East holds only two small ♠s with his ♠K, then two entries will be enough. But what if East holds

♠ K x x x ? Can you find a third entry to dummy?

If the ♦s split 3-2 the answer is **YES**. Play the ♦A, then lead your ♦8 to dummy's ♦J. Watch carefully to see if both defenders follow to this trick. They do. Play a ♠ to your ♠T, which holds the trick. Play your ♦Q to dummy's ♦K. Finesse the ♠ again. Return to dummy by playing your ♦5 to dummy's ♦6, then finesse the ♠ one last time.

If the ♦s had split 4-1 you would not have been able to enter dummy three times. That would have been very unlucky.

If you played your ♦5 too early you would not have been able to enter dummy three times even when there was a 3-2 split. That would have been very unsmart.

With 20 HCP and balanced distribution you should open 2NT. Do not let the good 4-card ♠ suit sway you to anything else. Partner bids 3NT and everybody passes.

South plays 3NT. West leads the ♥J. You try the ♥Q, but East plays the ♥K.

Winner List: ♠ = 1 : ♥ = 0 : ♦ = 4 : ♣ = 1 :: Total = 6

You need 3 more winners and at least 2 of them must come from ♠s. Furthermore you don't want East to lead ♣s through your King. Your best hope is that East holds the ♠K so you can finesse.

So you win the ♥A and start thinking about dummy entries. Your obvious entries are the ♦K and ♦J. If

Those two entries can only be the ♠K and ♠J. So you absolutely **MUST** win the first trick in your hand with the ♠A. Then play the ♣ A K. Over to dummy by playing ♠9 to ♠J. Lead the ♣J to drive out the ♣Q. Win whatever they return and play ♠Q to ♠K to reach your two good ♣s.

When you need dummy entries you may need to win a trick in your hand with an unnecessarily high card - like in this case.

You can only win 3 ♠ tricks however you play it, so you play to suit your entry needs.

You have 6 HCP and a 5-card suit. Although you can't be sure, there is a good chance your hand will be useful to partner.

So you bid 3NT.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♠4. You play dummy's ♠3 and East contributes the ♠6.

You can get them in ♣s, but only if you are careful.

After you unblock the ♣ A K you will go to dummy and play the ♣J. Then, after the ♣Q is driven out you will return to dummy for the two ♣ winners. That means you need **TWO** dummy entries.

 at trick one. Do you win or hold up?

You should assume that West holds the ♠K.

If you take the ♠A right now your ♠J 5 will provide a second stopper if it is West who gets the lead. However, if East gets the lead he will play through your holding and you may lose 4 ♠ tricks.

If you hold up you can expect East to play another ♠ through your ♠A J and West will then establish the suit. However, in doing so he will remove any ♠ held by East.

The answer key lies in the ♣ suit. You will be finessing through West, so East is the only defender who can get the lead in ♣s. Therefore you must hold up on ♠s until the third round.

If you win the first ♠ East will play a ♠ through your ♠J 5 when he wins the ♣K. West will then swamp you with ♠s.

But, if you hold up your ♠A until the third round, East will have no ♠ left when he wins the ♣K.

With no 4-card Major suit you respond 2♦ to partner's Stayman bid. Partner now bids 2NT.

With no 4-card Major suit you respond 2♦ to partner's Stayman bid. Partner now bids 2NT.

With a full 17 points you accept partner's game invitation and bid 3NT.

South plays 3NT. West leads the ♠6 on which East plays the ♠Q.

Winner List: ♠ = 1 : ♥ = 2 : ♦ = 2 : ♣ = 1 :: Total = 6

You need 3 more tricks, obviously coming from the ♣ suit.

But the burning question right now is what do you do

4♠ by South

Loser List: ♠ = 0 : ♥ = 2 : ♦ = 1 : ♣ = 1 :: Total = 4

When you are 5-5 in the Majors you can transfer to either suit. Most will say transfer first to ♥s when you have invitational strength. So you bid 2♦.

Partner says 2♥;

When you are 5-5 in the Majors you can transfer to either suit. Most will say transfer first to ♥s when you have invitational strength. So you bid 2♦.

Partner says 2♥;

Now you show your other 5-card Major by bidding 2♠. This one hits the spot and partner raises to 4♠.

South plays 4♠. West leads the ♥5. East takes the ♥A and returns the ♥6 which West ruffs. West then plays the ♦2.

That's an odd way to show the second ♥ loser but you get the idea. You've lost 2 tricks already and it doesn't look like you can dodge the ♣A. Soooooo, you cannot afford to lose a ♦ trick.

Take dummy's ♦A and then play ♠A, ♠K, relaxing a little when both defenders follow suit both times.

Play your three high ♥s, discarding all three ♦s from dummy. Play your ♣ toward the ♣K. West will no doubt grab his ♣A but the rest will be yours, since you can ruff your ♦ loser in dummy.

It was a little unlucky to suffer that early ♥ ruff.

But it was very very lucky that the ruffer happened to be the defender with three trumps!

That meant you could pull trumps with two pulls, leaving that one important one in dummy.

3NT by South			

Partner's 3♦ bid shows a 5-card suit and is forcing to game. While 5♦ is possibly the best contract your double ♥ stopper should sway you to 3NT instead. This is the old "9 tricks are easier than 11" principle.

South plays 3NT. As expected, West attacks in his ♥ suit.

Winner List: ♠ = 2 : ♥ = 2 : ♦ = 0 : ♣ = 2 :: Total = 6

Even if East holds both black Queens, (not likely), you can only finesse your way to 8 tricks. Since you need 9 tricks you must establish the ♦ suit.

If West holds both the ♦ A and ♦ K then you are going down, because they will win the race to establish ♥s before you can establish ♦s.

But when the ♦ A and ♦ K are in different hands you have a good chance for success; it depends on East having no ♥ at the time he takes his ♦ winner.

So you should hold up on the first ♥ trick and win the second. If West started with 6 ♥s then East will be out. So whether he wins his ♦ trick first or second he still won't be able to continue ♥s.

After your hold up East has no ♥s. If he takes the first ♦ trick he will have to lead another suit. You will still have a ♥ stopper for when West wins **HIS** ♦ trick.

On the other hand, if West takes the first ♦ trick he can certainly drive out your last ♥ stopper. But then, when East takes **HIS** ♦ winner he will have no ♥.

Finally, if West had only a 5-card ♥ suit, good defense would beat you. But they have to be sure East wins the first ♦ trick, and they might slip up.

3NT by South

Winner List: ♠ = 1 : ♥ = 1 : ♦ = 3 : ♣ = 2 :: Total = 7

You need 2 more winners, and you need to get them before you lose the lead because it appears that West can cash 3 more ♠ tricks.

That means you need all 5 ♦ tricks. The good news is that the 5 missing ♦s will split 3-2 about two-thirds of the time. The bad news is that they will be 4-1 about one-third of the time. Can you protect yourself against a 4-1 break?

Maybe and maybe not. If West has ♦ J x x x there won't be anything you can do about it. But if East has this holding then you can succeed if you play your cards right.

Did you like that "play your cards right" quip? First play a ♦ to your ♦ K; both defenders follow. Next play a ♦ to dummy's ♦ Q. West discards a ♣. You are conveniently in dummy so you play dummy's last ♦ and East's ♦ J 9 are caught in a pincer movement by your ♦ A 10 5.

It was important to play the ♦s exactly as described because dummy had only one entry left, the ♦ Q.

Suppose your first ♦ play had been dummy's ♦ Q. You could make your contract if you play a small ♦ and finesse the ♦ 10. But at that point you wouldn't know whether the ♦s were splitting evenly or not. You'd be risking defeat on a hand where everybody who played for the 3-2 split was making the contract.

By taking the **SECOND** ♦ trick with dummy's ♦ Q the 4-1 split is exposed at the right time.

Partner's 2NT opening shows 20-21 points so you know you want to be in game. To find out which game you bid a Stayman 3♣. Partner replies 3♦.

Partner's 2NT opening shows 20-21 points so you know you want to be in game. To find out which game you bid a Stayman 3♣. Partner replies 3♦.

You don't have a 4-4 ♥ fit, so you bid 3NT.

The contract would be 3NT played by North.

South plays 3NT. West leads the ♠ 3. Your first problem is which ♠ to play from dummy. That is an easy problem. If you play the ♠ K you might lose the first five or six tricks. If you play low you guarantee a ♠ stopper. East plays the ♠ A and returns the ♠ 7 to dummy's ♠ K. West plays the ♠ 2 on this trick.
