Loser List: ♠ = 0 : ♥ = ? : ♦ = 2 : ♣ = 0 :: Total = ?

The loser count is very confused, but that ♣ suit is not confused at all. You want to be able to run the ♣s so your plan is to play the ♥ A K, and if both defenders follow go ahead and knock out the last ♥ so they can't ruff your ♣ tricks.

Unfortunately when you play ♥ A K, East plays the ♥ Q, then discards a ♠.

You may think you should change your plan but you should go right ahead with it. West has two master trumps, but dummy still has 4 small ones. So play a ♥ to force out West's ♥ 10. He will no doubt play another ♠ and force dummy to ruff. No problem, knock out West's final ♥ and dummy will still have one tiny trump left. When you get back in you can run the ♣s unimpeded.

Usually it is good technique to leave master trump(s) undrawn.

The exception is when you have a long suit you wish to run and you can't stand to have the running stopped by a ruff.

This Deal is unusual in that there are two master trumps, but the principle is the same.

Who knows whether you should use a transfer or just bid 4♥ yourself. Assume you decide on the transfer and bid 2♦. Partner bids 2♥ (of course).

Who knows whether you should use a transfer or just bid 4♥ yourself. Assume you decide on the transfer and bid 2♦. Partner bids 2♥ (of course).

Naturally you go ahead and bid 4♥, the final contract.

The contract would be 4♥ played by South.

North plays 4♥. East leads the ♠ Q and West follows with the ♠ 9.

You win the first trick with the ♠ A.

All Pass			
3♣ by East			

The 2♠ bid is used as a transfer to 3♣.

If you don't use this in your system, just consider this hand; you might decide to incorporate it. So you bid 3♣ and everybody passes.

East plays 3♣. South leads the ♥J.

You play dummy's ♥Q hopefully, but North plays the ♥K.

Loser List: ♠ = 1 : ♥ = 1 : ♦ = 2 : ♣ = 1 :: Total = 5

That is one loser too many. The ♣Q MIGHT drop . . . but she won't. There are no finesse positions. So you are going to have to establish a winner somewhere to discard dummy's small ♠.

Do you see it? The ♥8. Take the ♥A. Then play your ♣ A K. As predicted, the ♣Q doesn't fall. Then play a small ♥ to dummy's ♥9. Of course South will take the ♥10, but now your ♥8 is high.

As soon as you get the lead you play the ♥8 and discard dummy's ♠2.

We know, you didn't really play the ♥Q on the first trick in the hope that South had underled the ♥K (although he certainly might have done so).

The real reason for covering was so you could establish the ♥8 by force.

Suppose you had not played the ♥Q to trick one. North would have withheld the ♥K and you'd have had to take your ♥A. Later North would have taken dummy's ♥Q with his ♥K, then played a small ♥ through your ♥8 to South's ♥10 7.

You could either use a transfer or you could jump to 3♠. You decide on the transfer and bid 2♥. Partner jumps to 3♠!

You could either use a transfer or you could jump to 3♠. You decide on the transfer and bid 2♥. Partner jumps to 3♠!

The 3♠ bid is a "Super-accept", showing a maximum 1NT opener, 4 ♠s and a doubleton. In other words, partner's hand has revalued to 18 points. So you bid 6♠ (or you could ask for Aces instead).

6♠ by South			

The contract would be 6♠ played by North.

South plays 6♠. West leads the ♣Q, East follows with the ♣2.

You win the first trick with the ♣A in your hand.

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 0 : ♣ = 0 :: Total = 2

There are two obvious possibilities for avoiding the ♥ loser. You could finesse East for the ♥K; this is a 50% chance. The ♦s could split 3-3; this is a 36% chance.

In fact, your chances are better than either of those percentages because you can try the ♦s first, and if they **DON'T** split you can then try the ♥ finesse.

Pull trumps; West shows up with 3 trumps. Play the ♦K, then a small ♦ to dummy's ♦A. On this trick West follows with the ♦10.

Your contract just became a sure thing! Play the ♣K to strip both your hands of ♣s. Lead dummy's last ♦, and when East plays low, finesse the ♦9. If the finesse wins, discard a ♥ from dummy on your good ♦. But if the finesse loses to West's ♦J, he will be endplayed and have to lead a ♥ into your ♥A Q or give you a ruff/sluff with a ♣. And on top of that your fourth ♦ will be good.

In this actual Deal your ♦ finesse worked which gave you 4 ♦ tricks.

But imagine that the ♦J is transposed to the West hand. He wins that ♦ trick but must give you the contract with his return.

3NT by West

You need two more winners. Barring a 4-0 ♣ split your two extra winners will be the ♣5 and ♣3.

So after winning the ♥A, you play a ♣ to dummy's ♣Q and breathe a sigh of relief when both defenders follow suit.

UhOh. Surely you didn't play your ♣4 to dummy's ♣Q???

If you did then just look at the situation now. If the ♣J doesn't fall on the next trick the suit will be blocked. Now go back in time and play the ♣T to dummy's ♣Q.

That's better. Now under the ♣ A K you can unblock the ♣ 9 7, which will leave you with the ♣4 to slip under dummy's ♣5.

Watch those spot cards. You may have to unblock them to stay in the hand you want to be in.

Partner's jump to 3NT is a lebensohl method.

He is describing a hand with which he would have bid 3NT if there had been no overcall. But he is warning you that he **DOES NOT HAVE** a ♥ stopper!

Since you **DO** have a ♥ stopper you decide to pass and play 3NT.

West plays 3NT. North leads the ♥K.

You hold up your ♥A until the third round.

You decide to use a transfer so the lead will be into whatever holding partner has in the minor suits. You bid 2♥ and partner bids 2♠.

You decide to use a transfer so the lead will be into whatever holding partner has in the minor suits. You bid 2♥ and partner bids 2♠.

You are nowhere near strong enough to be thinking of slam so you bid 4♠.

The contract would be 4♠ played by South.

North plays 4♠. East leads the ♣T. West wins the ♣A. They continue ♣s and you ruff the third one in dummy.

Loser List: ♠ = 0 : ♥ = 0 : ♦ = 1 : ♣ = 2 :: Total =

Those losers are based on dummy's hand, not yours. You can figure them either way but it is usually easier to determine losers based on the long-trump hand. It's important to remember it in this Deal because the zero losers in ♥s assumes you will ruff a ♥ in your hand.

Pull one round of trumps with dummy's ♠K. Both defenders follow suit. Play the ♥A, then ♥6 to dummy's ♥K. On this trick East follows with the ♥10.

The Plan is still the same, you will ruff the ♥ in your hand, but you better be sure to ruff with your ♠A. Aha! Your precaution pays off when East shows out of ♥s, but of course he cannot over-ruff your ♠A.

A very good Bridge maxim is this: When you are ruffing, ruff with as high a trump as you can afford.

Here, with only 2 trumps left out, you can afford the ♠A.
