Lead: ♠ 6

1 or 2 rounds. When he does win it he will return a ♠ and whether you play the ♠ A or a low ♠ East will be able to prevent you from reaching dummy.

But if you win the first trick with the ♠ A, then dummy's ♠ Q J will provide a guaranteed entry to the good ♥s.

South's 3♦ bid was a transfer to ♥s, and his 2NT bid showed exactly 5 ♥s with an invitational strength hand. North is to play 3NT. East leads the ♠ 6, you play dummy's ♠ 9 and West contributes the ♠ 2.

Winners: ♠=2 ♥=0 ♦=1 ♣=2 Total = 5

The math is easy - you need 4 ♥ tricks. And you should be able to manage that by driving out the ♥ A. But the defenders will probably hold up one or two rounds when you play on ♥s, so you must have an outside entry to dummy.

The ♠ Q J will provide that entry **IF** you make sure to win the first trick with your ♠ A as an unblocking move. If you don't do so then East will be able to keep you out of the dummy and away from those good ♥s.

Suppose you allow dummy's ♠ 9 to hold the first trick, then start on ♥s. West will hold up the ♥ A for

3NT by East			
Lead: ♠2			

South is almost certain to hold the ♠Q because his ♠2 opening lead promises an honor and the ♠Q is the only one you don't have.

So the ♠ finesse is an odds-on play to get a second dummy entry.

East is to play 3NT. South leads the ♠2, you play dummy's ♠4 and North plays the ♠8.

Winners: ♠=3 ♥=0 ♦=2 ♣=2 Total = 7

Needing just two more winners it looks straightforward to establish dummy's ♥ suit. Suppose you win the ♠10 and play the ♥9. If the defenders win this trick you are home free. You win their ♠ return with your ♠A, then continue ♥s to drive out their last stopper while you still have the ♠K as a dummy entry.

This won't work against good defenders, who will hold up on the first ♥ trick and win the second. Then when they continue ♠s you won't have another ♥ to return to dummy, so while you can use the ♠K as an entry to establish the ♥s you will never get back to use the good ones.

Instead you should win the first trick with your ♠A. Now when you attack ♥s a defensive holdup won't

Lead: ♠ 10			

3NT would have been a lot easier, but you didn't get there. South is to play 5 ♦. West leads the ♠ 10.

East plays the ♠ K and you ruff with the ♦ 2.

West plays low.

East shows out.

East covers with the ♠ A.

Losers: ♠=0 ♥=1 ♦=0 ♣=2 Total = 3

The good news is that you only have one loser to get rid of. The bad news is that there doesn't seem to be a good place to put it.

Unlikely as it seems, your best candidate for establishment is dummy's ♠ 8. West is marked with 3 ♠s, and having led the ♠ 10 there is a good chance that he also has the ♠ 9. If so you can ruff it out.

Cover the ♠ 10 with dummy's ♠ J, and when East plays one of his honors ruff in your hand. Play a trump to the ♦ 10, East showing out. Lead the ♠ Q. East will be forced to play his other high honor, (if he doesn't you would discard a loser), and you ruff again.

Back to dummy with the ♦ Q and ruff the ♠ 2 with a high trump just to be safe. West drops the ♠ 9 on this trick.

Pull West's last trump and enter dummy with the ♥ A and **FINALLY** discard a loser on the now established ♠ 8.

When your only hope of making a contract is for the defender's cards to be a certain way, just assume that they lie perfectly for you and barge ahead.

Here you needed ♠ 10 9 x to be with West if you were to make the contract so you played for just that holding.

6♠ by West

Lead: ♠5

West is to play 6♠. North leads the ♠5.

Losers: ♠=0 ♥=1 ♦=1 ♣=0 Total = 2

First pull trumps with the ♠A and ♠Q, both defenders following. Next you must establish dummy's ♣ suit to get rid of one of your losers. If the suit splits 3-3 that will be easy since you have two dummy entries, one to get there to ruff the third ♣ and the other to get there to enjoy playing the winners. But ♣s will probably split 4-2 so the two entries won't be enough. Here's how to make the defenders help you establish the suit.

After pulling trumps, play the ♣ A K, then ♦ A.

You exit with a small ♦ and South wins.

The defender who won the ♦ trick has a problem. If he plays another ♦ you will get a ruff-sluff, and if he plays a ♥ you will play for the ♥Q and ♥J to be in different hands. So he will probably play a ♣.

You ruff in your hand, play a trump to dummy's ♠K and ruff the ♣8, establishing the ♣9 while you still have the ♥ entry.

Notice that this Plan would also succeed if the ♣s had split 3-3.

This was a combination of Suit Establishment and End-play. The lesson on Eliminations contains a lot more of this type of hand.
