stop the establishment of North's ♠J. As you can see, South would have been able to discard a loser on that ♠J if you hadn't played this way.

[showcards W:SA E:S9,S3 S:S5,S8]

You are West. The bidding has been as shown. You led the ♠A, East plays the ♠9, South the ♠5. You assume East has signaled you to continue ♠s, so you play the ♠Q. On this trick East plays the ♠3 and South the ♠8. How will you continue?

You know that both East and South are now void of ♠s. You might just switch suits, but you have a better choice.

If you play your ♠Q, East won't bother ruffing, South **WILL** ruff and dummy's ♠J will be established as a winner.

The best procedure is to lead a low ♠. East will ruff and South will over-ruff but by playing this way you

Only by watching what West plays. On the ♦J West played the ♦2, a low card signaling that he held an ODD number of ♦s. ODD must be either one or three so when he followed to the next ♦ you know he started with three. A little bit of counting tells you that South started with the doubleton Jack, so you want to win the second ♦ trick.

This defense holds South to one ♦ tricks, if you had let him win the second one he would have had 9 tricks.

[showcards S:HA,DJ W:HQ,D2]

You are East. The bidding has been as shown.

Partner led the ♥Q, you played low and South won the ♥A.

South now plays the ♦J on which West plays the ♦2. What do you play now, and what is your plan.

Play the ♦3 and when South plays another ♦ win with your ♦A.

North hoped his ♦ suit would provide enough tricks to make the game. You can see that there is no entry to the North hand EXCEPT in ♦s, so you want to win your ♦A on the trick that South plays his last ♦. How can you tell which trick that is?

[showcards W:H4 E:S2,HJ S:SJ,ST,HA]

You are West. The bidding has been as shown. You led the ♥4, East plays the ♥J, won by South with ♥A.

South plays the ♠J, you follow with ♠5, dummy ♠3 and East plays the ♠2. South continues with the ♠T

Play the ♠6.

East's ♠2 tells you he had an ODD number of ♠s, obviously 3. Since South also must have 3, you must take your ♠A on the third round, depriving dummy of the extra ♠ trick.

South may now turn to the ♦ suit, but your side can win the first ♦ and drive out South's ♥K. You will win 2 ♥s, 2 ♦s and the ♠A, down 1

dummy and you now discard the ♠2. West takes the ♥A and he can see that you don't want him to lead a ♠ or a ♦. He deduces that you might like a ♣ so he plays his ♣2 and you win 4 tricks.

[showcards W:H5]

You are East. The bidding has been as shown.

Partner led the ♥5, dummy played the ♥10

Play the ♦3 (or the ♠2).

You really want West to lead a ♣ if he gets into the lead. If you discard the ♣9 West will surely get the message and will lead a ♣. BUT - you will only win 3 ♣ tricks. The ♣9 would have been the fourth winner.

So instead, play a low card in one of the other suits, say the ♦3.

South is one trick short and he sees he can easily get that trick in ♥s. So he plays a second ♥ from

[showcards W:H4 E:HA,H3 S:H8,H5]

You are West. The bidding has been as shown. You led the ♥4, East takes the ♥A and returns the ♥3. You ruff and then play what???

Play a low ♣.

Partner played the ♥3, a low card, for you to ruff. That means his re-entry, if he has one, is in the lower-ranking suit.

Partner takes the ♣A and gives you a second ♥ ruff.
