NOTRUMP OPENINGS

These 100 Deals are all about hands that are either opened 1NT or 2NT, or perhaps overcalled 1NT or 2NT. Some of them end up being played at a Notrump contract, but others are played with a trump suit.

The proficiency level for the Deals is Intermediate/Advanced, both in the Bidding and Declarer play.

ABOUT THE DEALS

With both hands visible and the opening lead noted you are asked to make a Plan for each Deal. You should think this through just as if you were at the table.

All of the Notrump Plans include a Winner Count and all Suit Plans include a Loser Count.

During the Bidding section you are in the South position. As a result of that some of the Deals would end up with your partner North as the Declarer.

ABOUT THE BIDDING

Normal 4-3-2-1 point count is used, with 1 length point added for any card more than 4 in any suit.
1NT Opening: 15-17 points
2NT Opening: 20-21 points
1NT Overcall: 15-18 points, at least 1, (preferably 2), stoppers in their suit
2NT Overcall over a Weak 2-bid: 15-18 points, at least 1, (preferably 2), stoppers

Stayman convention is used extensively.

Jacoby Transfers are used extensively.
In addition to the standard 2♦ transfer to ♥ and 2♥ transfer to ♠ we also use a 2♠ transfer to 3♣.

The **lebensohl** convention is used when opponents overcall your side's 1NT opening.
Since this is not a standard for many of you, a brief explanation/comment is given when it occurs.

You can go either go through the deals in order, or use the Navigation Bar at left.

4♠ by North
Lead: ♣Q

♦Q? and if so, which way do you finesse?

Partner transfers and you naturally respond 2♠. Partner bids the ♠ game and you pass.

North plays 4♠. East leads the ♣Q. West plays the ♣8 and your first decision is whether to hold up.

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 1 :: Total = 4

You should certainly hold up. West is the Danger hand here because if West ever gets the lead he can play a ♥ through your unprotected ♥K, possibly giving you two ♥ losers. If you take the first trick with the ♣A you open the door for West to gain entry with the ♣K which you know he has.

Next pull three rounds of trumps. Fortune smiles and they split 3-2.

Now it's time to play on ♦s. Do you finesse for the

Missing 6 ♦s to the Queen of course you should finesse. And you will finesse through West, of course, because he is the Danger Hand. So play dummy's ♦K, then play the ♦10 and let it ride.

This time West holds the ♦Q and you make an overtrick, winning 4 ♦ tricks and discarding a ♥ loser from dummy.

Another time East will hold the ♦Q and you will make the contract, but no overtrick.

3NT by East
Lead: ♥3

With 9 points and a balanced hand you go into Invitational Mode. Bid 2NT. Partner will raise to 3NT with a maximum, pass with a minimum. Today he has a middling 16 points, but bids 3NT anyway.

The contract would be 3NT played by West.

East plays 3NT. South leads the ♥3 and North plays the ♥K.

Do you hold up or not?

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 3 : ♣ = 1 :: Total = 6

You count 3 ♦ tricks but will need to be careful to get all 3. And obviously your three extra winners will have to be from the ♣ suit.

Most important for now, how do you read the ♥ suit? Do you hold up?

South has 4 ♥s because he led the ♥3 and you can see the ♥2. Therefore you should NOT hold up because they can only win 3 ♥s and the ♣K right now. But if you hold up, North might pocket his ♥ trick and switch to ♠s, where you are just as bad off.

So win the ♥A and unblock the ♦ A Q. then play ♣J, expecting to lose the trick. In fact, South takes his ♣K.

South cashes his 3 ♥ tricks, then plays a ♠. Pounce with dummy's ♠A, cash the ♦K, then take your 4 ♣ tricks and the game.

It was tempting to get over to dummy to try the ♣ finesse. But it was a temptation which had to be ignored. After all, how would you get to dummy? By wasting a ♦ winner? Or by using your only ♠ stopper?

Not all finesses should be taken - certainly not this one.

Another possibility, playing ♣A first, should also be rejected. On the rare day where the ♣K fell singleton you might be happy, but on the more frequent days where a defender held ♣ K x x and took the third ♣ trick you'd feel like a complete fool. Rightly so.

3NT by South
Lead: ♠8

= 5

A takeout double would not be a terrible bid. But if you don't overcall 1NT right now it will be hard to later convince partner that you have 17 points balanced. So you bite the bullet and say 1NT. Partner now bids 2NT.

A takeout double would not be a terrible bid. But if you don't overcall 1NT right now it will be hard to later convince partner that you have 17 points balanced. So you bite the bullet and say 1NT. Partner now bids 2NT.

There is no point bidding ♥s; you are absolutely sure that partner does not have four of them. He has told you to bid 3NT with a maximum so you bid 3NT.

South plays 3NT. West leads the ♠8. Of course West leads his partner's suit.

Winner List: ♠ = 2 : ♥ = 1 : ♦ = 0 : ♣ = 2 :: Total

When the going gets tough, the tough better figure out a good plan! Although you MIGHT manage to get an extra trick in ♥s or ♣s, you can see that your only real chance is to find a distribution that will give you 4 ♦ tricks. With that in mind, where do you win the first trick?

Without thinking it through you might decide to save that entry to dummy and win the first trick in your hand. But to get the 4 ♦ tricks you need you are going to have to make them play their ♦A WITHOUT using one of your two honors. That means the ♦A must be doubleton, AND you must lead through it. And EAST is the one most likely to hold ♦ A x.

You win dummy's ♠K and play a low ♦. When East follows with the ♦3 you play your ♦Q which wins.

Then play a low ♦ from your hand, and **DUCK IN DUMMY**. East plays the ♦A on this trick and you are now home-free!

When you bid boldly you will get into a lot of contracts that are . . . . challenging.

Sometimes you must try to visualize some possible distribution of the defender's cards which will allow you to make your bid and then just go ahead and play for that distribution.

4♥ by West
Lead: ♥2

With two 5-card Major suits you can transfer to either one first. A good system is to use the "weaker" transfer to show an invitational hand, the "stronger" to show a forcing to game hand.

So you bid 2♥ and partner replies 2♠. What next?

With two 5-card Major suits you can transfer to either one first. A good system is to use the "weaker" transfer to show an invitational hand, the "stronger" to show a forcing to game hand.

So you bid 2♥ and partner replies 2♠. What next?

Partner now knows you have 5 ♠s, so you now bid 3♥ which lets him know you have 5 of that suit also. Partner chooses the ♥ game.

West plays 4♥. North leads the ♥2. South wins the first trick with the ♥A and returns the ♥4.

Loser List: ♠ = 2? : ♥ = 1 : ♦ = 1 : ♣ = 0 :: Total = 4?

You are surely going to lose the two red Aces, so you must keep the ♠ losers to 1. A possible Plan is to pull the last trump and trust the ♠s to split 3-3. Good Plan?

Stinking Plan. The chance of a 3-3 ♠ split is 36%, just a little over 1 in 3. A much better idea is to leave that trump out for a while longer, take your ♠ A K, and ruff one ♠ with dummy's last ♥. Then what?

Be careful, you are still in danger. You need to pull that last trump but playing ♣A and a ruff at this point could result in you losing trump control. First you need to establish a ♦ trick, so play the ♦K.

South wins the ♦A but he can't hurt you. Suppose he plays another ♦. You win in dummy, ruff a ♦ back to your hand, and pull North's last trump. Then play a ♠ to South's ♠Q. Your fifth ♠ is now established and you still have a trump to get to your hand with.

Suppose you ruffed a ♠ in dummy then returned to your hand by playing the ♣A, then ruffing a ♣.

You must then pull North's last trump, leaving you with only one trump.

When you give up the ♠ to South he could play a ♣, forcing you to use your last trump, and although you could take your ♠ winner you wouldn't have the ♦ trick established. Not an easy hand.
