7NT by North

become the odds-on favorite to hold the ♠ Guard. His ♠ discard makes it very likely that he started with 5 ♠s.

North is to play 7NT. East leads the ♥K.

With 12 obvious tricks your first thought should be that perhaps the ♠s will split 3-3.

Then, your second thought should be that dummy's ♥J is a Threat against East's ♥Q, so if it is East who holds 4 ♠s you will be able to squeeze him.

Since the contract is 7NT you take the first trick with the ♥A.

With one trick in the bag you should test ♦s next. When you play the ♦A West discards a ♠.

You continue with the ♦Q and ♦K, West discarding a ♥ and a ♣.

Since West has shown up with a ♦ void he has become the odds-on favorite to hold the ♠ Guard. His ♠ discard makes it very likely that he started with 5 ♠s.

To find out for sure you play ♠A, then ♠Q. Sure enough East discards a ♥ on the second round.

You can't squeeze East in ♥s and ♠s because he doesn't hold the ♠ Guard, West does.

But now a completely new possibility shows up. Say to yourself, over and over, "East must guard ♥s, and West must guard ♠s. Nobody can guard ♣s."

You start playing dummy's ♦ winners.

With one more ♦ in dummy, things look like this.

When you play the ♦5 West must keep both ♠s to guard against your ♠7. So he discards the ♣6, hoping partner can stop that suit.

Your ♠7 is now worthless so you throw it.

East has no problem, (yet), he discards the ♥10.

[showcards N:S5,HJ,CK,C7 E:SJ,ST,CQ,CT S:SK,CA,C8,C4 W:HQ,CJ,C9,C5]

It is now time to pressure East.

Play dummy's ♠5 to your ♠K.

East MUST keep his ♥Q so he releases his ♣5.

And you win the last three tricks with ♣K, ♣A, ♣8.

This is called a Double Squeeze.

Play 4 rounds of ♦ s.

[showcards N:S9,H6,D4,C8 E:HQ,H9,H8,CJ S:S7,HA,HK,H5 W:SJ,HJ,HT,H7]

On the fourth ♦ North had to discard a ♥. You discarded a small ♠. South discarded a ♠ on the third ♦ and a ♥ on the fourth.

Play dummy's ♦ 4. North cannot throw the ♣J or he will set up dummy's ♣8, so he discards a ♥.

You discard the ♠7.

Now South is squeezed. He cannot discard the ♠J or he will set up dummy's ♠9, so he discards a ♥.

You win the last three ♥ tricks with another Double Squeeze.

East is to play 7NT. South leads the ♠Q.

One more winner is needed. Dummy's fourth ♣ is a possibility.

So take the ♠K and play ♣ A K Q.

South discards a ♠ on the third ♣.

Now you know North guards the ♣s.

Before tackling ♦ s, see what you can discover about ♠ s.

Play the ♠A. North discards a ♥.

North guards the ♣s. South guards the ♠s. Nobody can guard the ♥s.

6♥ by South			

Now play the ♦A, ♦K, and ♦Q, discarding the ♣3 from your hand.

Then lead dummy's ♣7 to your ♣K.

[showcards N:ST,CA,C9 E:DJ,D9,CJ S:HA,C8,C6 W:SJ,CQ,CT]

Here you are in your hand.

Only West can guard dummy's ♠T, and only West can guard dummy's ♣9.

So you play your ♥A and West must give up one of his guards. If he holds on to the ♠J then you toss dummy's useless ♠T. If he throws the ♠J then you toss dummy's ♣9.

South is to play 6♥. West leads the ♠A, then ♠K.

When you looked at just your and dummy's cards on the previous page it may have looked impossible to find a twelfth winner.

Even looking at all four hands here it is still very difficult to come up with a plan.

Here's a hint: If West holds 3 ♣s, (and you see that he does), can you squeeze him in ♣s and ♠s?

Of course you ruffed the ♠K.

The big problem with trying to squeeze West in the black suits right now is that East actually holds a ♠ guard. But you can fix that.

Play dummy's ♥Q and ♥10, then ruff a ♠, then pull the last trump.

3NT by West
you.

West is to play 3NT. North leads the ♠3. South plays the ♠5.

From the opening lead of ♠3 and South's play of ♠5 you should have deduced that North held five ♠s to the A K. Therefore if you lose a trick in any other suit North will be able to take 4 ♠ tricks and defeat you.

You have 8 winners, and if South holds 4+ ♥s AND 3+ ♦s then only he can guard the two suits.

But how can you squeeze him?

The answer to that question is that **YOU** cannot squeeze him.

But maybe you can make his partner do the job for

At trick 2 you play a ♠.

Of course North will win this with his ♠K.

And he will no doubt continue with the ♠A and ♠9.

You discard 2 ♦s from dummy and a ♣ from your hand.

South cannot spare either a ♥ or a ♦ so he also throws a ♣.

Remember this position

North will almost surely cash his ♠2.

You and dummy both discard a ♣ and South also must discard a ♣.

It doesn't matter what North plays next, let's say it is a ♣.

In your hand with the ♣K, you now play the ♣A.

South is truly squeezed. If he discards a ♥, dummy's ♥5 will become a winner. but if he discards a ♦ then you will get a third ♦ trick and the contract.

Since it was North who started the squeeze by cashing his last ♠, this is called a Suicide Squeeze. **BUT**, what if North had not cashed that ♠?

Here is the position you were supposed to remember

Suppose North is a really expert defender and avoids the Suicide Squeeze by just refusing to cash his winning ♠. It doesn't matter what else he plays instead, so let us assume it is a ♣.

You win in your hand and establish a ♦ winner by playing ♦A, ♦K, and a small ♦. South wins but cannot reach his partner's hand for that good ♠.
