point or two.

North plays 4♥. East leads the ♣A, ♣K, ♣Q.

North plays 4♥. East leads the ♣A, ♣K, ♣Q.

Losers: ♠ 0 : ♥ 0 : ♦ 2 : ♣ 2 : Total = 4

You must eliminate one ♦ loser, that means ruffing it in dummy. You would like to pull trumps first but you cannot chance pulling two rounds because if they don't split 2-2 you would have to leave one out until after you had ruffed the ♦. The problem would then be that the defender who took the ♦A might lead the third trump, preventing your ruff.

So first you must drive out the ♦A. After you ruff the ♣ you play a ♦ to dummy's ♦K. West takes the ♦A and leads a trump. You win in your hand, pull one more trump, then play ♦Q, ♦7, ruffing in dummy. Back to your hand with the ♠A, pull the last trump and claim.

As you see you couldn't afford to pull trumps until after the ♦ ruff.

And you couldn't get the ♦ ruff until after you had forced out the ♦A.

You have a straightforward 1♥ opening bid.

Partner responds 2♥.

With 17 points and two doubletons you are on the borderline between passing and bidding game. If partner has the top of his 6-10 points you want to be in game, if he is at the bottom you don't.

A reasonable bid would be 3♥, inviting partner to bid game with a maximum.

A better bid is 3♦, a Help Suit Game Try. This says the same thing, bid game with a maximum, but also says "Use your ♦ holding to help you decide."

That was just what South needed. He only had 7 points but decided the ♦ help was worth an extra

When responding to partner's Takeout Double:- with 0-8 points you bid cheaply- with 9-11 points you jump in a suit- with 12 or more points you cue-bid their suit

You have 11 so you jump to 2 ♠. Partner bids 4 ♠ and you pass.

East plays 4 ♠. South leads the ♥K.

East plays 4 ♠. South leads the ♥K.

Losers: ♠ 1 : ♥ 3? : ♦ 0 : ♣ 1 : Total = 5?

The loser count is somewhat misleading because obviously you can ruff some ♥s in dummy.

Sometimes it is better to count winners, even though it is a suit contract. Winners: ♠ 2 : ♥ 1 : ♦ 2 : ♣ 2 :

Thinking like this makes it clear that you must win 3 of your 4 small trumps. The best way to do this is to win the ♥A and pull 2 rounds of trumps with ♠A and ♠K, spurning the finesse. Trumps split 3-2, so leave the master trump out and cash your other high card winners. Then start cross-ruffing, ♥s in dummy and ♦s in your hand. The defender with the master trump is welcome to ruff with it whenever he wants - it won't stop you from coming to 10 tricks.

You may have been tempted to play the ♠K, then finesse South for the ♠Q.

If you tried that North would have won his ♠Q, then played another ♠. That would leave both you and dummy with only one trump each and you would have come up a trick short. You can afford to pull just two rounds of trumps, then must cross-ruff with your remaining four.

West	North	East	South
Pass	3♥	Pass	1♥
All Pass			4♥

4♥ by South

You are wide open in ♠s, so you have to hope that West holds the ♦K. But that won't be enough by itself, in case he has ♦K x x x you also have to have three entries to your hand. Two of them will be the ♥A and ♥Q and the third entry must be the ♣A.

So you win the first trick with the ♣A and immediately take your first ♦finesse. It wins, so you return to your hand with a ♥ to the ♥Q and take another ♦finesse. Back to your hand with the ♥A (pulling the last trumps) and take a third ♦finesse. Finally on the ♦A you can discard either your ♣ loser or a ♠. You will have to give up three tricks at the end.

This plan would work 50% of the time, whenever West was dealt the ♦K.

Any other plan that was based on West holding the ♦K would work **ALMOST** 50% of the time but would fail when West had three protectors for the ♦K.

You open 1♥, partner responds 3♥.

What is your next bid?

Partner's 3♥ response shows 11-12 points with good trumps.

With your 14 points you decide to bid the game.

South plays 4♥. West leads the ♣4, East plays the ♣K.

South plays 4♥. West leads the ♣4, East plays the ♣K.

Losers: ♠ 3 : ♥ 0 : ♦ 2 : ♣ 1 : Total = 6

There is no hope of extra winners except the ♦ suit.

you should try to find somewhere to put the ♠ loser.

You have 11 (perhaps 12) points and four trumps.
Just right for a limit raise.

So you bid 3♥ and partner goes to game.

East would play 4♥.

Click

West plays 4♥. North leads the ♠Q.

West plays 4♥. North leads the ♠Q.

Losers: ♠ 1 : ♥ 1 : ♦ 1 : ♣ 1 : Total = 4

You know you can't get rid of the ♦ loser, and it's hard to imagine a way that would let you get rid of the ♣ loser. The ♥ loser depends on the finesse. So

First you win the ♠A. You know that you will eventually take the ♥ finesse, so should you take it now? Visualize the likely defense actions if you do. Say South wins the ♥K. He will surely play another ♠, knocking out dummy's ♠K. Whenever you try to set up ♦s the defense will take their ♠ trick and you will eventually go down.

What happened is that you gave the defense a tempo and let them control the timing of the play. You should not have rushed into the ♥ finesse. Instead suppose that you win the first trick with dummy's ♠K and immediately play the ♦Q. The defense can take their ♦A when they want to and push another ♠, but now the timing is on your side. You can discard a ♠ from dummy on your good ♦ in time.

Take the ♥ finesse before you set up a ♦ trick and you will be just fine if the finesse wins. But if it loses you will lose a tempo and the defense will get to your ♠ loser before you can set up a ♦.

Set up the ♦ winner before you take the ♥ finesse and you will always be able to dump the ♠ loser no matter who has the ♥K.

Pass	2♠	Pass	3NT
All Pass			

3NT by North

Winners: ♠ 1 : ♥ 4 : ♦ 1 : ♣ 0 : Total = 6

With 15 points and a balanced hand of course you open 1NT.

Partner's response is 2♣.

Partner's 2♣ bid is Stayman asking you to name a 4-card Major.

You bid 2♠, but that must not have been the Major he wanted so he bids 3NT.

North plays 3NT. East leads the ♦ 2. West plays ♦ Q. You hold up on this trick and West returns the ♦ 3.

North plays 3NT. East leads the ♦ 2. West plays ♦ Q. You hold up on this trick and West returns the ♦ 3.

You need to get three more winners and you have two very clear possibilities.

If West holds the ♠ K you can finesse him out of it and win an additional 3 tricks in the suit. The problem with this approach is that half the time East will hold the ♠ K and you will go down.

Or you can drive out the ♣ A and definitely set up an additional 3 tricks in that suit. The problem with this approach is that if the defender's ♦ s split 5-3 they will be able to win 4 ♦ s and the ♣ A.

If you pay attention to the opening lead this becomes a simple decision. East led the ♦ 2. Assuming that was fourth down then he must have led from a 4-card suit. So it looks like the ♦ s must be splitting 4-4 and it is safe for you to establish ♣ s. So you drive out the ♣ A. The defenders take their other 2 ♦ s but you make the game losing only 3 ♦ s and the ♣ A.

In this layout the ♠ finesse fails, as it would do half the time.

East's lead of the ♦ 2 should have made you pretty sure that he had led from a 4-card suit. If the ♦ 2 is fourth down, there cannot be a fifth down. Additionally, West's return of the ♦ 3 confirmed that conclusion. If West had started with only 3 ♦ s, (say ♦ Q 6 3) his correct return at trick 2 would have been his next highest, the ♦ 6. With 4 cards in the suit his correct return is his original fourth down.
