4♥ by North
Lead: ♣2

You certainly have a Notrump type hand, but you are too strong to open 2NT.

With 23 points you open 2♣. Partner says 2♦.

What is your next bid?

Now you show your 23 point, balanced hand by bidding 2NT. This is not forcing on partner, he might pass.

However, he doesn't pass, he says 3♣.

What is your next bid?

This is no different than a 3♣ bid after an opening 2NT. It is Stayman.

So you bid your 4-card ♥ suit and partner bids the game.

North plays 4♥. East leads the ♣2. The defense takes three ♣ tricks, then plays a small ♦.

North plays 4♥. East leads the ♣2. The defense takes three ♣ tricks, then plays a small ♦.

Losers: ♠ 0 : ♥ 1 : ♦ 0 : ♣ 3 : Total = 4

Since you've already lost the 3 ♣ tricks the Goal of your Plan is simple - **Don't Lose the ♥**.

That makes the card assumptions simple also - **West Must Have the ♥K.**

You only have one dummy entry so once you use it you must remain in dummy until you have finished finessing. If West has the ♥ K x you can't go wrong. If he has ♥ K x x you will have to play with care. And if he has ♥ K x x x you must play perfectly.

Enter dummy with the ♠K. Lead the ♥9 and let it ride. Assuming it wins, lead the ♥J and play your ♥10 under it. Now lead a small ♥ and finesse the ♥Q. This way you get all four ♥ tricks. No other way will work.

To prove that only the original ♥9 play will work . . **VISUALIZE**:

(1) That your first play from dummy was ♥J, and you played ♥3 from your hand. The next ♥ would have to be taken in your hand and you no longer have a finesse.

(2) That your first play from dummy was the ♥J and you played ♥10 under it. To stay in dummy one more trick you would have to play the ♥9 and put the ♥3 under it. But when you play the ♥9 West will cover with his ♥K. You can win with the ♥A but are left with ♥ Q 3 and the lead will be in your hand. You will lose a trick to West's ♥ 8 5.

1♣	Pass	2NT	Pass
3NT			
All Pass			

3NT by East
Lead: ♥7

With 13 points and good 4-card support you are strong enough to jump to 3♣.

However an 11 trick minor game is not as attractive as a 9 trick Notrump game, so you should also consider a jump to 2NT.

Looking at all those Kings should sway you to 2NT. You prefer to be declarer on this hand so the opening lead comes up to one those Kings. Partner bids 3NT.

East plays 3NT. South leads ♥7, North plays ♥10 and you win ♥J.

East plays 3NT. South leads ♥7, North plays ♥10 and you win ♥J.

Winners: ♠ 2 : ♥ 1 : ♦ 2 : ♣ 2 : Total = 7

The opening lead gave you 1 ♥ trick. If ♣s split 2-2 you can make 10 tricks! But wait, you only need 9 tricks. What if you play 2 top ♣s and it turns out North has ♣ Q x x ? He could win the next ♣ and lead a ♥ through your ♥ K 9. That would not be good.

So North is the Danger hand and he must be kept out of the lead. At trick two cross to dummy with the ♣A. Then play the ♣J, letting it ride if North doesn't cover. If South has the ♣Q you will lose the trick but he cannot play ♥s without setting up your ♥K. You will win 4 ♣ tricks and the game. If North actually does have the ♣Q you will make an overtrick.

EIGHT EVER, NINE NEVER ???.

That old guideline says you should finesse for a missing Queen when you and partner have eight cards in the suit, but play for the drop when you have nine.

All else being equal, it's a good guideline. But sometimes all else **ISN'T** equal, like in this hand where you absolutely must not let North get the lead.

5♦ by South
Lead: ♣J

You open 1♦ and partner responds 1♥.

What is your next bid?

With 18 points you are too strong to rebid 2♦ but just right to jump to 3♦. Now partner raises to 4♦.

What is your next bid?

Your jump showed 16 - 18 points and partner invited you based on that range. He wants you to bid game if you are at the top. With 18 points you bid 5♦.

South plays 5♦. West leads the ♣J and East plays the ♣K.

South plays 5♦. West leads the ♣J and East plays the ♣K.

Losers: ♠ 1 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 3

The ♣ lead was pleasant, it gave you a free finesse. But it didn't really give you a winner since you would have ended up taking the finesse yourself even without the lead. Still, it clears the position somewhat.

You can't get rid of the ♠ loser, nor can you get rid of the ♥ loser. By process of elimination then, you must get rid of the ♣ loser. You could ruff it in dummy, but the play to the first trick makes you a little worried about an over-ruff by East. You could ruff with the ♦A, but then if someone started with ♦ J 10 8 you'd lose a natural ♦ trick.

First test the ♦s by playing the ♦K. West shows out and there goes your hope of ruffing the ♣ with the ♦A. You have one more possibility to try. Play the ♥A, then a small ♥ toward the ♥Q. If West holds the ♥K dummy's ♥Q will be promoted to a winner that you can dump your ♣ loser on.

As you can see, if you ruffed the third ♣ with a low ♦ East would over-ruff.

If you ruffed the third ♣ with the ♦A East would win a trump trick.

So you couldn't ruff the third ♣ at all, you had to discard it on something. And the only "something" that dummy had was the ♥Q.

1. Blackwood
2. 1 ace

6♠ by West
Lead: ♣J

This is definitely a 2♣ opening bid.

Partner responds 2♦, 7 points or less.

The formalities are over. Partner knows you have 22 or more points and you know he has 7 or fewer. Time to find a suit.

You bid 2♠ which partner raises to 3♠.

Partner's 3♠ bid is forward-going. With a complete bust he would have said 3♣ as a "second negative". So you use Blackwood. Partner shows one Ace and you bid the slam.

West plays 6♠. North leads the ♣J.

West plays 6♠. North leads the ♣J.

Losers: ♠ 0 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 2

Between the ♥ loser and the ♣ loser which one can you eliminate? Easy question, fast losers like the ♥A are tough to eliminate. Usually you work on those slow losers.

The logical way to remove that ♣ loser is to ruff it in dummy. But do it carefully. It would be silly to play ♣A, ♣K, ♣Q and then try to ruff the ♣4. That is just begging for an over-ruff. It would be better to just take two rounds of ♣s, then ruff the ♣4. But even that isn't the best.

First take two rounds of trumps with the ♠A and ♠K. Then play two top ♣s. Only then do you ruff the ♣4.

You only needed one trump in dummy to ruff your one ♣ loser, so that made it right to pull two rounds of trumps first.

It made no difference in tricks whether you ruffed the third or fourth ♣ so that made it right to ruff the third one.

All Pass			

4♠ by North
Lead: ♦A

Partner has 20-21 points, so with your 6 you belong in game. But which game?

You use Stayman convention to try to find out. Partner responds 3♠.

You have at least 26 combined points and 8 ♠s. So you bid 4♠.

South would play 4♠.

North plays 4♠. East leads ♦A, ♦K, ♦4. West wins the third trick with ♦Q and plays a ♥.

North plays 4♠. East leads ♦A, ♦K, ♦4. West wins the third trick with ♦Q and plays a ♥.

Losers: ♠ 0 : ♥ 0 : ♦ 3 : ♣ 1 : Total = 4

Since you've already lost the three ♦s you'd better not lose the ♣.

You must find West with the ♣K and you must be able to finesse three times. That means three dummy entries and they all must come from the trump suit.

Play the ♠A, then lead the ♠8 to dummy's ♠Q. Notice that you must save your ♠6. Pay attention to whether both defenders follow to both tricks. They do, and that means there is only one ♠ left out. Play a ♣ and finesse the ♣10. Now lead the ♠J to dummy's ♠K. Finesse the ♣J. Finally, lead the ♠6 to dummy's ♠7. Finesse the ♣Q. Claim the rest.

This was not an easy plan.

The first part is realizing that you need to have three entries to dummy.

The second part is figuring out that the ♠ suit could provide them.

4♥ by East
Lead: ♠2

Don't even think of jumping to 2♥. That would show 17+ points. Instead you just bid 1♥, knowing partner is forced to bid again.

Partner does bid again, saying 2♥.

Partner's rebid promises a minimum opening bid (13-15) and four ♥s. That makes your total about 28 points and ten ♥s. So you bid game.

East plays 4♥. South leads the ♠2, North playing the ♠Q.

East plays 4♥. South leads the ♠2, North playing the ♠Q.

Losers: ♠ 1 : ♥ 0 : ♦ 2 : ♣ 1 : Total = 4

If the ♣ finesse works you have no ♣ loser, and as a bonus you will be able to discard one of your other losers. Even if the finesse fails you still have an extra winner for the discard.

Is there a danger here? Yes. Suppose you win the first trick, pull trumps, then finesse the ♣. North might win and play a ♠ back to South's hand. And South might then lead a ♦ through dummy's ♦K.

South is the Danger Hand. You want to keep him off the lead. His only possible entry is the ♠ suit, so all you have to do is hold up on the first trick. Win the second ♠, pull trumps as before, and finesse the ♣. North wins but cannot get to his partner's hand for the killing ♦ lead. You will discard one of your ♦ losers on dummy's fourth ♣.

You usually think of a hold-up play in a Notrump contract, trying to exhaust one defender of his partner's suit.

For this deal the hold-up serves a different purpose. It keeps one defender from ever gaining the lead.

You had to lose one ♠ in any case, so you just choose to lose it to the defender who cannot hurt you.

Notice that the Danger Hand **WAS** on lead at one point - the opening lead. If South had been clairvoyant enough to lead a ♦ the contract could have been beaten. Opening leads are important to the defense.
