4♠ by North
Lead: ♦A

When responding to a takeout double use these guidelines:0-8 points: bid a suit cheaply9-11 points: bid a suit with a jump12 or more points: cue-bid the opponent's suit

With 13 points you cue-bid 2♦. Partner says 2♥.

You are forced to game, now you must find a suit. Partner suggested ♥s, you suggest ♠s. Partner agrees ♠s and bids the game.

North plays 4♠. East leads ♦A, ♦K, ♦Q. West plays ♦8 then ♦2.

North plays 4♠. East leads ♦A, ♦K, ♦Q. West plays ♦8 then ♦2.

Losers: ♠ 0 : ♥ 0 : ♦ 3 : ♣ 1 : Total = 4

If you could ruff that ♦ then one of your ♦ losers would be eliminated - if West didn't over-ruff. But you know that West is going to over-ruff. So don't ruff it, discard dummy's ♣6 instead. Later you can ruff your ♣ loser in dummy.

If you had ruffed, West would have over-ruffed. And you would still have a ♣ loser. You don't have to worry about a fourth ♦ lead because you can ruff in your hand higher than any card West might ruff with.

3NT by East
Lead: ♥2

You have 13 points so you will definitely open the bidding. You don't open with a 4-card Major and you don't open with a 2-card ♣ suit. So this is the one distribution where you open a 3-card ♦ suit. Partner responds 2♣ and

Be very careful! You are tempted to now bid 2♥ or 2♠. Don't give in to the temptation. That would be a **REVERSE** - bidding a second, higher-ranking suit at the 2-level. You should have at least 16 points to reverse. Besides, if you trust partner you don't need to bid either of those suits anyway. If he had a 4-card Major he probably would have shown it on his first bid. No, your next bid is clearly 2NT. Partner raises to 3NT and you pass.

East plays 3NT. South leads the ♥2, North wins the ♥A and returns the ♥5. South takes the ♥K and plays the ♥7.

East plays 3NT. South leads the ♥2, North wins the ♥A and returns the ♥5. South takes the ♥K and plays the ♥7.

Winner count: ♠ 2 : ♥ 2 : ♦ 2 : ♣ 2 : Total = 8

You are glad the defense started with ♥s, that was a suit you would have had to play yourself. You need one more winner and your first thought may be that the ♠s are going to have to split 3-3. However, that happens only about 40% of the time so you keep looking. There is one more card that might be valuable, the ♣J. If North holds the ♣Q then you can make a trick out of the ♣J.

You are already in dummy with the ♥J so you lead a small ♣. If North plays low you will play the ♣J which will hold the trick and become your 9th winner. If North plays his ♣Q you will have the ♣J for your 9th winner later.

And if North doesn't have the ♣Q at all? then you **STILL** have the possibility of a 3-3 ♠ split.

As you see, this time the ♠s didn't split so you had to make the ♣J to succeed.

4♠ by South
Lead: ♥A

You open 1♠. West overcalls 2♥ and partner bids 4♠.

South plays 4♠. West leads ♥A, ♥K, ♥Q.

South plays 4♠. West leads ♥A, ♥K, ♥Q.

Losers: ♠ 1 : ♥ 2 : ♦ 1 : ♣ 0 : Total = 4

You have already lost the 2 ♥s and you will definitely lose the ♦. So you cannot lose a ♠ as well. When you have 11 cards in a suit missing the King, the recommended play is to play for the drop. But the recommended play shouldn't be used on this hand because you know that East has the ♠K. How do you know this? Because West has turned up with 10 points in ♥s, (the A K Q and a fifth one). If he held the ♠K as well he would have had 13 points and a good suit and would have opened he bidding. But he didn't open, so he doesn't have the ♠K.

Ruff the ♥. Play the ♦8 to dummy's ♦10. If East takes the ♦A win his return and enter dummy with the ♦Q. When in dummy lead the ♠Q and finesse East out of his ♠K.

You have to listen to the bidding and draw conclusions from what is bid - and not bid. Because he passed originally you could figure out that West could not hold the ♠K. Or, if you had needed to know, he could also not have had the ♦A.

4♥ by West
Lead: ♠K

Your first bid is easy, you say 1♥. But what do you say after partner's 2♥ response?

You have 18 points and partner has 6-10. Doing the math, you total 24-28.

You want to make a bid that will tell partner to bid game if he has 9-10, but will stop at 3♥ if he only has 6-7. Lots of players will bid 3♥ with this hand to make just that invitation. There's nothing wrong with that bid.

But there is an improvement. Bid 3♣ instead. Partner knows you aren't showing him a ♣ suit, why would you do that after agreeing on ♥s? What it means is "Partner I'm inviting you to bid the game if you have maximum, but if your decision is close decide based on ♣s, the suit I could use help in." It is called a **HELP SUIT GAME TRY**. Partner has 8 points and the ♣A and decides that is enough to bid game.

West plays 4♥. North leads the ♠K.

West plays 4♥. North leads the ♠K.

Losers: ♠ 1 : ♥ 0 : ♦ 1 : ♣ 2 : Total = 4

You win the ♠A and pull trumps in three rounds. You need to manufacture one winner and you can see right off the bat that it cannot be manufactured in ♦s or ♣s. However, you **CAN** set up the ♠8.

Lead the ♠10. North must win with his ♠J. Let's say he plays a ♣. Win with dummy's ♣A and play the ♠9, discarding a small ♣. North will take his ♠Q and cash a ♣ trick, but then must let you back in. You enter dummy with the ♦A and discard your ♦ loser on the good ♠8.

It is extra nice when the opponents hand you a contract.

You cannot make 10 tricks unless North's opening lead is a ♠.

1. Blackwood
2. 2 aces

6♠ by North
Lead: ♥Q

You don't quite have the strength for a jump-shift, and in any case sometimes it is better to proceed slowly. So you respond 1♠, knowing partner must bid again.

He does bid again, surprising you when he says 2♠.

All of a sudden your hand has become gigantic. Never mind points, you have only 5 possible losers in your hand and partner has opened the bidding. Surely he can take care of a few of them.

You want to try for slam. **DO NOT BID BLACKWOOD!** With two quick losers in ♦s you would not know what to do if Partner showed only one Ace. You wouldn't know whether the defense could take the first two ♦ tricks or not. A better approach is to use a control bid.

So you bid 3♣. Partner will absolutely know that you aren't bidding a ♣ suit, he knows you have already agreed on ♠s. He will take you to be showing first round control in ♣s, probably the ♣A.

Partner bids 3♦.

Partner's 3♦ is a control bid showing the ♦A. Do not even consider that he is trying to get back to ♦s, you both know that your suit is ♠s.

NOW you use Blackwood, knowing you are not in danger of losing two quick ♦s.

Partner replies 5♥, showing two Aces.

Your side has all the Aces but don't get greedy. Remember that partner made a minimum bid at his second turn. He couldn't have two Aces and three Kings.

So you bid the small slam.

North plays 6♠. East leads the ♥Q.

North plays 6♠. East leads the ♥Q.

Losers: ♠ 0 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 2

Too bad partner didn't have either ♥K or ♣K. But since he didn't you will just have to establish the ♦ suit.

You pull trumps in one round with your ♠K. Play ♦ A K, then ruff a ♦. if both defenders follow then both dummy's ♦s are good and you will make 7. However, it is more likely that ♦s will split 4-2, in which case you return to dummy with the ♠J and ruff the fourth ♦. Back to dummy with the ♠A and play the now-established ♦7, discarding either your ♥ or ♣ loser.

Establishing a long side suit in dummy is one of the basic ways to eliminate a loser.
