eliminate one of the ♠ losers - that would at least get you to down only 1.

Or, if West holds the ♠Q and East the ♠A then leading up to the ♠J would also eliminate one ♠ loser. But this play has another advantage - if West should happen to hold **BOTH** the ♠A and ♠Q then leading up to the ♠J will actually let you make the contract. So you win the ♣A, pull two trumps, then play a ♠ to the ♠J. If that wins, back to your hand with a trump and play your other ♠ to the ♠K.

Some times you don't really expect to make a contract - this is one of those times.

But you should still ask yourself if there is some distribution that will allow you to be successful. And if there is, just assume that distribution and boldly play the cards out.

You open 1♥ and partner jumps to 4♥. You pass.

South plays 4♥. West leads the ♣Q.

South plays 4♥. West leads the ♣Q.

Losers: ♠ 2 : ♥ 0 : ♦ 2 : ♣ 1 : Total = 5

The ♣ losers are shown as 1 since you will always be able to ruff a ♣ in dummy.

North's precipitous leap to 4♥ was made partly in hopes of making the contract, and partly as a preemptive bid to shut the opponents up. So it wouldn't be a surprise to land in an unmakeable contract. However, this one has a slim chance. The only suit you might make something of is ♠s. If West holds the ♠A then leading up to the ♠K would

♣Q so naturally you will finesse West. You dare not let West get into the lead since he can lead through dummy's ♥K. If East gets the lead with the ♣Q, he cannot hurt you.

Win the first trick with the ♠A. (**DO NOT HOLD UP, WEST MAY SWITCH**). Play the ♣K then ♣J, letting it ride if not covered. East can win the ♣Q but cannot lead a ♥ without giving you a trick. You win whatever else he returns and make your 9 tricks. Of course you must be careful to unblock the ♦ A K Q while you still have a dummy entry to the ♦J.

This is another hand where you want to keep a particular defender off lead. In this hand it is West who is the Danger hand.

Be on the lookout for this type of situation because many times you have a finesse that can be made either way. So you finesse into the Safe hand.

Balanced, 17 points. You open 1NT. Partner's response is 2♣.

Partner's 2♣ is Stayman. You have no 4-card Major to show so you bid 2♦. Partner now says 3NT and you pass.

South plays 3NT. West leads ♠Q.

South plays 3NT. West leads ♠Q.

Winners: ♠ 2 : ♥ 0 : ♦ 4 : ♣ 2 : Total = 8

The only thing better than being good is being lucky! You are very lucky that you didn't get a ♥ lead - now you must take advantage of your good luck.

You only need one more winner, and the ♣ suit is your best bet. You can finesse either defender for the

West probably has a 7-card suit to overcall at the 3-level, so if you play the ♠A East will ruff and one of your winners will disappear. So don't play the ♠A. Duck and let West win the trick while East shows out as expected. West will lead the ♠Q and you duck again. So West will lead the ♠J and you duck one more time, but now you can ruff in your hand.

Lead your ♥Q and finesse, East winning the ♥K. East will probably return a ♦ which you win in dummy. Play the ♥A. Then ruff a ♦ to get back to your hand and pull any trumps left out. Play a ♣ to dummy's ♣A and at long last play dummy's ♠A and discard your ♣ loser.

You always had 10 winners in this hand, as long as one of them didn't disappear.

To make sure the ♠A didn't disappear you had to hold it until East no longer had a trump.

You estimate your hand has 6 playing tricks. That is reasonable for a preemptive 3♥ bid. West overcalls 3♠ and partner bids 4♥. Everybody passes.

South plays 4♥. West leads the ♠K.

South plays 4♥. West leads the ♠K.

Losers: ♠ 1 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 3

This looks way too easy. If the ♥ finesse works and the ♣ finesse works you could make 6. It is when things look too easy that you should look for danger! What if you play the ♠A and East ruffs. What if East also gets a trick with the ♥K and West gets a trick with the ♣Q. What with your ♠ loser you would be down 1.

of them once the ♣A is gone. A 3-2 split in ♦s will assure 2 more ♦ tricks. There are lots of possibilities but you must be careful of entries and unblocking. In particular, you only have one entry to your hand (if you don't waste the ♠Q) and that is the ♣K Q. So you need to be sure to unblock the ♠A Q before you try to get to your hand in ♣s.

But there is something you **MUST** do first - test the ♦s. You win the ♠A and play ♦A, ♦K. East shows out on the second ♦! Now you unblock your ♠Q, then lead a ♣ to your ♣Q. Assume a defender takes the ♣A and plays a ♠. You win the ♠K, then the ♣K. Next a ♦ toward dummy, finessing West out of the ♦J. Dummy is now high.

What if you had carried out the plan up to the point when you led a ♣ toward your hand and the defense didn't take their ♣A?

You must abandon ♣s temporarily and take the ♦ finesse. You take your good ♦s and then go back to ♣s.

With 9 points opposite an opening 2♣ bid you are too strong for a negative response.

A suit response would promise a 5-card suit so you bid 2NT. Partner says 4♣.

Partner's jump to 4♣ over your 2NT is Gerber convention.

You have no Aces so you respond 4♦. Partner bids 6NT.

South to play 6NT. West leads the ♠J.

South to play 6NT. West leads the ♠J.

Winners: ♠ 3 : ♥ 2 : ♦ 3 : ♣ 0 : Total = 8

You need 4 more winners. The ♣ suit will provide 3 of them once the ♣A is gone. A 3-2 split in ♦s will assure 2 more ♦ tricks. There are lots of possibilities but you must be careful of entries and unblocking. In particular, you only have one entry to your hand (if you don't waste the ♠Q) and that is the ♣K Q. Partner has a balanced hand with 15-17 points. You have a balanced hand with 18 points. Together that makes two balanced hands with 33-35 points.

So you bid 6NT.

North would play 6NT.

Click

South plays 6NT. West leads the ♠ J.

South plays 6NT. West leads the ♠ J.

Winners: ♠ 3 : ♥ 2 : ♦ 2 : ♣ 4 : Total = 11

It's nice to make Plans for slams because there are so few losers to worry about.

This one is definitely straightforward. You need to get one more winner. You can hope for a 3-3 ♥ split which would mean your fourth ♥ would become a winner, or you can hope that West has the ♦ Q in which case a simple finesse will give you the winner. But instead of making it an either/or situation you can combine your chances.

Win the first trick in either hand and duck a ♥. Win the return and play your 4 ♣ winners (discarding a ♦ from your hand) followed by your other 2 ♠ winners. Then play ♦ A, ♥ K and ♥ A. You will be in your hand with two cards - the ♥ 7 and the ♦ 8. If the ♥ 7 is good, cash it and win the last trick with dummy's ♦ K. If the ♥ 7 is not a winner then finesse the ♦ J.

Always be on the lookout for situations where there are two possible routes to success.

Here the ♦ finesse was one possibility, but by ducking a ♥ you could test the ♥ suit and still keep the ♦ finesse in reserve.

Win the ♦A and play the ♣6 to your ♣A. Play ♠A, then a small ♠ to dummy's ♠J. Lead the ♣Q. If East covers, ruff and re-enter dummy with a trump so you can discard a ♦ loser on the ♣J. If East doesn't cover the ♣Q when you lead it, discard a ♦ immediately. As long as East holds the ♣K you can make the contract. This is called a Ruffing Finesse.

In some hands there is more than one way to make the contract.

But in this deal the ruffing finesse is the only Plan that works.

You open 1♠ and partner responds 2♥.

With only 14 points and a 6-card suit you rebid a minimum 2♠. Partner raises to 3♠.

Your bids show 13-15 points. Partner has decided to invite you to bid game with a maximum. Since you have 14 points it's not really clear whether you should accept the invitation. You decide to add a little for your singleton Ace and bid 4♠.

South plays 4♠. West leads the ♦K.

South plays 4♠. West leads the ♦K.

Losers: ♠ 0 : ♥ 2 : ♦ 2 : ♣ 0 : Total = 4

The two fast losers in ♥s can't be helped, but maybe you can get rid of one of the ♦ losers.
