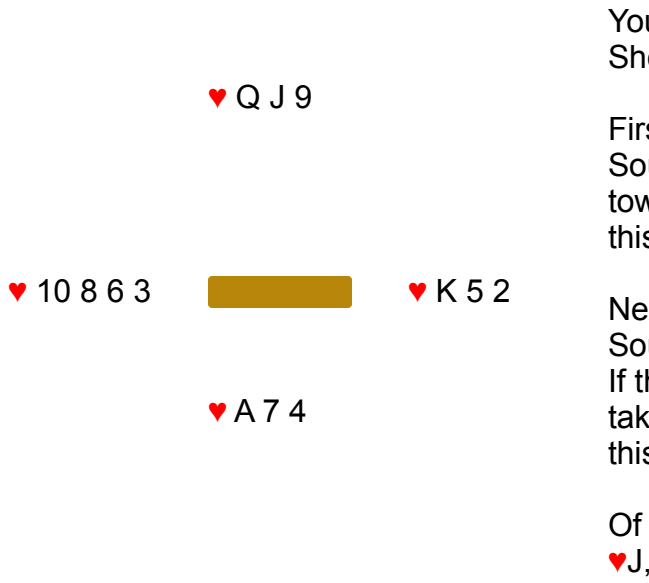

You are East and South leads the ♠J from dummy.

If you DO NOT play your ♠K South will play low and win the trick. He will then play another ♠ and finesse with his ♠Q and win all three ♠ tricks.

But if you cover the ♠J. with your ♠K South will have to play the ♠A to win the trick. He can also win the ♠Q but West will be able to take the third trick with the ♠10.

When Declarer leads one of touching honors from dummy the situation changes.

You are East and the ♥Q is led from dummy.
Should you cover or not?

First suppose you cover with your ♥K.
South will win his ♥A, and then will play a low ♥ toward dummy's ♥ J 9 and finesse West's ♥10. Played this way South will make three tricks.

Next suppose you DO NOT cover the ♥Q.
South will also play low and the ♥Q will win the trick.
If the ♥J is played next, you cover and when South takes the ♥A West's ♥10 will become a winner. Played this way South will only make two tricks in the suit.

Of course if the second play is a low ♥ rather than the ♥J, you would withhold your ♥K.

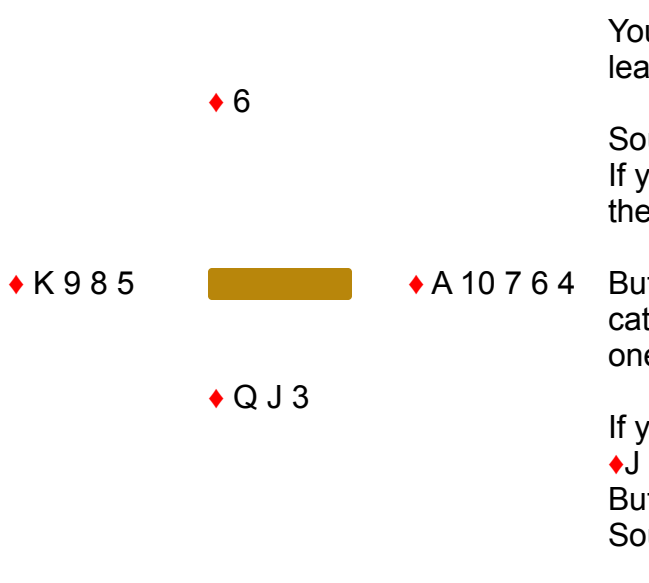

> You should usually cover the lead of a single Honor.
>
> If one of touching Honors is played it is usually best to only cover the final Honor in the sequence.

You have probably noticed that all these cute little guidelines have a lot of "usually"s thrown in.
The practice Deals will include many of the exceptions to the rule.

When Dummy has a Singleton: . . .
(. . . do you play your Ace?)

The knee-jerk answer is of course **YES**!
If you fail to take your Ace, Declarer might win his King and never lose a trick in the suit.

Look at some examples where the knee-jerk answer is wrong.

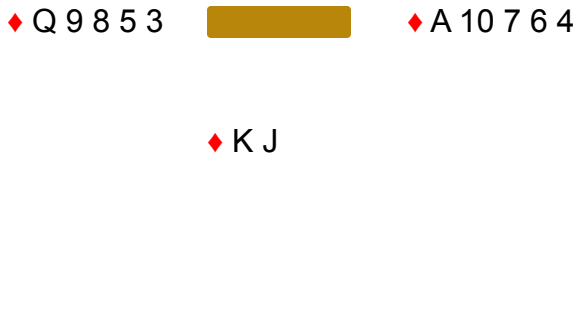

You're East, defending against a ♠ contract and South leads the ♦6 from dummy.

South might not even have the ♦K, as in this hand.
If you jump up with your ♦A, South will certainly lose the one ♦ trick that he was expecting to lose.

But now South still has the ♦ Q J which he can use to catch West in a Ruffing finesse. South will establish one of those cards for an extra winner.

If you correctly play a low ♦ South will have to play his ♦J (or Q), and West will take the ♦K.
But now, with you rather than West holding the high ♦, South cannot pull off the Ruffing finesse.

You're East, defending against a ♠ contract and South leads the ♦6 from dummy.

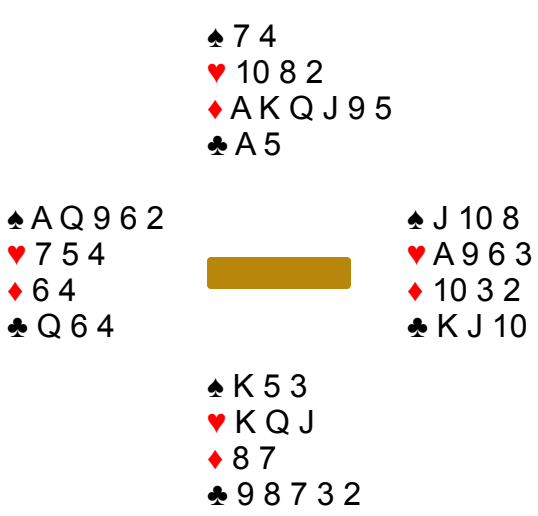

This time South DOES have the ♦K.
If you jump up with your ♦A, South will certainly lose the one ♦ trick that he was expecting to lose, but he will still have the ♦K to discard a dummy-loser on.

What if you play a low ♦?
South could now play his ♦K and avoid a loser in the suit.
But is that what he will do, or will he play the ♦J, thinking that West must hold the ♦A?.
Who knows?, but if you play low SMOOTHLY, without fiddling about, he is more likely to play the ♦J which your partner can win.

When dummy leads a singleton, and you are next to play it is usually best to refrain from playing your Ace.

Second Hand High:

Although Second Hand should play low most of the time, there are some exceptions.
For example:

You are East and South is playing 3NT.
West leads the ♠6, you play the ♠10 and South wins his ♠K.

South now goes over to dummy with a high ♦ and then plays the ♥10.

You must play your ♥A immediately. Dummy has 7 easy winners and South has already taken one trick.
If he has the ♥K that will be trick number 9.

Besides, from the Rule of Eleven you should know that South only had one high ♠, and he used it to win the first trick. So West's ♠ suit is ready to run. You grab the ♥A and play ♠s.

There are at least 2000 more words to be said about Second Hand play, but . . .
. . . wouldn't 20 Practice Deals be more worthwhile?

6♥ by North
Lead: ♦J

You are West. The bidding has been as shown, (wild).

Partner led the ♦J; ♦Q from dummy, ♦K from you and ruffed by North.

North then pulls two rounds of trumps, (East discards on the second one), followed by his ♠Q, dummy's ♠ A K and dummy's ♦A. North discards ♣s on the last two cards.

The ♣6 is then played from dummy and you must make a decision - ♣A or ♣2?

Play the ♣2.

You have a full count on North's hand. He started with 2 ♠s, 7 ♥s, and no ♦s. His other 4 cards must have been ♣s, and he has discarded 2 of them.

So he has 2 ♣s left in his hand. If one of them is the ♣K and you play your ♣A then you have handed him the contract.

By playing low you give him a guess to make. If he plays the ♣K he will make the contract, but if he plays the ♣J he will go down. He will probably play the ♣J, figuring you woudn't have the nerve to duck with the ♣A. He'll know better next time he plays against you.

holds ♠ A x x x.

You are South. The bidding has been as shown.

You lead the ♦5; ♦3, ♦10 and won by East with ♦K. East now leads the ♣9 from his hand

Play the ♣A.

First ask yourself "Where are the ♦A and ♦Q?"North doesn't have either one or he would have played it at the first trick. So East has both of them. So with those 3 tricks and the 5 ♥s in dummy East only needs to find one more winner. Assuming he has the ♣K, (or why play the suit), if you play low he will find that one more winner whichever high ♣ he plays.

Next ask yourself "Where is the ♠A?"Clearly North **DOES** have this card; otherwise East has his 9 tricks.

So the way to beat the contract is to go up with your ♣A, then play ♠K, ♠Q and a third ♠, hoping North

already won.

You are East. The bidding has been as shown.

Partner led the ♥4, won by South's ♥8.

South enters dummy with the ♠K and leads the ♦10. What do you play?

Play the ♦A.

You don't have much in your hand, but you do have the ♦A, and you also have the responsibility to help West set up his suit.

So even though you don't know for sure how good that suit is, your plan of action should be to take the ♦A and return a ♥.

As you see, this will defeat the contract. Had you played a low ♦ South would have pocketed that trick and added 4 ♣s and 3 ♠s to go with the ♥ he had

3NT by West
Lead: ♠7

You are North. The bidding has been as shown.

You lead the ♠7; ♠3, ♠2 and won by West with ♠Q.

West then plays the ♣6 from his hand. Which ♣ should you play?

Play the ♣J.

You should not allow yourself to be misled by West winning the first trick with the ♠Q. South does not hold either the ♠A or the ♠J or he would have played it. West is just trying to be deceptive.

That means you need the next ♠ play to come from South, so you play your ♣J and let South win his ♣A. You can be sure South has the ♣A because West would have played the suit differently if he held the Ace.

South will win the ♣A and return his ♠ through West's ♠ A Q. This allows you to set up your ♠ suit while you still have the ♣K for an entry.

6♥ by North
Lead: ♦Q

You are West. The bidding has been as shown. Partner led the ♦Q, you signaled with the ♦8 and North won the ♦A.

North then played low to dummy's ♠K, and led dummy's ♠6. Your decision is not whether to play high or low, but whether to ruff or not, which amounts to the same thing.

Do not ruff.

Even though North holds the ♠A, if you ruff now he will just put on a small ♠ and you will be ruffing a loser. Instead discard a ♦.

North will win the ♠A, but will not be able to ruff any ♠ losers in dummy because your trumps can overruff any of South's trumps.

Suppose you had ruffed the ♠. North would have played his ♠9, leaving himself with ♠ A J. He would then get the lead and pull your two remaining trumps. That would leave one trump in dummy to ruff his ♠J, his only remaining loser.

1NT by East
Lead: ♣K

You are South. The bidding has been as shown.

You lead the ♣K and continue with the ♣J then ♣Q, taken by East's ♣A. To trick 4 East plays the ♥4. What do you play?

Play the ♥Q.

To see why you should play the ♥Q, just visualize the result if you play low. East will finesse with dummy's ♥8. If North wins his ♥J on this trick there will be 4 good ♥ tricks in dummy. If North withholds his ♥J then Declarer will have 3 ♥ winners.

Now visualize the result of playing the ♥Q. Whether East takes this trick or not he cannot win more than 2 ♥s.
