NOTRUMP OPENINGS

These 100 Deals are all about hands that are either opened 1NT or 2NT, or perhaps overcalled 1NT or 2NT. Some of them end up being played at a Notrump contract, but others are played with a trump suit.

The proficiency level for the Deals is Intermediate/Advanced, both in the Bidding and Declarer play.

ABOUT THE DEALS

With both hands visible and the opening lead noted you are asked to make a Plan for each Deal. You should think this through just as if you were at the table.

All of the Notrump Plans include a Winner Count and all Suit Plans include a Loser Count.

During the Bidding section you are in the South position. As a result of that some of the Deals would end up with your partner North as the Declarer.

ABOUT THE BIDDING

Normal 4-3-2-1 point count is used, with 1 length point added for any card more than 4 in any suit.
1NT Opening: 15-17 points
2NT Opening: 20-21 points
1NT Overcall: 15-18 points, at least 1, (preferably 2), stoppers in their suit
2NT Overcall over a Weak 2-bid: 15-18 points, at least 1, (preferably 2), stoppers

Stayman convention is used extensively.

Jacoby Transfers are used extensively.
In addition to the standard 2♦ transfer to ♥ and 2♥ transfer to ♠ we also use a 2♠ transfer to 3♣.

The **lebensohl** convention is used when opponents overcall your side's 1NT opening.
Since this is not a standard for many of you, a brief explanation/comment is given when it occurs.

You can go either go through the deals in order, or use the Navigation Bar at left.

3♦ by North
Lead: ♠Q

In the old days (before transfer bids) you could have just bid a "drop-dead" 2♦. But those days are gone so you must improvise. You bid 2♠, transferring partner to ♣s.

Partner says 3♣;

In the old days (before transfer bids) you could have just bid a "drop-dead" 2♦. But those days are gone so you must improvise. You bid 2♠, transferring partner to ♣s.

Partner says 3♣;

You now bid 3♦ and partner knows to pass.

North plays 3♦. East leads the ♠Q. West overtakes and plays ♠ A K 9.

Loser List: ♠ = 2 : ♥ = 1 : ♦ = ? : ♣ = 0 :: Total = 3 + ?

Rather than trying to figure out how many losers this ♦ holding may produce, approach it from the other direction; you can only afford ONE loser, so you assume the cards lie in a way that will give you that result.

That means that the ♦s must be splitting 3-2, and it also means that you must knock out the ♦A without using either the ♦K or ♦Q. Can you do it?

Your only hope is for East to hold a doubleton ♦ A x. You ruff the third ♠, then play a small ♦ toward dummy's ♦Q. When this wins the trick, play another ♦, and duck in your hand. If East's ♦A falls you will be golden.

There are times when your only hope of making a contract is if the defender's cards lie in a particular way.

When this happens you should play as if they actually **DO** lie in that way, even though it may be against the percentages.

This hand is a perfect example - your only hope was for East to hold ♦ A x, so - you base your plan on East holding ♦ A x.

3NT by East
Lead: ♥6

With 9 points and a 5-card Major suit you should definitely transfer, so you bid 2♥. Partner replies 2♠.

With 9 points and a 5-card Major suit you should definitely transfer, so you bid 2♥. Partner replies 2♠.

Now you complete the sequence by bidding 2NT, trusting partner to put it in the right place. He has maximum points and a doubleton ♠ so he puts it in 3NT.

The contract would be 3NT played by West.

East plays 3NT. South leads the ♥6, North follows with the ♥5. What will you play from dummy? And what will you play from your hand.

Winner List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 2 :: Total = 5

It's not as bad as that Winner List looks; you can establish 4 ♠ winners very easily.

In fact, it looks so good you might wonder what could possibly go wrong. Here's something that can go wrong. The defenders take the **SECOND** ♠ trick with their ♠A. Can you get back to dummy for those other three winners?

Maybe you can and maybe you can't. It depends on what you played from your hand at the first trick. If you won that trick in your hand with the ♥A, then YES, you can get to dummy by leading twice toward the ♥ Q J.

But if you won the first trick more cheaply with your ♥10, (or perhaps dummy's ♥J), and you still have that ♥A in your hand then South will prevent you from ever getting to dummy.

It is ingrained in Bridge players to win tricks with the smallest card possible. And while that is usually a good idea it can sometimes be a huge mistake.

Suppose you win the first trick with your ♥10. If you later play your ♥A then South's ♥K will stop you from getting to dummy. But if instead you play a small ♥ toward the ♥ Q J South will grab his ♥K and your own ♥A will block your entry.

But if you take the first trick with a "spendthrift" ♥A then dummy's ♥ Q J will become a guaranteed entry to the ♠s.

And notice - no matter which way you play it you still end up with exactly 2 ♥ tricks. So the play doesn't cost a trick, it just gains an entry.

6♠ by South
Lead: ♥Q

With a maximum 2NT opener, 4 of partner's ♠s and a doubleton you jump to 4♠, the Super-Accept.

Partner wastes no time bidding the slam.

South plays 6♠. West leads the ♥Q. West finds their best lead, exposing your ♥ loser. With a different lead you could have led toward dummy's ♦J, but not now.

Loser List: ♠ = 0 : ♥ = 1 : ♦ = 0 : ♣ = 1 :: Total = 2

A very simple Plan would be for you to pull trumps and then guess who holds the ♣Q. Simple, but putting your slam on a 50% chance isn't very satisfying.

How about an elimination play instead? Win the ♥A. Then play to dummy's ♠K. West shows out and you must temporarily stop drawing trumps.

For the elimination play to work you must strip ♦s from both hands. So play both the ♦ A K, then ruff a ♦ with the ♠Q. Pull trumps with your ♠ A J, then ruff the last ♦ in dummy.

The work is done. Just play a ♥. Whichever defender wins must either play a ♣ into your split tenaces, or play a red card and give you a ruff/sluff.

This is the complete Deal.

If you knew who held the ♣Q then you wouldn't have to learn Elimination plays.

These are the hands after the trumps have been pulled and ♦s eliminated from both North and South.

You now play the ♥, eliminating that suit from both hands. Whichever defender wins the trick must either play another ♥ and give you a ruff/sluff, or play a ♣ and give you a free finesse. Either way you will make the slam.

All Pass			

3NT by West
Lead: ♣2

Partner has 20 or 21 points, balanced, and you have 6. You bid 3NT, hoping partner has ♦ K Q x.

The contract would be 3NT played by East.

West plays 3NT. North leads the ♣2 and South plays the ♣J.

Question 1: Do you hold up?

Winner List: ♠ = 3 : ♥ = 1 : ♦ = 1 : ♣ = 2 :: Total = 7

The lead of the ♣2 tells you that North has only a 4-card suit, so there is no need to hold up. In fact if you did hold up South might play an unwelcome ♥ back.

Your best bet is going to be the ♦ suit, but dummy isn't exactly loaded with entries. How will you manage it?

When entries are really scarce the best approach is ducking. Win the ♣K and play a low ♦ from both hands. A defender will win this and probably continue with a ♣.

Stick to the plan. Win the ♣A and again play small ♦s from both hands, relaxing when both defenders follow suit to the second ♦.

They can now cash their 2 ♣s, and you had to give them 2 ♦s. But that's the only tricks they will get. Dummy's 3 ♦s are good and you still have a ♦ in your hand to get there.

When dummy has a long suit with no outside entries, always consider using a duck to make up for the lack of entries.

In this case it was a double-duck.
