get to your hand.

[showcards W:DA]

You are West. The bidding has been as shown. East led the ♦ A, dummy played the ♦ 2

Play the ♦ Q.

As soon as dummy appears you can see 3 tricks for your side. Partner surely has the ♦ K to go with his Ace and you have a certain trump trick. However, that's all you can see.

Your best hope is that East may be able to win a ♠ trick, and it may be important for the first ♠ lead to come from your side of the table.

Your ♦ Q play informs partner that you also have the ♦ J, giving him the option of underleading his ♦ K to

East next plays a small ♦ which you win with your ♦ J. You return the ♠ T. This establishes East's ♠ K before North can pull trumps and discard one of dummy's ♠ s on his fourth ♣.

you had to do was toss a small red card?

[showcards W:S5 S:SK]

You are West. The bidding has been as shown. You led the ♠5, East plays the ♠T and South wins the ♠K. To the second trick South plays the ♣T and you must discard something.

Play the ♠J.

You know that East has no high ♠ honor or he would have played it to the first trick. So South has the ♠ A Q left, plus all those ♣ tricks. You need to have West switch to a ♥ if possible.

East must be expecting to lead a ♠ back when he wins the ♣Q which you hope he holds. Your ♠J discard may make him rethink. If your ♠s were any good why would you be discarding a winner when all

Hopefully East will come to the conclusion that this is Suit Preference for a ♥ return and will play his ♥J. Hopefully.

 get it. North will discard his ♣K on South's extra ♦ winner.

[showcards S:S8,S5 W:SA,SQ,SK]

You are West. The bidding has been as shown. Partner led the ♠A, dummy played the ♠2 and you signal with your ♠T. East next plays the ♠Q and you drop the ♠4, completing your doubleton signal. East then plays the ♠K and it turns out you don't have to ruff after all. So what are you going to play?

Play the ♣9.

This should be a clear enough signal for East to play a ♣ to your ♣A next.

An alternate play, just as good, would be for you to ruff the good ♠Q and play the ♣A yourself.

If you don't get your ♣ trick at trick 4 you will never

card you are asking West to switch to the higher suit (choosing between ♦s and ♥s).

West dutifully plays a ♥ and you take the next three tricks. Had he switched to a ♦ instead, South would have been able to discard one of his ♥ losers on North's ♦Q.

[showcards W:CK]

You are East. The bidding has been as shown.

Partner led the ♣K, dummy's singleton was played

Play the ♣9.

West will look at your ♣9 and perhaps think for an instant that you want him to play another ♣.

But it will be a short instant because a look at dummy makes it absolutely clear to everybody that playing another ♣ could not help your side. Dummy has so many trumps that repeated ♣ leads would do nothing.

OK. If it's not an encouraging Attitude signal, what is it? Suit preference of course. Since it is a high spot

[showcards W:CA S:C5 W:DA,CA]

You are West. The bidding has been as shown.

Partner led the ♣A. Seeing your ♣3 he next played the ♦A. What will you play on this trick?

Play the ♦2.

Normally with this holding you would play the ♦9 to encourage East to play a second ♦ through dummy's ♦Q 10.

But this time you really want him to take his ♣K. So play the discouraging ♦2 and hope he gets the message to go back to ♣s. If he does play the ♣K next it will win and he can then give you a ♣ ruff.

obviously 3. And South must also have a third one, so he is up to some trickery with that ♣Q.

So grab your ♣A and return partner's ♥ suit.

[showcards S:HA,DA,DJ,CQ W:H5,D2,D6,C4]

You are East. The bidding has been as shown.

Partner led the ♥5, you put on the ♥J, South won with the ♥A. The second trick was ♦A, ♦2, ♦3, ♦5. The third trick was ♦J, ♦6, ♦8, ♦7. South then put the ♣Q on the table.

Play the ♣A.

Does it look to you like South is trying to create an entry to dummy so he can cash the 2 ♦ winners?

That's what he wants it to look like, hoping someone holds up their ♣A.

But don't believe Declarer, believe your partner. On the first ♦ West played the ♦2. On the second ♦ he played the ♦6. He has an odd number of ♦s,
